Writing for College: the Eight Step Program to Writing Academic Argument Papers Using the Template Method

Ditch That Textbook

When Kate L. Turabian first put her famous guidelines to paper, she could hardly have imagined the world in which today's students would be conducting research. Yet while the ways in which we research and compose papers may have changed, the fundamentals remain the same: writers need to have a strong research question, construct an evidence-based argument, cite their sources, and structure their work in a logical way. A Manual for Writers of Research Papers, Theses, and Dissertations—also known as “Turabian”—remains one of the most popular books for writers because of its timeless focus on achieving these goals. This new edition filters decades of expertise into modern standards. While previous editions incorporated digital forms of research and writing, this edition goes even further to build information literacy, recognizing that most students will be doing their work largely or entirely online and on screens. Chapters include updated advice on finding, evaluating, and citing a wide range of digital sources and also recognize the evolving use of software for citation management, graphics, and paper format and submission. The ninth edition is fully aligned with the recently released Chicago Manual of Style, 17th edition, as well as with the latest edition of The Craft of Research. Teachers and users of the previous editions will recognize the familiar three-part structure. Part 1 covers every step of the research and writing

process, including drafting and revising. Part 2 offers a comprehensive guide to Chicago's two methods of source citation: notes-bibliography and author-date. Part 3 gets into matters of editorial style and the correct way to present quotations and visual material. A Manual for Writers also covers an issue familiar to writers of all levels: how to conquer the fear of tackling a major writing project. Through eight decades and millions of copies, A Manual for Writers has helped generations shape their ideas into compelling research papers. This new edition will continue to be the gold standard for college and graduate students in virtually all academic disciplines.

Student's Guide to Writing College Papers, Fifth Edition

Sessional papers. Inventory control record 1

Millions of college students will compose hundreds of pages in their college career. Staring at a blank word processing document on your computer screen can be stressful and intimidating. It doesn't matter if you go to Harvard or your local community college the process of writing a good research paper is equally as challenging. This complete guide will cover every possible topic you will face in the classroom. You will learn how to choose a topic, how to conduct research, how to go about writing the paper, and how to edit like a pro. We'll teach you how to take advantage of the library with tips on finding the best articles, books, and online sources. This comprehensive guide covers plagiarism, reaching word count without fluff, and different citation styles such as MLA and APA. Get your creative juices flowing with our list of prompts, and use our samples as a guide. This book gives you everything you need to be one page closer to that coveted 4.0 GPA.-- (8/3/2016 12:00:00 AM)

Student's Guide to Writing College Papers

Why have there been no terrorist attacks in the United States since 9/11? It is ridiculously easy for a single person with a bomb-filled backpack, or a single explosives-laden automobile, to launch an attack. So why hasn't it happened? The answer is surely not the Department of Homeland Security, which cannot stop terrorists from entering the country, legally or otherwise. It is surely not the Iraq war, which has stoked the hatred of Muslim extremists around the world and wasted many thousands of lives. Terrorist attacks have been regular events for many years -- usually killing handfuls of people, occasionally more than that. Is it possible that there is a simple explanation for the peaceful American homefront? Is it possible that there are no al-Qaeda terrorists here? Is it possible that the war on terror has been a radical overreaction to a rare event? Consider: 80,000 Arab and Muslim immigrants have been subjected to fingerprinting and registration, and more than 5,000 foreign nationals have been imprisoned -- yet there has not been a single conviction for a terrorist crime in

America. A handful of plots -- some deadly, some intercepted -- have plagued Europe and elsewhere, and even so, the death toll has been modest. We have gone to war in two countries and killed tens of thousands of people. We have launched a massive domestic wiretapping program and created vast databases of information once considered private. Politicians and pundits have berated us about national security and patriotic duty, while encroaching our freedoms and sending thousands of young men off to die. It is time to consider the hypothesis that dare not speak its name: we have wildly overreacted. Terrorism has been used by murderous groups for many decades, yet even including 9/11, the odds of an American being killed by international terrorism are microscopic. In general, international terrorism doesn't do much damage when considered in almost any reasonable context. The capacity of al-Qaeda or of any similar group to do damage in the United States pales in comparison to the capacity other dedicated enemies, particularly international Communism, have possessed in the past. Lashing out at the terrorist threat is frequently an exercise in self-flagellation because it is usually more expensive than the terrorist attack itself and because it gives the terrorists exactly what they are looking for. Much, probably most, of the money and effort expended on counterterrorism since 2001 (and before, for that matter) has been wasted. The terrorism industry and its allies in the White House and Congress have preyed on our fears and caused enormous damage. It is time to rethink the entire enterprise and spend much smaller amounts on only those things that do matter: intelligence, law enforcement, and disruption of radical groups overseas. Above all, it is time to stop playing into the terrorists' hands, by fear-mongering and helping spread terror itself.

