Yertle the Turtle and Other Stories

The Mess That We Made explores the environmental impact of trash and plastic on the ocean and marine life, and it inspires kids to do their part to combat pollution. Simple, rhythmic wording builds to a crescendo ("This is the mess that we made. These are the fish that swim in the mess that we made.") and the vibrant digital artwork captures the disaster that is the Great Pacific Garbage Patch. Children can imagine themselves as one of the four multi-ethnic occupants of the little boat surrounded by swirling plastic in the middle of the ocean, witnessing the cycle of destruction and the harm it causes to plants, animals, and humans. The first half of the book portrays the growing magnitude of the issue, and the second half rallies children and adults to make the necessary changes to save our oceans. Facts about the Great Pacific Garbage Patch, ocean pollution, and how kids can help are included in the back matter.

Gilbert Goldfish Wants a Pet

A hilarious read-aloud favorite about some foolish farm animals who decide to trade roles—and discover just how hard it is to do someone else's job. From award-winning author Lester Laminack and celebrated illustrator Henry Cole. "Good farm fun." —Kirkus Reviews The Tuckers' farm is a peaceful place where everyone has a job and no one complains. That is, until a hapless peacock falls off the back of a passing truck and stirs things up. Soon, customers are flocking to the farm to see what all the fuss is about. But the hens don't like the newcomer getting attention while they do all the hard work. When a wise old hound sees the problem, he helps orchestrate a job swap. What follows is the riotous tale of three hens who get in way over their feathered heads, and one very distressed peacock who just can't figure out how to lay an egg. Lester Laminack has created a comical look at envy, finding your strength, and what happens when we underestimate the value of others' work. Henry Cole's delightful illustrations heighten the story's humor and will have readers of all ages laughing out loud. Teacher's Guide available!

Read, Learn & Create--The Ocean Craft Book

Our mission: to make math a fun part of kids' everyday lives. We all know it's wonderful to read bedtime stories to kids, but what about doing math? Many generations of Americans are uncomfortable with math and numbers, and too often we hear the phrase, "I'm just not good at math!" For decades, this attitude has trickled down from parents to their kids, and we now have a culture that finds math dry, intimidating, and just not cool. Bedtime Math wants to change all that. Inside this book, families will find fun, mischief-making math problems to tackle—math that isn't just kid-friendly, but actually kid-appealing. With over 100 math riddles on topics from jalapeños and submarines to roller coasters and flamingos, this book bursts with math that looks nothing like school. And with three different levels of challenge (wee ones, little kids, and big kids), there's something for everyone. We can make numbers fun, and change the world, one Bedtime Math puzzle at a time.

Sticks and Stones details various designs for the ever-popular fort (cabins, tipis, survival shelters, etc.) and also covers structures such as bridges, fences, and dams, while explaining the STEAM principles behind each. In addition to structures, there are other ideas and projects for camping and the backyard, like a fire ring (explaining the types of fires, airflow, and safety), the always useful tripod, a travois, a rock garden, and toy boats. Along the way, there are multi-leveled reading opportunities in the form of quick features on considerations like mindfulness, campfire safety, mini STEAM design challenges, and more.
