Growing worldwide populations increasingly require faster, safer, and more efficient transportation systems. These needs have led to a renewed interest in

high-speed guided ground transportation technology, inspired considerable research, and instigated the development of better analytical and experimental tools. A very significant body of knowledge currently exists, but has primarily remained scattered throughout the literature. *Vehicle Dynamics* consolidates information from a wide spectrum of sources in the area of guided ground transportation. Each chapter provides a concise, thorough statement of the fundamental theory, followed by illustrative worked examples and exercises. The author also includes a variety of unsolved problems designed to amplify and extend the theory and provide problem-solving experience. The subject of guided ground transportation is vast, but this book brings together the core topics, providing in-depth treatments of topics ranging from system classification, analysis, and response to landing dynamics and rail, air cushion, and maglev systems. In doing so, *Vehicle Dynamics* offers a singular opportunity for readers to build the solid background needed for solving practical vehicle dynamics problems or pursuing more advanced or specialized studies.

Becoming a grandma is like getting a subpoena. You don't expect it. You don't know how to respond. You know you must be mature and accept it. Being a grandma, though, is as close as many of us ever get to perfection. Filled with snappy one-liners followed by humorous anecdotes, this is the perfect gift book to keep grandma laughing. As author Bryna Nelson Paston says, "We have a window of opportunity as grandparents, usually five years, or maybe more if you're lucky. So you have to make your move fast and decisively. Your kids and their spouses will intrude, interrupt, and interfere. But persevere. Circumvent them, do exactly what you want, and lie— with dignity, I might add. Whatever it takes. Promise anything, but get the kid."

## Real Sex

The more modern culture shines its light on sex, the longer the shadow it casts. This shadow is commercialism, pornography and shame. This approach to sexuality distorts it to create performance pressure, increasing numbers of sexual 'dysfunctions' and a fundamental disconnect from ourselves and others. Yet sexuality is one of the most important paths to happiness, simply because it requires us to engage all the other aspects of ourselves. To have deeply satisfying sex we must engage the mind, the body and our feelings. Real Sex will show you how almost everything that our society has tried to teach you about your sexuality is misleading or simply wrong. Real Sex is a journey into the heart of your sexual self; a way of creating meaningful and fulfilling intimacy. It sets out seven keys that will teach you how to love and accept your mind, body, feelings, desires and sexuality at a deeper level, leaving behind feelings of guilt, insecurity and shame. Real Sex offers a new, integrated idea of sexuality that holds a positive perspective of the sexual beings that we are; longing for intimacy and aliveness that we know deep down makes our lives meaningful.

### **Cars**

Painstaking historical and technical research has laid the foundations for this book covering the entire history of one of Italy's most prestigious and legendary car manufacturers. The fascinating story of the Modena factory is closely intertwined with the most significant events that took place in the continual process of socio-economic and industrial development and transformation that has characterized Italy over the last eighty years. All Maserati enthusiasts will appreciate the true nucleus of the book composed of technical files reviewing every car, model by model, from the Tipo 26 of 1926 through to advance information on the forthcoming production. The texts are complemented by a superb range of illustrations featuring rare archive photographs and carefully selected technical drawings. Covers Maserati production from 1926 to 2003 including racing and road cars, engines for cars and boats built by other companies and commercial war vehicles. Includes the story of the Maserati brothers from 1887 until the establishment of OSCA, plus the story of racing in the early Twenties with Isotta Fraschini and Diatto, up to the last Quattroporte model. Contains detailed lay-outs of all the models produced, chassis numbers of all cars manufactured each year, a description of production modifications and the number of examples built of each model. Packed with vintage pictures and photographs of lovingly restored cars. The comprehensive story of one of the most glorious car manufacturers the world has known.