Parliamentary Papers

Although access to higher education is virtually universally available, many students who start in a higher education program drop out prior to completing a degree or achieving their individual academic and/or social goals. In response to student attrition, colleges have developed intervention programs and services to try to retain students. In spite of all of the programs and services, according to the U.S. Department of Education, Center for Educational Statistics, only 50% of those who enter higher education actually earn a bachelor's degree. Enrollment management and the retention of students remain a top priority of federal and state government, of colleges and universities, college students and their parents. This book offers a formula for student success intended to assist colleges and universities in retaining and graduating students.

Although access to higher education is virtually universally available, many students who start in a higher education program drop out prior to completing a degree or achieving their individual academic and/or social goals. In response to student attrition, colleges have developed intervention programs and services to try to retain students. In spite of all of the programs and services to help retain students, according to the U.S. Department of Education, Center for Educational Statistics, only 50% of those who enter higher education actually earn a bachelor's degree. Enrollment management and the retention of students remain a top priority of federal and state government, colleges, universities, and parents of students who are attending college and of students themselves. This book offers a formula for student success intended to

assist colleges and universities in retaining and graduating students. Contributors: Some of the leading educators who study college student retention contributed to this book. All are truly dedicated to helping students achieve their individual academic and personal goals. A list of each and their affiliation follows: Alexander W. Astin: Allan M. Cartter Professor of Higher Education at the University of California, Los Angeles, and Director of the Higher Education Research Institute. Elizabeth Barlow: Executive Director of Institutional Research at the University of Houston, Houston, Texas. John Bean: Associate Professor of Higher Education at Indiana University, Bloomington. Joseph B. Berger: Associate Professor of Education and Chair of the Department of Educational Policy, Research, and Administration in the School of Education at the University of Massachusetts, Amherst. John Braxton: Professor of Education in the Higher Education Leadership and Policy Program in the Department of Leadership, Policy and Organizations at Peabody College, Vanderbilt University. Kurt Burkum: Doctoral student and Ostar Fellow in the Center for the Study of Higher Education at Penn State University. Alberto F. Cabrera: Specializes in research methodologies, college choice, college students, classroom experiences, minorities in higher education, and economics of education. Gloria Crisp: Doctoral student in educational leadership with a focus on higher education in the department of Educational Leadership and Cultural Studies, College of Education at the University of Houston. Linda Hagedorn: Associate professor and the associate director of the Center for Higher Education Policy Analysis (CHEPA), as well as the program chair for the Community College Leadership program in the Rossier School of Education at the University of Southern California. Steve LaNasa: Assistant Vice Provost for Academic Planning at the University of Missouri, Kansas City, where he is responsible for outcomes assessment, planning, and program evaluation. Amy S. Hirschy: Assistant professor in the Department of Educational and Counseling Psychology and the Department of Leadership, Foundations, and Human Resource Education at the University of Louisville. Stephanie D. Lee: Doctoral student in the Department of Leadership, Policy, and Organizations at Peabody College of Vanderbilt University in Nashville, Tennessee. Susan C. Lyon: Works in the Office of Student Affairs in the School of Engineering at the University of Massachusetts, Amherst. Thomas G. Mortensen: Senior Scholar at the Pell Institute for the Study of Opportunity in Higher Education in Washington, D.C., and an independent higher education policy analyst living in Oskaloosa, Iowa. Amaury Nora: Professor of Higher Education and Associate Dean for Research and Faculty Development in the College of Education at the University of Houston. Leticia Oseguera: Doctoral candidate in the University of California, Los Angeles, School of Education's Higher Education and Organizational Change program. Alan Seidman: The creator and editor of the Journal of College Student Retention: Research, Theory & Practice. John H. Schuh: Distinguished professor of educational leadership at Iowa State University, Ames, where he is also department chair. Vincent Tinto: Distinguished University Professor at Syracuse University and chair of the higher education program.

