It's hard to believe that the world's first skyscraper was built in 1885 – the ten-storey Home Insurance Building in Chicago. Little more than a century later the highest skyscraper is the 163-storey Burj Khalifa in Dubai, standing 828 metres tall. By 2020, the 1,000-metre Kingdom Tower in Jeddah will take first place. The designs are becoming more extraordinary, but behind all the steel and glass how is a skyscraper logistically constructed? The Haynes Skyscraper Manual takes the reader, be they armchair enthusiast or architect, through the fascinating process, from initial concepts through to modern-day building methods. Interspersed with intriguing facts and figures, the Skyscraper Manual is fully illustrated with stunning

The Airbus A380 is the world's most recognised and most talked about airliner since the Boeing 747 and Concorde appeared in the skies in the late 1960s. Designed to challenge Boeing's monopoly in the large-aircraft market, it made its first flight in April 2005, entering commercial service two years later with Singapore Airlines. This jet has become so popular that every four minutes--24 hours a day, seven days a week--an A380 is taking off or landing somewhere in the world. There is no other development in recent aviation history to rival this remarkable aircraft.