## **How to Be the Perfect Grandma**

24 editions from 1927 to 1957. 24 races featuring the greatest ever cars and drivers participated in the years either side of the Second World War. This in the briefest of terms is the Mille Miglia, the race par excellence; the marathon that for almost three decades traversed Italy, bringing to the nation's roads stars of the calibre of Varzi and Nuvolari, Biondetti and Fangio, Ascari, Moss and Taruffi driving for the likes of Alfa Romeo, Mercedes-Benz, Lancia and Ferrari. The book draws on a wealth of photographic documents, in particular for the post-war editions, from the Novafoto-Sorlini Archive, an important collection featuring the shots taken by the official race photographer, Alberto Sorlini, between 1947 and 1957. Thanks to this previously unpublished and spectacular material, the book evokes an era in which unforgettable chapters in motorsport history were written.

## **Oral Sex She'll Never Forget**

Sources are eclectic, results mixed, but one thing is certain: car design is being forced up an ever tightening spiral of creativity. These machines are memorials of our tastes, yearnings and capabilities. They have layers of meaning and can, as Henry Ford knew, be read like a book if only you know how. The story of the car is the story of how the objects of industry became a medium of artistic expression. This book tells that story in a series of case studies which reveal national characteristics: American flair, German technical suprematism, French vernacular chic, gorgeous Italian sculpture, English antiquarianism, Japanese ingenuity, Swedish responsibility. Cars featured appear in chronological date order from the 1908 Ford Model T to 2003 BMW 5 Series. The chosen cars will be specially photographed in a uniform style and reproduced in very textured, 4 colour b/w so as to distance this book from the cliches and conventions of specialist automotive publishing and to highlight form and shape. Each picture will be accompanied by a short critical essay including essential historical material together with colourful anecdote and quotations as well as a persuasive aesthetic appraisal of each vehicle. This lavish and beautifully designed book is the gift book for all car enthusiasts and design aficionados.

## **Mille Miglia Story**

For the first time, one of the major names in Italian car design tells his story from the beginning; from when he made his first sketches on paper, unbeknown to his parents and not only of cars, to reaching a point at which his name became synonymous with some of the best known and most important cars on the international front. In his 23-year career at Pininfarina, Leonardo Fioravanti, who was first a designer and architect, then managing director and director general of 'Studi & Ricerche' department, created some of the most beautiful Ferraris of all time; they ranged from the 1965 250 LM sports coupe Speciale to the immortal 1968 Daytona through to the 1975 308 GTB and GTS and the 1984 288 GTO, as well as the P5 and P6 of 1968. While continuing his Ferrari essay during his Pininfarina career, Fioravanti also guided the creation of numerous other projects, among them the Dino road car, the 1980 Pinin four-door prototype and went on to the 1984 Testarossa and the 1987 F40. He worked for the Fiat Group from 1988 until 1991, during which time he took on the roles of deputy director general of Ferrari, later became responsible for advanced design CRF and then head of the Fiat Styling Centre. In 1987, he founded Fioravanti srl, an architectural studio, and in 1991 he extended his services to industry, in particular the design of means of transport. Images of an epoch, designs from his own personal archive never previously seen and, above all, a passionate first person account. Those are the key elements of this outstanding book which, through the creations of Leonardo Fioravanti, covers over 50 years of the history of automobile style and culture.

## **The Illustrated Encyclopedia of Extraordinary Automobiles**

Bill-Sticking is a short story by Charles Dickens. Charles John Huffam Dickens (7 February 1812 - 9 June 1870) was an English writer and social critic. He created some of the world's most memorable fictional characters and is generally regarded as the greatest novelist of the Victorian period. During his life, his works enjoyed unprecedented fame, and by the twentieth century his literary genius was broadly acknowledged by critics and scholars. His novels and short stories continue to be widely popular. Born in Portsmouth, England, Dickens was forced to leave school to work in a factory when his father was thrown into debtors' prison. Although he had little formal education, his early impoverishment drove him to succeed. Over his career he edited a weekly journal for 20 years, wrote 15 novels, five novellas and hundreds of short stories and non-fiction articles, lectured and performed extensively, was an indefatigable letter writer, and campaigned vigorously for children's rights, education, and other social reforms. Dickens sprang to fame with the 1836 serial publication of *The Pickwick Papers*. Within a few years he had become an international literary celebrity, famous for his humour, satire, and keen observation of character and society. His novels, most published in monthly or weekly installments, pioneered the serial publication of narrative fiction, which became the dominant Victorian mode for novel publication. The installment format allowed Dickens to evaluate his audience's reaction, and he often modified his plot and character development based on such feedback. For example, when his wife's chiropodist expressed distress at the way Miss Mowcher in *David Copperfield*

seemed to reflect her disabilities, Dickens went on to improve the character with positive features.