How the Writing Context Shapes College Students' Strategies for Writing from Sources

“[A] stunning tale of academic fraud . . . shocking and compelling.”-The Washington Post Dave Tomar wrote term papers for

a living. Technically, the papers were “study guides,” and the companies he wrote for-there are quite a few-are completely aboveboard and easily found with a quick web search. For as little as ten dollars a page, these paper mills provide a custom essay, written to the specifics of any course assignment. During Tomar's career as an academic surrogate, he wrote made-to-order papers for everything from introductory college courses to Ph.D. dissertations. There was never a shortage of demand for his services. The Shadow Scholar is the story of this dubious but all-too-common career. In turns shocking, absurd, and ultimately sobering, Tomar explores not merely his own misdeeds but the bureaucratic and cash-hungry colleges, lazy students, and even misguided parents who help make it all possible.

The Years That Matter Most

Papers Presented at the Second Conference on the Teaching of Economics

There are roughly twenty million students enrolled in various college in the United States alone. Many go in not knowing what is expected from them by their instructors. Especially when it comes to academic writing. And unfortunately, a lot of students travel down a painful and stressful path to master this critical skill.If you are a college student struggling with your essays and papers, then "An Ex-Student's Guide to Academic Writing" is the right book for you. Written by a successful undergraduate and graduate student, and a college instructor, this book can show what the do's and don'ts are for writing that A-paper. Relying on personal experience to convey the hints and tricks of the trade, you can improve your chances of succeeding in college and making your adventures in the academic jungle a little easier.This new edition to the work now has added more material including examples of mistakes in college papers and how to avoid them.

College Drinking

In Time of War

Studying Students

College Student Retention

Drinking is recognized as one of the most important problems confronting students on campus today, with major impacts on health and safety. This book answers crucial questions about why students drink, examines its complex links to campus crime and sexual assault, and offers new insights on how to address the issue. It differs from other studies of college drinking by dispelling the myth that the problem is universal. Dowdall's research reveals that the incidence of alcohol abuse varies enormously between colleges, and in doing so identifies interventions and policies that have been effective, and those that have failed. His study is also unique in looking "upstream" at the broader cultural, organizational and social forces that shape this behavior, where most studies focus only on "downstream" behaviors, well after students have selected their college and have started drinking. Students and parents can take action to lower the risk of binge drinking by following the book's recommendations, and consulting the data it provides about alcohol violations and crime at thousands of colleges. For administrators and student affairs personnel, it both defines and illuminates the issue, and outlines effective interventions.

The College Student's Guide to Research Papers: 101 Ways to Make Your Work Stand Out

"Indelible and extraordinary."—Tara Westover, author of *Educated: A Memoir*, *New York Times Book Review* The best-selling author of *How Children Succeed* returns with a powerful, mind-changing inquiry into higher education in the United States Does college still work? Is the system designed just to protect the privileged and leave everyone else behind? Or can a college education today provide real opportunity to young Americans seeking to improve their station in life? *The Years That Matter Most* tells the stories of students trying to find their way, with hope, joy, and frustration, through the application process and into college. Drawing on new research, the book reveals how the landscape of higher education has shifted in recent decades and exposes the hidden truths of how the system works and whom it works for. And it introduces us to the people who really make higher education go: admissions directors trying to balance the class and balance the budget, College Board officials scrambling to defend the SAT in the face of mounting evidence that it favors the wealthy, researchers working to unlock the mysteries of the college-student brain, and educators trying to transform potential dropouts into successful graduates. With insight, humor, and passion, Paul Tough takes readers on a journey from Ivy League seminar rooms to community college welding shops, from giant public flagship universities to tiny experimental storefront colleges. Whether you are facing your own decision about college or simply care about the American promise of social mobility, *The Years That Matter Most* will change the way you think—not just about higher education, but about the nation itself.

The Karaites of Galicia

Make Your Home Among Strangers

Provides guidelines and examples for handling research, outlining, spelling, punctuation, formatting, and documentation.

