Sharon Olds completes her cycle of family poems in a book at once intense and harmonic, playful with language, and rich with a new self-awareness and sense of irony. The opening poem, with its sequence of fearsome images of war, serves as a prelude to poems of home in which humor, anger, and compassion sing together with lyric energy—sometimes comic, sometimes filled with a kind of unblinking forgiveness. These songs of joy and danger—public and private—illuminate one another. As the book unfolds, the portrait of the mother goes through a moving revisioning, leading us to a final series of elegies of hard-won mourning. One Secret Thing is charged throughout with Sharon Olds’s characteristic passion, imagination, and poetic power. The doctor on the phone was young, maybe on his first rotation in the emergency room. On the ancient boarding-school radio, in the attic hall, the announcer had given my boyfriend’s name as one of two brought to the hospital after the sunrise service, the egg-hunt, the crash—one of them critical, one of them dead. I was looking at the stairwell banisters, at their lathing, the necks and knobs like joints and bones, the varnish here thicker here thinner—I had said Which one of them died, and now the world was an ant’s world: the huge crumb of each second thrown, somehow, up onto my back, and the young, tired voice said my fresh love’s name. from “Easter 1960” From the Trade Paperback edition.

Building on the tradition of Little Bee, Chris Cleave again writes with elegance, humor, and passion about friendship, marriage, parenthood, tragedy, and redemption. What would you sacrifice for the people you love? KATE AND ZOE met at nineteen when they both made the cut for the national training program in track cycling—a sport that demands intense focus, blinding exertion, and unwavering commitment. They are built to exploit the barest physical and psychological edge over equally skilled rivals, all of whom are fighting for the last one tenth of a second that separates triumph from despair. Now at thirty-two, the women are facing their last and biggest race: the 2012 Olympics. Each wants desperately to win gold, and each has more than a medal to lose. Kate is the more naturally gifted, but the demands of her life have a tendency to slow her down. Her eight-year-old daughter Sophie dreams of the Death Star and of battling alongside the Rebels as evil white blood cells ravage her personal galaxy—she is fighting a recurrence of the leukemia that nearly killed her three years ago. Sophie doesn't want to stand in the way of her mum's Olympic dreams, but each day the dark forces of the universe seem to be massing against her. Devoted and self-sacrificing Kate knows her daughter is fragile, but at the height of her last frenzied months of training, might she be blind to the most terrible prognosis? Intense, aloof Zoe has always hovered on the periphery of real human companionship, and her compulsive need to win at any cost has more than once threatened her friendship

with Kate—and her own sanity. Will she allow her obsession, and the advantage she has over a harried, anguished mother, to sever the bond they have shared for more than a decade? Echoing the adrenaline-fueled rush of a race around the Velodrome track, *Gold* is a triumph of superbly paced, heart-in-throat storytelling. With great humanity and glorious prose, Chris Cleave examines the values that lie at the heart of our most intimate relationships, and the choices we make when lives are at stake and everything is on the line.

The Ethanol Papers

With *No Man's River*, Farley Mowat has penned his best Arctic tale in years. This book chronicles his life among Metis trappers and native people as they struggle to eke out a living in a brutal environment. In the spring of 1947, putting the death and devastation of WWII behind him, Mowat joined a scientific expedition. In the remote reaches of Manitoba, he witnessed an Eskimo population ravaged by starvation and disease brought about by the white man. In his efforts to provide the natives with some of the assistance that the government failed to provide, Mowat set out on an arduous journey that collided with one of nature's most arresting phenomena—the migration of the Arctic's caribou herds. Mowat was based at Windy Post with a Metis trapper and two Inuit children. A young girl, known as Rita, is painted with special vividness—checking the trap lines with the men, riding atop a sled, smoking a tiny pipe. Farley returns to the North two

decades later and discovers the tragic fate that befell her. Combining his exquisite portraits with awe-inspiring passages on the power of nature, No Man's River is another riveting memoir from one of North America's most beloved writers.

Since its formation in 1932, Saudi Arabia has been ruled by two interdependent families. The Al Sa'uds control politics and the descendants of Ibn Abd al-Wahhab impose Wahhabism—a violent, fanatical perversion of the pluralistic Islam practiced by most Muslims. Stephen Schwartz argues that Wahhabism, vigorously exported with the help of Saudi oil money, is what incites Palestinian suicide bombers, Osama bin Laden, and other Islamic terrorists throughout the world. Schwartz reveals the hypocrisy of the Saudi regime, whose moderate facade conceals state-sponsored repression and terrorism. He also raises troubling questions about Wahhabi infiltration of America's Islamic community and about U.S. oil companies sanitizing Saudi Arabia's image for the West. This sharp analysis and eye-opening expose illuminates the background to the September 11th terrorist attacks and offers new approaches for U.S. policy toward its closest ally in the Middle East.

In recent years, a number of textbooks on forensic science have been published, most of them directed to two groups, viz. the students of forensic science, and the customers so to say, (prosecutors, police officers, judges, defense lawyers). In this book, while covering fundamental concepts, we try to go a little further and address also active workers in the field of forensic chemistry. This is mainly achieved by relatively numerous literature references. We hope that they may assist the forensic chemist in penetrating further into the subjects covered in this volume. At the end of most chapters there are examples of actual cases handled at the Swedish National Laboratory of Forensic Science. Many of these cases could, no doubt, have been investigated in greater detail, but they reflect the compromises often necessary for achieving a reasonable turnover. Some parts of the book are quite strongly colored by the personal opinions of the authors. We felt that these passages will give a little more life to the text than in other treatises of a more objective, but possibly duller character. The authors welcome all constructive criticism which will help to improve the book, should there be a second edition.

the noise of petroleum advocates. The Ethanol Papers is a rough-and-tumble, no holds-barred crystallization of the ethanol vs. gasoline conflict. Written in plain jargon, non-scientists, non-academics, and politicians alike will find it compelling. Yet this is no "Idiots Guide to Biofuels" or "Alt Fuels for Dummies." Rather, The Ethanol Papers is the most in-depth and complete explanation of the ethanol-oil problem now available, targeted for smart people who demand facts.

One Secret Thing

Though the city of St. Louis is located on the Missouri side of the Mississippi River, for the railroads, the St. Louis Gateway extends into Illinois, north and south along both sides of the river. Two factors conspired against St. Louis's aspiration to become the preeminent rail center of the 19th-century American Midwest: there was no bridge across the Mississippi, and Missouri's loyalty to the Union during the Civil War was suspect. Chicago beat out St. Louis to attain the region's top railroad billing. Fast forward to the 1970s, when the Gateway Arch, dedicated in 1968, redefined the St. Louis riverfront and when the St. Louis Union Station closed to rail service. The 1970s was a decade of railroad debuts—Burlington Northern, Illinois Central Gulf, Family Lines—and a decade of railroad demises—Rock Island and Frisco. It signaled the end of a century of rail domination of the American transportation scene.
