### A Failed Empire

A Kirkus Reviews Best Children's Book NEW FROM 2018 SIBERT MEDALIST LARRY DANE BRIMNER! Here is the story of 19 men from the film industry who were investigated for suspected communist ties during the Cold War, and the 10--known

as the Hollywood Ten--who were blacklisted for standing up for their First Amendment rights and refusing to cooperate. World War II is over, but tensions between the communist Soviet Union and the US are at an all-time high. In America, communist threats are seen everywhere and a committee is formed in the nation's capital to investigate those threats. Larry Dane Brimner follows the story of 19 men--all from the film industry--who are summoned to appear before the House of Representatives Committee on Un-American Activities. All 19 believe that the committee's investigations into their political views and personal associations are a violation of their First Amendment rights. When the first 10 of these men refuse to give the committee the simple answers it wants, they are cited for contempt of Congress and blacklisted.

## **A Brief History of the Cold War**

"I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world."—Walt Whitman, "Song of Myself," *Leaves of Grass* The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, The American Yawp incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of The American Yawp will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before

chronicling the collision of Native Americans, Europeans, and Africans. The American Yawp traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, The American Yawp gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

## **Creating America , Grades 6-8**

During the Cold War, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between 1947 and 1967" by the *New York Times*, the book presents shocking evidence of the CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real contribution to popular understanding of the postwar period" (*The Wall Street Journal*), and its story of covert cultural efforts to win hearts and minds continues to be relevant today.

## **U.S. History**

Deterrence as a strategic concept evolved during the Cold War. During that period, deterrence strategy was aimed mainly at preventing aggression against the United States and its close allies by the hostile Communist power centers--the Union of Soviet Socialist Republics (USSR) and its allies, Communist China and North Korea. In particular, the strategy was devised to prevent aggression involving nuclear attack by the USSR or China. Since the end of the Cold War, the risk of war among the major powers has subsided to the lowest point in modern history. Still, the changing nature of the threats to American and allied security interests has stimulated a considerable broadening of the deterrence concept. *Post-Cold War Conflict Deterrence* examines the meaning of deterrence in this new environment and identifies key elements of a post-Cold War deterrence strategy and the critical issues in devising such a strategy. It further examines the significance of these findings for the U.S. Navy and Marine Corps. Quantitative and qualitative measures to support judgments about the potential success or failure of deterrence are identified. Such measures will bear on the suitability of the naval forces to meet the deterrence objectives. The capabilities of U.S. naval forces that especially bear on the deterrence objectives also are examined. Finally, the book examines the utility of models, games, and simulations as decision aids in improving the naval forces' understanding of situations in which deterrence must be used and in improving the potential success of deterrence actions.

One of the most significant industrial states in the country, with a powerful radical tradition, Pennsylvania was, by the early 1950s, the scene of some of the fiercest anti-Communist activism in the United States. Philip Jenkins examines the political and social impact of the Cold War across the state, tracing the Red Scare's reverberations in party politics, the labor movement, ethnic organizations, schools and universities, and religious organizations. Among Jenkins's most provocative findings is the revelation that, although their absolute numbers were not large, Communists were very well positioned in crucial Pennsylvania regions and constituencies, particularly in labor unions, the educational system, and major ethnic organizations. Instead of focusing on Pennsylvania's right-wing politicians (the sort represented nationally by Senator Joseph McCarthy), Jenkins emphasizes the anti-Communist activities of liberal politicians, labor leaders, and ethnic community figures who were terrified of Communist encroachments on their respective power bases. He also stresses the deep roots of the state's militant anti-Communism, which can be traced back at least into the 1930s.

## **The Oxford Handbook of Postwar European History**

War--or the threat of war--usually strengthens states as governments tax, draft soldiers, exert control over industrial production, and dampen internal dissent in order to build military might. The United States, however, was founded on the suspicion of state power, a suspicion that continued to gird its institutional architecture and inform the sentiments of many of its politicians and citizens through the twentieth century. In this comprehensive rethinking of postwar political history, Aaron Friedberg convincingly argues that such anti-statist inclinations prevented Cold War anxieties from transforming the United States into the garrison state it might have become in their absence. Drawing on an array of primary and secondary sources, including newly available archival materials, Friedberg concludes that the "weakness" of the American state served as a profound source of national strength that allowed the United States to outperform and outlast its supremely centralized and statist rival: the Soviet Union. Friedberg's analysis of the U. S. government's approach to taxation, conscription, industrial planning, scientific research and development, and armaments manufacturing reveals that the American state did expand during the early Cold War period. But domestic constraints on its expansion--including those stemming from mean self-interest as well as those guided by a principled belief in the virtues of limiting federal power--protected economic vitality, technological superiority, and public support for Cold War activities. The strategic synthesis that emerged by the early 1960s was functional as well as stable, enabling the United States to deter, contain, and ultimately outlive the Soviet Union precisely because the American state did not limit unduly the political, personal, and economic freedom of its citizens. Political scientists, historians, and general readers interested in Cold War history will value this thoroughly researched volume. Friedberg's insightful scholarship will also inspire future policy by contributing to our understanding of how liberal democracy's inherent qualities nurture its survival and spread.

