Mass customization (MC) has been hailed as a successful operations strategy across manufacturing and service industries for the past three decades. However, the wider implications of using MC approaches in the broader industrial and economic environment are not yet clearly understood. *Mass Customization: Engineering and Managing Global Operations* presents emerging research on the role of MC and personalization in today's international operations context. The chapters cover MC in the context of global industrial economics and operations. Moreover, the book discusses MC topics that are relevant to the manufacturing and service sectors, such as: • product platforms; • learning curve modeling; • additive manufacturing; and • service customization. Case studies in manufacturing (e.g., apparel and transportation) and services (e.g., banking and virtual worlds) are also included. *Mass Customization: Engineering and Managing Global Operations* is a valuable text for mass customization

researchers and practitioners. Researchers will find a selection of chapters prepared by internationally renowned authors, comprising most of their recent research in MC. Engineering professionals will be drawn by the vivid discussion of operational aspects and methods of MC, as well as by the selection of cases illustrating their practical application.

Handbook Of Research In Mass Customization And Personalization (In 2 Volumes) - Volume 1: Strategies And Concepts; Volume 2: Applications And Cases

A growing heterogeneity of demand, the advent of 'long tail markets', exploding product complexities, and the rise of creative consumers are challenging companies in all industries to find new strategies to address these trends. Mass customization (MC) has emerged in the last decade as the premier strategy for companies in all branches of industry to profit from heterogeneity of demand and a broad scope of other customer demands. The research and practical experience collected in this book presents the latest thinking on how to make mass customization work. More than 50 authors from academia and management debate on what is viable now, what did not work in the past, and what lurks just below the radar in mass customization, personalization, and related fields. Edited by two leading authorities in the field of mass customization, both volumes of the book discuss, among many other themes, the latest research and insights on customization strategies, product design for mass customization, virtual models, co-design toolkits, customization value measurement, open source architecture, customization communities, and MC supply chains.

Through a number of detailed case studies, prominent examples of mass customization are explained and evaluated in larger context and perspective.

"? e-learning has just moved from something that was an experiment-a very healthy experiment three or four years ago-to main line. I think we're at the very early stages of really understanding the power it has. It's no longer a question of whether it will be effective or how much it can increase productivity; it's just a question of degree." John Chambers CEO, Cisco Systems "For those who view the training function as a strategic service, this book deftly updates detailed consultative models for the realities of post dot-com e-learning . For those that do not view the training function as a strategic service, this book will change your mind. Both politically and technologically savvy, Morrison's breadth of understanding coupled with what can only be called humanity, makes this worthwhile and even exciting. My advice would be to read it with a colleague so you do not have to waste time recounting it before you get going." Clark Aldrich, Co-founder of SimuLearn "Don Morrison provides a clear insight into where the maturing e-learning world is headed and how to develop a

strategy to get there successfully. True to the title, he delivers pragmatic advice, appropriate cautions, and asks and answers some of the tough questions often missed during implementation. Don shares my passion for the very real and pending promise of personalized learning for all adults, and articulates this clearly for all who read this book. Highly recommended reading." Time Management with SAP ERP HCM

SAP ERP modules are notoriously hard to configure and use effectively without a lot of practice and experience. But as SAP ERP Financial Accounting and

Controlling: Configuration and Use Management shows, it doesn't have to be so difficult. The book takes a systematic approach that leads SAP Financial Accounting and Controlling (FICO) users step by step through configuring and using all the program's facets. This approach makes configuration complexities manageable. The book's author—SAP expert, trainer, and accountant Andrew Okungbowa—ensures that both you and your end users are up and running quickly and confidently with FICO. He also provides sound and tested procedures that ensure your implementation works without error. SAP ERP Financial Accounting and Controlling: Configuration and Use Management is in fact the most comprehensive and easy-to-follow SAP FICO configuration book in the market. It incorporates a hands-on approach, with hundreds of screen shots and practical examples, that allows a person without prior configuration training to make SAP FICO ready for use in the enterprise. You'll find that you don't need to be a rocket scientist to grasp the concepts explained and apply them to your work—even when the finances are complicated, such as with the ins and outs of taxes, currency conversions, or special general ledger entries such as down payments or bills of exchange. Providing an in-depth coverage of both configuration and end user procedures, the book covers most aspects of the SAP FICO certification syllabus—SAP's view of the module's key tasks and procedures—including: Configuring and using the general ledger and accounts payable and receivable screens Configuring and completing closing procedures, asset accounting, and financial reporting Configuring global settings and enterprise variables
