Church Leadership

A distinguished work by one of America's leading scholars of higher education,

Places of Inquiry explores one of the major issues in university education today: the relationship among research, teaching, and study. Based on cross-national research on the university systems of Germany, Britain, France, the United States, and Japan—which was first reported in the edited volume *The Research Foundations of Graduate Education* (California, 1993)—this book offers in-depth comparative analysis and draws provocative conclusions about the future of the research-teaching-study nexus. With characteristic clarity and vision, Burton R. Clark identifies the main features and limitations of each national system: governmental and industrial dominance in Japan, for example, and England's collegiate form of university. He examines the forces drawing research, teaching, and study apart and those binding them together. Highlighting the fruitful integration of teaching and research in the American graduate school, Clark decries the widely held view that these are antithetical activities. Rather, he demonstrates that research provides a rich basis for instruction and learning. Universities, he maintains, are places of inquiry, and the future lies with institutions firmly grounded in this belief.

Intimacy with the Almighty

Christianity Today 1994 Critics Choice Award winner 1993 Christian Booksellers Association/Europe Book of the Year Award winner People today reject Christianity not because they think it is false but because they believe it is irrelevant. John Stott knows otherwise. In this book he challenges all of us to move with the times while standing firmly on the truth of God's Word. "To be 'contemporary' is to live in the present," Stott writes. "To be a 'contemporary Christian,' however, is to ensure that our present is enriched both by our knowledge of the past and by our expectation of the future." The challenge, then, is to be both conservative and radical--conservative in guarding God's revelation and radical in applying that revelation to the realities of the contemporary world: space travel, homelessness, genetic engineering, pollution, war, health care, gang violence, education and more. Opening our eyes to the Word and the world, Stott shows how Christianity can speak effectively and relevantly to the contemporary world. He includes chapters on the human paradox, authentic freedom, mind and emotions, evangelism and social action, the pastoral ideal and dimensions of renewal. For those familiar with Stott, *The Contemporary Christian* is a "must-read" book. For those who have not yet benefited from his insight and passion, *The Contemporary Christian* affords the perfect opportunity to get acquainted with one of the most widely read and respected Christian thinkers at work today.

Building World-Class Universities

This book outlines the development currently underway in the technology of new media and looks further to examine the unforeseen effects of this phenomenon on our culture, our philosophies, and our spiritual outlook. The digital revolution is something fundamentally different from simply the introduction of yet another medium to our culture: it marks a paradigm shift in our relation to all media, to all our senses, all our expressions. The new media are transforming our definitions of culture and knowledge and transcending barriers in ways that will have lasting implications for generations to come.

Exclusion and Forced Migration in Central America

Corpus Christi quod est Ecclesia

Reveals how your relationship with Christ will help you live in harmony with God's plan.

English for Specific Purposes

This book marks a critical contribution to the intercultural dialogue about immigration. Each year, thousands of Central Americans leave their countries and walk across Mexico, seeking to reach the United States. The author explores the dispossession process that drives these migrants from their homes and argues that they are caught in a kind of trap: forced to emigrate, but impeded to immigrate. This trap is discussed empirically through the analysis of immigration policies implemented by the United States government and ethnographic fieldwork carried out in some of "albergues" (shelters).

Theory of the Novel

Pulling Down Strongholds

"A compelling fictional personage-by turns arrogant, funny, pompous, lewd, self-absorbed and self-deluding."—Michiko Kakutani, *New York Times* An audacious “biography” of the ex-president of Cuba told in Castro’s own outrageous, bombastic voice. Prize-winning author and journalist Norberto Fuentes was once a revolutionary: a writer with privileged access to Fidel Castro’s inner circle during some the most challenging years of the revolution. But in the late 1990s, as the regime began sending its oldest comrades to the firing squad, he became *A Man Who Knew Too Much*. Escaping a death sentence and now living in exile, Fuentes has written a brilliant, satirical, and utterly captivating “autobiography” of the Cuban leader—in Fidel’s own arrogant and seductive language—discussing everything from Castro’s early sexual experiences in Birán to his true feelings about Che Guevara and his philosophy on murder, legacy, and state secrets. Critics have long admired Fuentes’s writing; one U.S. article called him “Norman Mailer’s Cuban pen pal.” Akin to Gertrude Stein’s *The Autobiography of Alice B. Toklas*, or Edmund Morris’s *Dutch*, this wickedly entertaining, true-to-life masterpiece is as imaginative and outsized as Castro himself.

Avanzando Hacia la Madurez Espiritual

Spiritual Leadership

Within higher education, world-class universities are commonly regarded as elite research universities and play a critical role in developing a nation's competitiveness in the global knowledge economy. An increasing number of countries, regions and higher education institutions in different parts of the world

have joined the same battle for academic excellence. While emerging countries and their universities make every effort to enhance their capacity and boost their research performance, the academic superpowers endeavour to maintain - if not further improve- their global positions. “Building World-Class Universities: Different Approaches to a Shared Goal” intends to provide an in-depth picture of different approaches in pursuit of the shared goal of developing academic excellence, and to reflect the current trends in this field. Divided into three parts, the book covers:

- building world-class universities from a national/regional perspective,
- managing world-class universities from an institutional perspective, and
- measuring world-class universities from a ranking/indicator perspective.

