A Very Strange Trip

A desperate boy escapes his abusive home by joining a carnival and is drawn into a dark conspiracy in this tale by "a master storyteller" (Kurt Vonnegut). Though only eight years old, little Horton "Horty" Bluett has known a lifetime of sadness. Tormented and abused by his adoptive family, he's had enough—and with a beloved broken toy he calls "Junky" as his sole companion, the desperate little boy runs away to join a carnival. There, among the fortune tellers, fire-eaters, sideshow freaks, and assorted "strange people," Horty hopes to find acceptance and, at long last, a real home. But disgraced doctor Pierre "Maneater" Monetre's traveling show is no ordinary entertainment, and its performers are not what they appear to be. The Maneater has sinister plans for the world that go far beyond fleecing unsuspecting rubes and other easy marks—a dark and terrible scheme that requires unleashing the extraterrestrial power of the dreaming jewels, and the unwitting assistance of a young boy who may be far more remarkable than he's ever imagined. The full-length debut by Theodore Sturgeon, a legendary writer who won Nebula and Hugo Awards and authored such classics as *More Than Human*, this journey into a circus of shadows is "an intensely written and very moving novel of love and retribution" (The Washington Star). This ebook features an illustrated biography of Theodore Sturgeon including rare images and never-before-seen documents from the University of Kansas's Kenneth Spencer Research Library and the author's estate, among other sources.

The Aria of Galvanize

One of the most original shows in the history of television, Mystery Science Theater 3000 is a beloved cult hit built on the back of another cult phenomenon: the bad movie. The show's premise involved a man and some robots watching cheesy movies and cracking jokes. Over its 197 episodes, MST3K developed a passionate fan base that took it from a local UHF show in Hopkins, Minnesota, to a major motion picture. This is the story of MST3K from the beginning to the end. Twelve of the episodes are covered, giving an in-depth look at the show, its ethos and its comedic style. The films screened in these episodes are discussed critically, as are the episodes themselves.

mankind – and we’ve almost no time to fight back. The supposedly benign Olyix plan to harvest humanity, in order to carry us to their god at the end of the universe. And as their agents conclude schemes down on earth, vast warships converge above to gather this cargo. Some factions push for humanity to flee, to live in hiding amongst the stars – although only a chosen few would make it out in time. But others refuse to break before the storm. As disaster looms, animosities must be set aside to focus on just one goal: wiping this enemy from the face of creation. Even if it means preparing for a future this generation will never see. *Salvation Lost* is the second book in the *Salvation Sequence* by Peter F. "Dawdler." "Layabout." "Shit-heel." "Loser." For as long as mankind has had to work for a living, which is to say ever since the expulsion of Adam and Eve from the Garden of Eden, people who work have disparaged those who prefer not to. Mark Kingwell's introductory essay offers a playful defence of the idler as homo superior, while Joshua Glenn's glossary playfully explores the etymology and history of hundreds of idler-specific terms and phrases, while offering both a corrective to popular misconceptions about idling and a foundation for a new mode of thinking about working and not working. *The Idler's Glossary* is destined to become *The Devil's Dictionary* for the idling classes, necessary reading for any and all who wish to introduce more truly "free" time into their daily lives.

An Ethical Guidebook to the Zombie Apocalypse

When your base camp is overrun by zombies, whom do you save if you cannot save everyone? Is it permissible to sacrifice one survivor to an undead horde in order to save a greater number of the living? Do you have obligations to loved ones who have turned? These are some of the troubling ethical questions you might face in a zombie apocalypse. Bryan Hall uses situations like these to creatively introduce the foundational theories of moral philosophy. Covering major thinkers such as Aristotle, Immanuel Kant, and John Stuart Mill, this is an introduction to Ethics like no other: a practical guidebook for surviving a zombie outbreak with your humanity intact. It shows you why moral reasoning matters as long as you still walk among the living. The book is written entirely from the perspective of someone struggling to survive in a world overrun by the undead. Each chapter begins with graphic art and a “field exercise” that uses a story from this world to illustrate an ethical problem. By considering moral controversies through the unfamiliar context of a zombie apocalypse, the morally irrelevant factors that get in the way of resolving these controversies are removed and you can better answer questions such as: · Do we have a moral obligation to help those less fortunate than ourselves? · Is it ever morally permissible to intentionally kill an innocent person? · Are non-rational but sentient beings morally considerable? Equipped with further

reading sections and overviews of the theories that you would usually cover in an introductory Ethics course, this one-of-a-kind primer critically evaluates different procedures for moral action that you can use not only to survive but flourish in an undead world.

Traversing a vivid landscape, from sunblasted hills and canyons to the nighttime streets of America’s greatest cities, some of Louis L’Amour’s most compelling fiction was set in his own time—whether in the naked electric glare of boxing rings where men go head-to-head with their dreams and demons in an underworld rife with corruption, or along freight docks where laborers toil to earn just enough to get by, or in the penthouses of the rich and arrogant who calculate the odds of how to get even more. Here are tales of innocents caught in the schemes of criminals, detectives hunting down truths that hide more lies, gamblers and beauties, wiseguys and cops. Here is a world populated by the kinds of people who risk their lives to right a wrong, make a buck, or save a friend. A war veteran makes a journey to visit the man who saved his life in Korea. Instead he uncovers a killing and finds his own heroic cause.... Confronted with an easy chance to steal, an honest man gives in to temptation—and finds himself ensnared in a web of blackmail and violence.... They don't call him Caution Jones for nothing. An ace pilot, ever since his barnstorming father was killed in an air stunt, Jones has stuck strictly to business—as the no-nonsense general manager of Trans-Continental Airlines. But he's about to find that, sometimes, if you want to get anywhere, you have to throw caution to the wind. The race is on for a monster contract: the US Postal Service. But to get it, Trans-Continental will have to circle the globe and beat its top competitor to the prize. And there's only one pilot with the skill to do it: Caution Jones. He'll have to dust off his wings and soar to heights even his father never dreamed of. The wild blue yonder has never been wilder as Jones discovers that the competition will go to any length to bring his plane down. But an even greater challenge sits in his own cockpit—his co-pilot. She's blonde, she's brazen, and she just might get Caution Jones to take the biggest risk of all. Includes the aviation adventure “Boomerang Bomber,” in which a former US Army officer undertakes a mission for the Chinese only to end up in the crosshairs of Japan's Imperial military. In a world of double- and triple-crosses, this is one conflict that can only be settled in battle in the sky. Valentine's Exile

Once upon a time, science fiction was only in the future. It was the stuff of drive-ins and cheap double-bills. Then, with the ever-increasing rush of new, society-altering technologies, science fiction pushed its way to the present, and it busted out of the genre ghetto of science fiction and barged its way into the mainstream. What used to be mere fantasy (trips to the moon? Wristwatch radios? Supercomputers capable of learning?) are now everyday reality. Whether nostalgic for the future or fast-forwarding to the present, The Sci-Fi Movie Guide: The Universe of Film from Alien to Zardoz covers the broad and widening range of science-fiction movies. From the trashy to the epic, from the classics to today's blockbusters, this cinefile's guidebook reviews nearly 1,000 of the biggest, baddest, and brightest from every age and genre of cinematic and TV science fiction. You'll find more than just Star Wars, Star Trek, and Transformers, with reviews on many overlooked and under-appreciated gems and genres, such as • Monsters! Pacific Rim, Godzilla, The Thing, Creature from the Black Lagoon • Superheroes: Thor, Iron Man, X-Men, The Amazing Spider-man, Superman • Avant-garde masterpieces: Solaris, 2001, Brazil • and many, many more categories and movies!!