Faced with an increasingly formidable anti-ship cruise missile threat from the Soviet Union in the early days of the Cold War, and with the recent memory of the kamikaze threat from World War II, the USN placed a great priority on developing air defence cruise missiles and getting them to sea to protect the fleet. The first of these missiles were sizable, necessitating large ships to carry them and their sensors, which resulted in the conversion of a mix of heavy and light cruisers. These ships, tasked with protecting carrier groups and acting as flagships, entered service from 1955 and served until 1980. The cruisers served in the front lines of the Cold War and many saw combat service, engaging in surface actions from Vietnam to the Persian Gulf. Complementing the conventionally-powered missile cruisers was a much smaller number of expensive nuclear-powered cruisers, including the Long Beach, the USN's largest-ever missile cruiser. Until replaced by the Ticonderoga and Burke classes of Aegis ships, the USN's 38 missile cruisers were the most capable and important surface combatants in the fleet and served all over the globe during the Cold War. Using specially commissioned artwork and meticulous research, this illustrated title explores the story of these cruisers in unparalleled detail, revealing the history behind their development and employment.

Film Criticism, the Cold War, and the Blacklist examines the long-term reception of several key American films released during the postwar period, focusing on the two main critical lenses used in the interpretation of these films: propaganda and allegory. Produced in response to the hearings held by the House Committee on Un-American Activities (HUAC) that resulted in the Hollywood blacklist, these films' ideological message and rhetorical effectiveness was often muddled by the inherent difficulties in dramatizing villains defined by their thoughts and belief systems rather than their actions. Whereas anti-Communist propaganda films offered explicit political exhortation, allegory was the preferred vehicle for veiled or hidden political comment in many police procedurals, historical films, Westerns, and science fiction films. Jeff Smith examines the way that particular heuristics, such as the mental availability of exemplars and the effects of framing, have encouraged critics to match filmic elements to contemporaneous historical events, persons, and policies. In charting the development of these particular readings, Film Criticism, the Cold War, and the Blacklist features case studies of many canonical Cold War titles, including The Red Menace, On the Waterfront, The Robe, High Noon, and Invasion of the Body Snatchers.

### **Inside the Cold War**

Heavily armed and formidable, guided missile cruisers formed the core of the Soviet Navy during the Cold War. From the last class of conventional Sverdlov-class cruisers through to increasingly complex and formidable missile cruisers, these ships ensured that NATO took the Soviet naval threat seriously. Soviet Cold War Guided Missile Cruisers covers all classes of these impressive warships, from the early Sverdlov through the Kynda, Kresta, Kara and Slava to the enormous Kirov classes. Together, these vessels marked the apogee of Soviet naval technology

and capability and they remain today the largest non-aircraft carrier warships built since 1945. Containing material previously only available in Russian and fully researched from specialist defence journals, this comprehensive volume examines the design, development, and intended role of these impressive, hi-tech warships, and recounts their dramatic operational history as NATO and Soviet warships faced off against each other during the long Cold War at sea.

### **Cold War & 1950s**

General Adams reflects on his experiences in the cold war, during which he served in both manned bombers and missile silos. He tells stories of famous and not-so-famous cold warriors, including some from the US Navy. Some stories are humorous; some stories are tragic. Having traveled extensively in Russia and some former Soviet Union states after retirement, General Adams tells us about his former adversaries, the Soviet cold warriors. In the process, he leaves no doubt about his respect for all who served so valiantly in the "strategic triad"-- the strategic command, the ICBM force, and the submarine Navy.

### **All the People**

The postwar period is no longer current affairs but is becoming the recent past. As such, it is increasingly attracting the attentions of historians. Whilst the Cold War has long been a mainstay of political science and contemporary history, recent research approaches postwar Europe in many different ways, all of which are represented in the thirty-five chapters of this book. As well as diplomatic, political, institutional, economic, and social history, The Oxford Handbook of Postwar European History contains chapters which approach the past through the lenses of gender, espionage, art and architecture, technology, agriculture, heritage, postcolonialism, memory, and generational change, and shows how the history of postwar Europe can be enriched by looking to disciplines such as anthropology and philosophy. The Handbook covers all of Europe, with a notable focus on Eastern Europe. Including subjects as diverse as the meaning of 'Europe' and European identity, southern Europe after dictatorship, the cultural meanings of the bomb, the 1968 student uprisings, immigration, Americanization, welfare, leisure, decolonization, the Wars of Yugoslav Succession, and coming to terms with the Nazi past, the essays in this Handbook offer an unparalleled coverage of postwar European history that offers far more than the standard Cold War framework. Readers will find self-contained, state-of-the-art analyses of major subjects, each written by an acknowledged expert, as well as stimulating and novel approaches to newer topics. Combining empirical rigour and adventurous conceptual analysis, this Handbook offers in one substantial volume a guide to the numerous ways in which historians are now rewriting the history of postwar Europe.