This book not only represents a contribution to the ongoing discussion on the topic of building world-class universities, but can be seen as a continuation of the previous three volumes on this topic - “World-Class Universities and Ranking: Aiming beyond Status”, “The World-Class University as Part of a New Higher Education Paradigm: From Institutional Qualities to Systemic Excellence”, and “Paths to a World-Class University: Lessons from Practices and Experiences”. All four books will be useful readings for students and academics in higher education generally, in addition to policy makers and informed practitioners.

For researchers, policy makers, tourist boards, and tourism analysts within the industry and the financial sector. Annotation copyrighted by Book News, Inc., Portland, OR

Understanding New Media

The Order of Learning considers the problems facing higher education by focusing on main underlying factors: the relationship of higher education to government, academic freedom, and the responsibilities of the academic profession, among others. Edward Shils argues that higher education has a central role in society, and that distractions, such as pressures from government, disinterest of students and faculty in education, and involvement of institutions of higher learning in social questions, have damaged higher education by deflecting it from its commitment to teaching, learning, and research. Shils believes that the modern university must be steadfast in its commitment to the pursuit of truth, the education of students, and the provision of research. Universities should not be all things to all people. On one hand, the academic community must understand the essential mission of the university and resist distractions. On the other, government must provide the

necessary support to higher education, even when the immediate "pay-off" is not self-evident. This book provides a refreshing new perspective precisely by taking a traditional stance on the role of higher education in modern society. It includes carefully researched and elegantly written essays on many of the central issues facing education today. This work will be of great interest to educators and students alike, as well as those interested in the future of higher education in the United States.

More Than a Carpenter

This book charts the development of capitalism in the post-war period and describes the challenges that the system has faced since 1945. It describes the measures that were taken to deal with the post-war slump and the ways in which most capitalist economies achieved steady growth and affluence in the 1950s and 1960s. It goes on to show how this boom was undermined by unemployment ensued.

The Adventures of the Ingenious Alfanhui

The New Science of Swimming

This book provides an empirically grounded, theoretically informed account of recent changes to the youth justice system in England and Wales, focusing on the introduction of elements of restorative justice into the heart of the criminal justice system, and the implementation of referral orders and youth offender panels. Taken together, this amounts to the most radical overhaul of the youth justice system in the last half century, fundamentally changing the underlying values of the system away from an 'exclusionary punitive justice' and towards an 'inclusionary restorative justice'. The book explores the implications of these changes by using the lens of a detailed study of the implementation of referral orders and youth offender panels to explore wider issues about youth justice policy and the integration of restorative justice principles. It draws upon the findings of an in-depth study of the pilots established prior to the national rollout of referral orders in April 2002. The book will be essential reading not only for those involved

in the task of implementing the new youth justice, but others with an interest in the criminal justice system and in restorative justice who need to know about the far reaching reforms to the youth justice system and their impact.

The Autobiography of Fidel Castro

This report finds that, when compared internationally, England achieves a high rate of student retention. However the variation between retention rates of different institutions and the worsening of some institution's continuation rates shows that there is scope for further improvement. This will be increasingly important as access to further education is broadened, bringing in students who are likely to need more support. Amongst the recommendations are: the monitoring of retention at student, faculty and course level; the use of early-leaver surveys when problems are identified; more positive student support that emphasises ways to improve grades; identification of students eligible for Disabled Students' Allowances; the adoption of good practice from other institutions.

Creative Bible Lessons from the Life of Christ

Forty years in the making, "Giuseppe Terragni: Transformations, Decompositions, Critiques" documents and investigates two of Italian rationalist architect Giuseppe Terragni's masterworks: the Casa del Fascio (1933-36) and the Casa Giuliani-Frigerio (1939-40), both in Como. This far-reaching study -- illustrated with more than five hundred original architectural diagrams and archival photographs -- employs what Eisenman calls critical and textual reading of both buildings. He attempts to broaden the definition of the formal from a narrow aesthetic and compositional view to include first the conceptual and then the textual. It is through this idea of the textual that Eisenman begins to define an idea of the critical in architecture. Eisenman's methodology is wholly removed from traditional approaches -- social, historical, aesthetic, functional. Instead, the various articulations and openings on the facades constitute a set of marks, notations that provide the basis for his analysis. In the Casa del Fascio, for example, each of the four sequential design schemes records the previous state, encoding the process of transformation in the final building. In the Casa Giuliani-Frigerio it is instead the process of decomposition that generates the facades. Also included in the book are an essay by Terragni and a critique by Manfredo Tafuri. In the end, it is the dual protagonists -- the architect and the author -- who together establish a new theoretical and analytical framework.

The World-class University and Ranking

Since the 60's there has been an increasing demand for the teaching of English for specialized purposes (ESP), a major concern in both the English and non-English speaking world. The purpose of this book is to present readers with an overview of the underlying framework of ESP and to provide ideas about the structure of an English for Science and Technology course. Issues such as the different stages in the development of ESP research and their influence on teaching materials, the main linguistic features of scientific prose, genre analysis and future avenues for interdisciplinary research are dealt with.

Staying the course

This report describes how tertiary education contributes towards developing a country's capacity to participate in an increasingly knowledge-based world economy. It also investigates policy options which have the potential to enhance

economic growth and reduce poverty. It draws on ongoing World Bank research into the dynamics of knowledge-based economies to explore how countries can adapt their higher education systems to meet the combination of new and old challenges of international market forces.
