The Untold Story of Everything Digital: Bright Boys, Revisited celebrates the 70th anniversary (1949-2019) of the world "going digital" for the very first time—real-time digital computing's genesis story. That genesis story is taken from the 2010 edition of Bright Boys: The Making of Information Technology, 1938-1958, and substantially expanded upon for this special, anniversary edition. Please join us for the incredible adventure that is The Untold Story of Everything Digital, when a band of misfit engineers, led by MIT's Jay Forrester and Bob Everett, birthed the digital revolution. The bright boys were the first to imagine an electronic landscape

of computing machines and digital networks, and the first to blaze its high-tech trails.

Adam Sandler movies, HBO's *Entourage*, and such magazines as *Maxim* and *FHM* all trade in and appeal to one character the modern boy-man. Addicted to video games, comic books, extreme sports, and dressing down, the boy-man would rather devote an afternoon to *Grand Theft Auto* than plan his next career move. He would rather prolong the hedonistic pleasures of youth than embrace the self-sacrificing demands of adulthood. When did maturity become the ultimate taboo? Men have gone from idolizing Cary Grant to aping Hugh Grant, shunning marriage and responsibility well into their twenties and thirties. Gary Cross, renowned cultural historian, identifies the boy-man and his habits, examining the attitudes and practices of three generations to make sense of this gradual but profound shift

in American masculinity. Cross matches the rise of the American boy-man to trends in twentieth-century advertising, popular culture, and consumerism, and he locates the roots of our present crisis in the vague call for a new model of leadership that, ultimately, failed to offer a better concept of maturity. Cross does not blame the young or glorify the past. He finds that men of the "Greatest Generation" might have embraced their role as providers but were confused by the contradictions and expectations of modern fatherhood. Their uncertainty gave birth to the Beats and men who indulged in childhood hobbies and boyish sports. Rather than fashion a new manhood, baby-boomers held onto their youth and, when that was gone, embraced Viagra. Without mature role models to emulate or rebel against, Generation X turned to cynicism and sensual intensity, and the media fed on this longing, transforming a life stage into a highly desirable lifestyle. Arguing that contemporary American culture undermines both conservative ideals of male maturity and the liberal values of community and responsibility, Cross concludes with a proposal for a modern marriage of personal desire and ethical adulthood.

Rhino-B is a brash, but sweet guy. Stag-B is a calm and scholarly adventurer. Together these two young beetles make up the Bug Boys, best friends who spend their time exploring the world of Bug Village and beyond, as well as their own - sometimes confusing and complicated - thoughts and feelings. In their first adventure, the Bug Boys travel through spooky caves, work with a spider to found a library, save their town's popular honey supply from extinction, and even make friends with ferocious termites! What challenges will these two earnest beetles

face? Whatever it is, you can be sure that Rhino-B and Stag-B will face it together -- with the power of friendship behind them.

Everything has a beginning. None was more profound—and quite as unexpected—than Information Technology. Here for the first time is the untold story of how our new age came to be and the bright boys who made it happen. What began on the bare floor of an old laundry building eventually grew to rival in size the Manhattan Project. The unexpected consequence of that journey was huge---what we now know as Information Technology. For sixty years the bright boys have been totally anonymous while their achievements have become a way of life for all of us. “Bright Boys” brings them home. By 1950 they’d built the world’s first real-time computer. Three years later they one-upped themselves when they switched on the world’s first digital network. In 1953 their work was met with incredulity and completely overlooked. By 1968 their work was gospel. Today, it’s the way of the world. Special Foreword by Jay W. Forrester Includes notes by chapter, bibliography, index, and portfolio of archival photography. Tom Green talks about his book in a recent video available on YouTube.

Townsend Harris High School in Manhattan was no ordinary high school. Named for the man who brought free higher education to New York City, students like Ira Gershwin, Yip Harburg, Adam Clayton Powell, Jr., Herman Wouk, Jonas Salk, and three future Nobel Laureates commuted from all five boroughs of the city in order to attend.

Millions of gifted children are failing to reach their potential—something Dr. Sylvia Rimm calls underachievement syndrome. Drawing on both clinical research and years of experience counseling families, Dr. Rimm has developed a “Trifocal Model” to help parents and teachers work together to get students back on track. It is effective for a wide range of students, from preschool through college. Dr. Rimm's practical, six-step program provides everything you need to know to turn your child or student's underachievement into success.