An Ex-Student's Guide to Academic Writing

People have been reading on computer screens for several decades now, predating popularization of personal computers and widespread use of the internet. But it was the rise of eReaders and tablets that caused digital reading to explode. In 2007, Amazon introduced its first Kindle. Three years later, Apple debuted the iPad. Meanwhile, as mobile phone technology

improved and smartphones proliferated, the phone became another vital reading platform. In *Words Onscreen*, Naomi Baron, an expert on language and technology, explores how technology is reshaping our understanding of what it means to read. Digital reading is increasingly popular. Reading onscreen has many virtues, including convenience, potential cost-savings, and the opportunity to bring free access to books and other written materials to people around the world. Yet, Baron argues, the virtues of eReading are matched with drawbacks. Users are easily distracted by other temptations on their devices, multitasking is rampant, and screens coax us to skim rather than read in-depth. What is more, if the way we read is changing, so is the way we write. In response to changing reading habits, many authors and publishers are producing shorter works and ones that don't require reflection or close reading. In her tour through the new world of eReading, Baron weighs the value of reading physical print versus online text, including the question of what long-standing benefits of reading might be lost if we go overwhelmingly digital. She also probes how the internet is shifting reading from being a solitary experience to a social one, and the reasons why eReading has taken off in some countries, especially the United States and United Kingdom, but not others, like France and Japan. Reaching past the hype on both sides of the discussion, Baron draws upon her own cross-cultural studies to offer a clear-eyed and balanced analysis of the ways technology is affecting the ways we read today--and what the future might bring.

Overblown

Classroom Communication and Instructional Processes

Student Writing presents an accessible and thought-provoking study of academic writing practices. Informed by 'composition' research from the US and 'academic literacies studies' from the UK, the book challenges current official discourse on writing as a 'skill'. Lillis argues for an approach which sees student writing as social practice. The book draws extensively on a three-year study with ten non-traditional students in higher education and their experience of academic writing. Using case study material - including literacy history interviews, extended discussions with students about their writing of discipline specific essays, and extracts from essays - Lillis identifies the following as three significant dimensions to academic writing: * Access to higher education and to its language and literacy representational resources * Regulation of meaning making in academic writing * Desire for participation in higher education and for choices over ways of meaning in academic writing. *Student Writing: access, regulation, desire* raises questions about why academics write as they do, who benefits from such writing, which meanings are valued and how, on what terms 'outsiders' get to be 'insiders' and at what costs.

Accounts and Papers of the House of Commons

"Containing the public messages, speeches, and statements of the President", 1956-1992.

Student's Guide for Writing College Papers

This book provides a view into the groundbreaking application of ethnographic tools and techniques to the understanding of undergraduate students and their use of information. The publication describes findings of the work at the University of Rochester River Campus Libraries and provides insight into how academic librarians might use these techniques on their own campuses.

Historical Papers

The book focuses on the history, ethnography, and convoluted ethnic identity of the Karaites, an ethnoreligious group in Eastern Galicia (modern Ukraine). The small community of the Karaite Jews, a non-Talmudic Turkic-speaking minority, who had been living in Eastern Europe since the late Middle Ages, developed a unique ethnographic culture and religious tradition. The book offers the first comprehensive study of the Galician Karaite community from its earliest days until today with the main emphasis placed on the period from 1772 until 1945. Especially important is the analysis of the twentieth-century dejudaization (or Turkicization) of the community, which saved the Karaites from the horrors of the Holocaust.

T. S. Eliot, Anti-Semitism, and Literary Form

When your students need reliable, easy-to-find writing advice for college and beyond, EasyWriter gives them what they need in a format that's easy to afford. Andrea Lunsford meets students where they are with friendly advice, research-based tips for solving the Top Twenty writing problems, and an emphasis on making effective rhetorical choices. The seventh edition puts even more emphasis on empowering students to become critical thinkers and ethical communicators with new advice about fact checking and evaluating sources and more advice about choosing language that builds common ground. In addition, the seventh edition offers more support for writing in a variety of disciplines and genres and more models of student writing to help students make effective choices in any context. EasyWriter can be packaged at a significant discount with LaunchPad Solo for Lunsford Handbooks, which includes dozens of additional writing models as well as exercises, LearningCurve adaptive quizzing, videos, and podcasts.