## **The Branding of Polaroid**

THE LEGEND AND MYSTERY OF RIGEL On a frigid night in 1912 the great unsinkable Titanic sank 2 miles down to a watery grave. Many stories of heroes and villains have been passed down since that fateful night. Yet there is one hero in particular whose story has remained a mystery. Meet Rigel- the Titanic's Newfoundland dog mascot. His incredible story of courage and survival was originally published as an alleged factual account in 1912 just days after the sinking. Come along and enjoy this fictionalized story of Rigel's tragedy and triumph in spite of challenges no human could have survived! \* \* \* Yes Virginia, there may have been a Rigel. The story of Rigel was first reported in the "New York Herald" the day the Carpathia docked with Titanic's survivors. It also appeared in a well-known book: " The Sinking of Titanic and Great Sea Disasters" which was first published in 1912 a few short months after the disaster. After that there was no mention of him at all, no disclaimers, no retractions, nothing to my knowledge. Although there has been some recent mention of him in dog books all subsequent books and movies about Titanic by historians, crew and survivors don't mention him either. Why? Was he a figment of the reporter's imagination? That seems unlikely. If Rigel and new owner didn't exist then who was interviewed? Someone playing a cruel joke while wearing a uniform and holding onto a 150-pound dog? Unlikely again, but I suppose that could have happened. The only two well-known dogs that survived the sinking were toy breeds lovingly smuggled on board the lifeboats in their owner's coats. All of the other dogs on board lost their lives including a champion English Bulldog who was last seen trying to swim in the frigid water. Comparing a bulldog's swimming ability to a Newfoundland's is like expecting your Shetland Pony to win the Kentucky Derby. Bulldogs are among the worst swimmers in dog-dom and Newfoundlands are the absolute best. Many people are skeptical as to whether any creature could have survived a long distance swim in freezing water. Certainly none of the people did. "Newfie" owners and breeders have no problem believing a Newfoundland could do exactly what the record states. Bred to withstand the harsh conditions of the frigid north Atlantic they have been used to haul in heavy fishing nets and assist in water rescues. Newfoundlands could be called the "Polar bears" of the dog world. They have the same adaptations for swimming albeit on a smaller scale. And since Scientists have seen Polar Bears swimming 100 miles out to sea in freezing water and not looking the least bit exhausted, then why not? The near lifeboat collision was also never mentioned again. Perhaps it was dropped purposely. No one wanted to detract from the heroics of the Carpathia and crew. After pushing their small steamer full speed into the very same icefield that doomed Titanic, they deserved all the credit and praise that was bestowed on them. Finally there is the Jonas Briggs mystery. He isn't listed on either ship's crew list for that year. For many that is proof positive

this was nothing more than a hoax. Apparently these people have never done genealogy research. Our ancestors were not sticklers for detail. Sometimes they'd spell names phonetically. Other times they'd scribble a name and then not be able to decipher it. I found one of my ancestor's names spelled 4 different ways. One spelling was way off. I changed Jonas to John in my book, a common name that could have been mistaken for Jonas. Taking into account the pandemonium surrounding the Carpathia's arrival there would certainly be some examples of miscommunication.

Henry Miller's monumental venture in self-revelation was begun with his Tropic of Cancer and Tropic of Capricorn, which on their American publication were hailed as "miraculous," "superb," "ribald," "brilliant," and "shamelessly shocking." Sexus is the first volume of a series called The Rosy Crucifixion, in which Miller completes his major life work. It was written in the United States during World War II, and first published in Paris in 1949. Of this remarkable project, Lawrence Durrell has said: "The completion of his seven-volume autobiography, if it fulfills the promise of what he has already given us, will put his name amongst the three or four great figures of the age."
