Finding Keepers: The Monster Guide to Hiring and Holding the World's Best Employees

"Profoundly necessary." —Michelle Alexander, New York Times columnist and author of *The New Jim Crow* In the eloquent tradition of Bryan Stevenson's *Just Mercy*, an award-winning leader in the movement to end mass incarceration takes on the vexing problem of violent crime Although over half the people incarcerated in America today have committed violent offenses, the focus of reformers has been almost entirely on nonviolent and drug offenses. Danielle Sered's brilliant and groundbreaking *Until We Reckon* steers directly and unapologetically into the question of violence, offering approaches that will help end mass incarceration and increase safety. Widely recognized as one of the leading proponents of a restorative

approach to violent crime, Sered asks us to reconsider the purposes of incarceration and argues persuasively that the needs of survivors of violent crime are better met by asking people who commit violence to accept responsibility for their actions and make amends in ways that are meaningful to those they have hurt—none of which happens in the context of a criminal trial or a prison sentence. Sered launched and directs Common Justice, one of the few organizations offering alternatives to incarceration for people who commit serious violent crime and which has produced immensely promising results. Critically, Sered argues that the reckoning owed is not only on the part of those who have committed violence, but also by our nation's overreliance on incarceration to produce safety—at great cost to communities, survivors, racial equity, and the very fabric of our democracy.

Find Success in Nursing School! Getting The Most From Nursing School presents a roadmap to guide talented men and women along their journey from considering nursing as a profession to their first position as a registered nurse. This exceptional resource provides the necessary guidance to ensure that students get the most from their education and become excellent care providers, policymakers, educators, and researchers and achieve their goal of improving the health and well-being of others. Getting The Most From Nursing School is written by a doctorally prepared nurse, researcher, and professor and can be distinguished by its evidence-based information, its anecdotes, and its empirically grounded recommendations from nurses who have decades of experience in both clinical practice and as educators. Sample chapters include: Why become a nurse? Nursing school is toughgetting through the classes Surviving and succeeding in clinical Preparing for success on the NCLEX

Many feminists grapple with the problem of hyper-incarceration in the United States, and yet commentators on gender crime continue to assert that criminal law is not tough enough. This punitive impulse, prominent legal scholar Aya Gruber argues, is dangerous and counterproductive. In their quest to secure women’s protection from domestic violence and rape, American feminists have become soldiers in the war on crime by emphasizing white female victimhood, expanding the power of police and prosecutors, touting the problem-solving power of incarceration, and diverting resources toward law enforcement and away from marginalized communities. Deploying vivid cases and unflinching analysis, *The Feminist War on Crime* documents the failure of the state to combat sexual and domestic violence through law and punishment. Zero-tolerance anti-violence law and policy tend to make women less safe and more fragile. Mandatory arrests, no-drop prosecutions, forced separation, and incarceration embroil poor women of color in a criminal justice system that is historically hostile to them. This carceral approach exacerbates social inequalities by diverting more power and resources toward a fundamentally flawed criminal justice system, further harming victims, perpetrators, and communities alike. In order to reverse this troubling course, Gruber contends that we must abandon the conventional feminist wisdom, fight violence against women without reinforcing the American prison state, and use criminalization as a technique of last—not first—resort.

In a concise, compelling argument, one of the founders and most influential advocates of the law and economics movement divides the subject into two separate areas, which he identifies with Jeremy Bentham and John Stuart Mill. The first, Benthamite, strain, "economic analysis of law," examines the legal system in the light of economic theory and shows how economics might render law more effective. The second strain, law and economics, gives equal status to law, and explores how the more realistic, less theoretical discipline of law can lead to improvements in economic theory. It is the latter approach that Judge Calabresi advocates, in a series of eloquent, thoughtful essays that will appeal to students and scholars alike.

Developed in partnership with the National Ski Patrol, *Outdoor Emergency Care: A Patroller's Guide to Medical Care*, Sixth Edition, is designed to prepare first responders to handle any medical situation in the outdoor environment, during all seasons. The Sixth Edition features: A straightforward, consistent patient assessment process. The patient assessment process is presented in the same way patients are assessed in the health care system. Flowcharts are provided throughout the Patient Assessment chapter to keep the reader focused on each step of the process. Up-to-date content. As you read through each chapter, you will find new information that is current with present prehospital patient care. Subject matter that meets and, in many cases, exceeds the National Emergency Medical Responder criteria. Information unique for ski and bicycle patrollers, including extrication, is included. This material is presented in a format that combines the disciplines of

urban EMS and wilderness medical rescue. Continuous case studies. A continuous case study is included in each chapter to encourage critical thinking and application of the information as readers progress through the chapter. End-of-chapter review questions. The review questions included at the end of each chapter allow students to evaluate the knowledge they have gained while reading the chapter. Focus on learning objectives. Specific objectives listed at the beginning of each chapter tell students at the outset what they are expected to learn as they move through the chapter.