Papers relating to the Examinations held at the Elphinstone College, Bombay, in December, 1855

Getting Ready for College, Careers, and the Common Core

Time is short and college bound students need their applications to make an impact on the overworked admissions officers who guard the gates at prestigious universities. To succeed in this mission, they need a book that will get read! In *The 1-Hour College Admissions Essay*, screenwriter and Hollywood story consultant, Craig Machen, offers a simple set of story telling tools to give personal statements the emotional impact they need to stand out. These concepts are not complex, but without them it's almost impossible to write anything moving or memorable. In this concise but all encompassing text, Craig distills 20 years as a professional writer and writing instructor - including 10 as a personal statement specialist - to the essentials. This is all of the information required to execute an excellent essay. And best of all, you can read and begin applying *The 1-Hour College Admissions Essay* in just 60 minutes!

Words Onscreen

EasyWriter

Create programs that prepare students for college, careers, and the new and challenging assessments of the Common Core State Standards Written for all educators but with an emphasis on those at the secondary level, this important resource shows how to develop programs that truly prepare students for both the Common Core assessments and for college and career readiness. Based on multiple research studies conducted by Conley as well as experience he has gained from working with dozens of high schools that succeed with a wide range of students, the book provides specific strategies for teaching the CCSS in ways that improve readiness for college and careers for the full range of students. Draws from research-based models for creating programs for high school students that will ensure readiness for tests and for college and beyond Includes strategies and practices for teachers to help students develop postsecondary preparedness Is the third in a series of books on readiness written by David Conley, including *College Knowledge* and *College and Career Ready* Teachers can use this valuable resource to understand the "big picture" behind the Common Core State Standards, how to teach to them in ways that prepare students for new, challenging assessments being implemented over the next few years and, more importantly, how to help all students be ready for learning beyond high school.

Report of the Commissioner of Education [with Accompanying Papers].

This volume offers a systematic review of the literature on communication education and instruction. Making meta-analysis

findings accessible and relevant, the editors of this volume approach the topic from the perspective that meta-analysis serves as a useful tool for summarizing experiments and for determining how and why specific teaching and learning experiences have positive student outcomes. The topics covered here are meaningful and relevant to classroom practice, and each chapter offers a summary of existing quantitative social science research using meta-analysis. With contributions from experienced researchers throughout the communication discipline, this work provides a unique analysis of research in instructional communication. Taken together, the chapters in this volume enhance understanding of behaviors, practices, and processes that promote positive student outcomes. This book is a must-read for scholars, graduate students, and researchers in communication education, and will also be of interest to scholars and researchers in education.

Public Papers of the Presidents of the United States

High school students, two-year college students, and university students all need to know how to write a well-reasoned, coherent research paper—and for decades Kate Turabian's *Student's Guide to Writing College Papers* has helped them to develop this critical skill. In the new fourth edition of Turabian's popular guide, the team behind Chicago's widely respected *The Craft of Research* has reconceived and renewed this classic for today's generation. Designed for less advanced writers than Turabian's *Manual of Writers of Research Papers, Theses, and Dissertations, Seventh Edition*, Gregory G. Colomb and Joseph M. Williams here introduce students to the art of defining a topic, doing high-quality research with limited resources, and writing an engaging and solid college paper. The *Student's Guide* is organized into three sections that lead students through the process of developing and revising a paper. Part 1, "Writing Your Paper," guides students through the research process with discussions of choosing and developing a topic, validating sources, planning arguments, writing drafts, avoiding plagiarism, and presenting evidence in tables and figures. Part 2, "Citing Sources," begins with a succinct introduction to why citation is important and includes sections on the three major styles students might encounter in their work—Chicago, MLA, and APA—all with full coverage of electronic source citation. Part 3, "Style," covers all matters of style important to writers of college papers, from punctuation to spelling to presenting titles, names, and numbers. With the authority and clarity long associated with the name Turabian, the fourth edition of *Student's Guide to Writing College Papers* is both a solid introduction to the research process and a convenient handbook to the best practices of writing college papers. Classroom tested and filled with relevant examples and tips, this is a reference that students, and their teachers, will turn to again and again.