## **The Cold War in the Classroom**

This book is open access under a CC BY 4.0 license. This book explores how the socially disputed period of the Cold War is remembered in today's history classroom. Applying a diverse set of methodological strategies, the authors map the dividing lines in and between memory cultures across the globe, paying special attention to the impact the crisis-driven age of our present has on images of the past. Authors analysing educational media point to ambivalence, vagueness and contradictions in textbook narratives understood to be echoes of societal and academic controversies. Others focus on teachers and the history classroom, showing how unresolved political issues create tensions in history education. They render visible how teachers struggle to handle these challenges by pretending that what they do is 'just history'. The contributions to this book unveil how teachers, backgrounding the political inherent in all memory practices, often nourish the illusion that the history in which they are engaged is all about addressing the past

with a reflexive and disciplined approach.

## **America**

The shocking truth about the government's secret plans to survive a catastrophic attack on US soil—even if the rest of us die—is “a frightening eye-opener” (Kirkus Reviews) that spans the dawn of the nuclear age to today, and “contains everything one could possibly want to know” (The Wall Street Journal). Every day in Washington, DC, the blue-and-gold first Helicopter Squadron, codenamed “MUSSEL,” flies over the Potomac River. As obvious as the Presidential motorcade, most people assume the squadron is a travel perk for VIPs. They're only half right: while the helicopters do provide transport, the unit exists to evacuate high-ranking officials in the event of a terrorist or nuclear attack on the capital. In the event of an attack, select officials would be whisked by helicopters to a ring of secret bunkers around Washington, even as ordinary citizens were left to fend for themselves. “In exploring the incredible lengths (and depths) that successive administrations have gone to in planning for the aftermath of a nuclear assault, Graff deftly weaves a tale of secrecy and paranoia” (The New York Times Book Review) with details “that read like they've been ripped from the pages of a pulp spy novel” (Vice). For more than sixty years, the US government has been developing secret Doomsday strategies to protect itself, and the multibillion-dollar Continuity of Government (COG) program takes numerous forms—from its potential to evacuate the Liberty Bell from Philadelphia to the plans to launch nuclear missiles from a Boeing-747 jet flying high over Nebraska. Garrett M. Graff sheds light on the inner workings of the 650-acre compound, called Raven Rock, just miles from Camp David, as well as dozens of other bunkers the government built for its top leaders during the Cold War, from the White House lawn to Cheyenne Mountain in Colorado to Palm Beach, Florida, and the secret plans that would have kicked in after a Cold War nuclear attack to round up foreigners and dissidents and nationalize industries. Equal parts a presidential, military, and cultural history, Raven Rock tracks the evolution of the government plan and the threats of global war from the dawn of the nuclear era through the War on Terror.

## **Soviet Cold War Guided Missile Cruisers**

A thought-provoking and penetrating account of the post-Cold war follies and delusions that culminated in the age of Donald Trump from the bestselling author of *The Limits of Power*. When the Cold War ended with the fall of the Berlin Wall, the Washington establishment felt it had prevailed in a world-historical struggle. Our side had won, a verdict that was both decisive and irreversible. For the world's "indispensable nation," its "sole superpower," the future looked very bright. History, having brought the United States to the very summit of power and prestige, had validated American-style liberal democratic capitalism as universally applicable. In the decades to come, Americans would put that claim to the test. They would embrace the promise of globalization as a source of unprecedented wealth while embarking on wide-ranging military campaigns to suppress disorder and enforce American values abroad, confident in the ability of U.S. forces to defeat any foe. Meanwhile, they placed all their bets on the White House to deliver on the promise of their Cold War triumph: unequaled prosperity, lasting peace, and absolute freedom. In *The Age of Illusions*, bestselling author Andrew Bacevich takes us from that moment of seemingly ultimate victory to the age of Trump, telling an epic tale of folly and delusion. Writing with his usual eloquence and vast knowledge, he explains how, within a quarter of a century, the United States ended up with gaping inequality, permanent war, moral confusion, and an increasingly angry and alienated population, as well, of course, as the strangest president in American history.

## **World History: Connections to Today 4th Edition Guided Reading and Review, English Student Edition 2003c**

In this widely praised book, Vladislav Zubok argues that Western interpretations of the Cold War have erred by exaggerating either the Kremlin's pragmatism or its aggressiveness. Explaining the interests, aspirations, illusions, fears, and misperceptions of the Kremlin leaders and Soviet elites, Zubok offers a Soviet perspective on the greatest standoff of the twentieth century. Using recently declassified Politburo records, ciphered telegrams, diaries, and taped conversations, among other sources, Zubok offers the first work in English to cover the entire Cold War from the Soviet side. *A Failed Empire* provides a history quite different from those written by the Western victors. In a new preface for this edition, the author adds to our understanding of today's events in Russia, including who the new players are and how their policies will affect the state of the world in the twenty-first century.
