Experiments which in previous years were made with ornamental plants have already afforded evidence that the hybrids, as a rule, are not exactly intermediate between the parental species. With some of the more striking characters, those, for instance, which relate to the form and size of the leaves, the pubescence of the several parts, etc., the intermediate, indeed, is nearly always to be seen; in other cases, however, one of the two parental characters is so preponderant that it is difficult, or quite impossible, to detect the other in the hybrid. from 4. The Forms of the Hybrid One of the most influential and important scientific works ever written, the 1865 paper Experiments in Plant Hybridisation was all but ignored in its day, and its author, Austrian priest and scientist GREGOR JOHANN MENDEL (1822-1884),

died before seeing the dramatic long-term impact of his work, which was rediscovered at the turn of the 20th century and is now considered foundational to modern genetics. A simple, eloquent description of his 1856-1863 study of the inheritance of traits in pea plants Mendel analyzed 29,000 of them this is essential reading for biology students and readers of science history. Cosimo presents this compact edition from the 1909 translation by British geneticist WILLIAM BATESON (1861-1926).

Lakhmir Singh's Science is a series of books which conforms to the NCERT syllabus. The main aim of writing this series is to help students understand difficult scientific concepts in a simple manner in easy language. The ebook version does not contain CD.

Lakhmir Singh's Science for Class 8

First days can be killer. Kat Harper's first day at her new job doesn't go as planned

when a runaway cat leads her to a dead body outside of her office building. Things only get worse when Sadie Cramer's death is deemed a homicide, and Kat has to wonder what she's gotten herself into by accepting this position. Much to Kat's—and her police detective boyfriend's—dismay, she soon encounters plenty of people with motive for murder. From an employee fired right before the Thanksgiving holiday, to a grown son ruthlessly cut out of an inheritance, it seems the late career counselor angered several people shortly before her passing. And now it's up to the office building's newly hired amateur sleuth to figure out exactly who is guilty . . . preferably without turning into a victim herself. All of the Cozy Cat Caper Mystery books can be enjoyed as standalones but will be better appreciated as part of the series. The books are light, fun cozy mysteries featuring an animal-loving female amateur sleuth, lovable and not-so-lovable quirky characters, and a page-turning mystery that needs solving. None of the books include cliffhangers, bad language, or graphic scenes. For fans of animal cozy mysteries, clean murder mystery series, fiction featuring cats, and whimsical women sleuths.

The Kilkenny Cat - Book Three

Once upon a time Cooper Holbrook was a champion, racking up buckles and buckle bunnies with ease. But the years have not been kind to the former bull rider, leaving him broke and broken until he doesn't recognize himself or his life anymore. Until Hannah Anderson, the mother of his former student Skeeter, swoops into his world to remind him of what he had and what he lost. And most of all, how strong the attraction he'd denied himself then still is between them. If you enjoy the hot cowboys written by Lorelei James, Lori Wilde, Mica Stone, Lora Leigh, Desiree Holt, Vivian Arend, Em Petrova, Becky McGraw, Elle James, Sable Hunter and the like, you have to read the Studs in Spurs! Champion was previously released by Samhain Publishing under the same title. This is a reissue, reedited and recovered but with no substantial changes to the story. The Breeder's Gazette

Integrating Timing Considerations to Improve Testing Practices synthesizes a

wealth of theory and research on time issues in assessment into actionable advice for test development, administration, and scoring. One of the major advantages of computer-based testing is the capability to passively record test-taking metadata—including how examinees use time and how time affects testing outcomes. This has opened many questions for testing administrators. Is there a trade-off between speed and accuracy in test taking? What considerations should influence equitable decisions about extended-time accommodations? How can test administrators use timing data to balance the costs and resulting validity of tests administered at commercial testing centers? In this comprehensive volume, experts in the field discuss the impact of timing considerations, constraints, and policies on valid score interpretations; administrative accommodations, test construction, and examinees' experiences and behaviors; and how to implement the findings into practice. These 12 chapters provide invaluable resources for testing professionals to better understand the inextricable links between effective time allocation and the purposes of high-stakes testing.