MLA Handbook for Writers of Research Papers

Students of all levels need to know how to write a well-reasoned, coherent research paper—and for decades Kate L. Turabian's *Student's Guide to Writing College Papers* has helped them to develop this critical skill. For its fifth edition,

Chicago has reconceived and renewed this classic work for today's generation. Addressing the same range of topics as Turabian's *A Manual for Writers of Research Papers, Theses, and Dissertations* but for beginning writers and researchers, this guide introduces students to the art of formulating an effective argument, conducting high-quality research with limited resources, and writing an engaging class paper. This new edition includes fresh examples of research topics, clarified terminology, more illustrations, and new information about using online sources and citation software. It features updated citation guidelines for Chicago, MLA, and APA styles, aligning with the latest editions of these popular style manuals. It emphasizes argument, research, and writing as extensions of activities that students already do in their everyday lives. It also includes a more expansive view of what the end product of research might be, showing that knowledge can be presented in more ways than on a printed page. Friendly and authoritative, the fifth edition of *Student's Guide to Writing College Papers* combines decades of expert advice with new revisions based on feedback from students and teachers. Time-tested and teacher-approved, this book will prepare students to be better critical thinkers and help them develop a sense of inquiry that will serve them well beyond the classroom.

The 1-Hour College Admissions Essay

The widely used reference work provides students with directions and guidelines for writing long documented papers, covering all steps from topic selection to final draft

Papers and Proceedings of the General Meeting of the American Library Association Held at

A Manual for Writers of Research Papers, Theses, and Dissertations, Ninth Edition

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard,

teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Sessional Papers

From World War II to the war in Iraq, periods of international conflict seem like unique moments in U.S. political history—but when it comes to public opinion, they are not. To make this groundbreaking revelation, *In Time of War* explodes conventional wisdom about American reactions to World War II, as well as the more recent conflicts in Korea, Vietnam, the Gulf, Afghanistan, and Iraq. Adam Berinsky argues that public response to these crises has been shaped less by their defining characteristics—such as what they cost in lives and resources—than by the same political interests and group affiliations that influence our ideas about domestic issues. With the help of World War II-era survey data that had gone virtually untouched for the past sixty years, Berinsky begins by disproving the myth of “the good war” that Americans all fell in line to support after the Japanese bombed Pearl Harbor. The attack, he reveals, did not significantly alter public opinion but merely punctuated interventionist sentiment that had already risen in response to the ways that political leaders at home had framed the fighting abroad. Weaving his findings into the first general theory of the factors that shape American wartime opinion, Berinsky also sheds new light on our reactions to other crises. He shows, for example, that our attitudes toward restricted civil liberties during Vietnam and after 9/11 stemmed from the same kinds of judgments we make during times of peace. With Iraq and Afghanistan now competing for attention with urgent issues within the United States, *In Time of War* offers a timely reminder of the full extent to which foreign and domestic politics profoundly influence—and ultimately illuminate—each other.

Papers on Anthropometry

Julius's critically acclaimed study (looking both at the detail of Eliot's deployment of anti-Semitic discourse and at the role it played in his greater literary undertaking) has provoked a reassessment of Eliot's work among poets, scholars, critics and readers, which will invigorate debate for some time to come.

Writing for College: the Eight Step Program to Writing Academic Argument Papers Using the Template Method

Lizet, a daughter of Cuban immigrants and the first in her family to graduate from high school, secretly applies and is accepted to an ultra-elite college. Her parents are furious at her decision to leave Miami, and amid a painful divorce, her father sells her childhood home, leaving Lizet, her mother, and older sister, a newly single mom--without a steady income

and scrambling for a place to live. Amidst this turmoil, Lizet begins college, but the privileged world of the campus feels utterly foreign to her, as does her new awareness of herself as a minority. Struggling both socially and academically, she returns home for a Thanksgiving visit, only to be overshadowed by the arrival of Ariel Hernandez, a young boy whose mother died fleeing with him from Cuba on a raft. The ensuing immigration battle puts Miami in a glaring spotlight, captivating the nation and entangling Lizet's entire family. Pulled between life at college and the needs of those she loves, Lizet is faced with hard decisions that will change her life forever. Her urgent, mordantly funny voice leaps off the page to tell this moving story of a young woman torn between generational, cultural, and political forces; it's the new story of what it means to be American today.
