The Business Associations Supplement is designed for use in law school courses in which Palmiter & Partnoy, Corporations, Second Edition, has been adopted as the main text. The Supplement adds essentially six categories of materials. 1. Agency, partnerships, and limited liability companies. Palmiter & Partnoy does cover agency, partnerships, and limited liability companies. But, as the title implies, the agency, partnerships, and limited liability companies coverage is thin. This supplement expands the coverage from "corporations" to the full spectrum of "business associations" or "business organizations." 2. Problems and exercises. Reading and discussing the course material is not enough. Students learn by doing. The problems and exercises provide you with something to do. The doing of it engages you with the materials. The problems include statute-readers, case-readers, and document readers. These are not the unanswerable queries of law school discourse. They have answers. (Well, most of them.) But if you merely read the materials and then try the questions, you will usually find that you don't yet know the answers. The "reader" problems require that you go back to the materials, find the right passage, and apply it. The practice problems in this Supplement present fact-rich and concrete scenarios. These problems put you at a specific time and place and ask that you decide, as lawyers must, what to do. 3. Fundamental documents. The Supplement includes the Certificate of Incorporation and Bylaws of Facebook, Inc., along with some of Facebook's recent financial statements. It also includes the Articles of Organization and Operating Agreement for a generic LLC. You will need

## Online Library Planet Law School li What You Need To Know Before You Go But Didnt Know To Ask And No One Else Will Tell You, Second Edition

these documents for some of the problems and exercises. 4. Recent cases and materials. Casebooks typically go through a new edition only once every three or four years. The extraordinary flexibility offered by CreateSpace on Amazon makes it possible to revise this Supplement every year, adding currency. 5. Entities, entity disregard, and entity thinking. These are some topics not covered in Palmiter & Partnoy that I find of interest. Your teacher may or may not agree. 6. Alternative edits. This Supplement contains my re-edits of some of the cases in Palmiter & Partnoy. In some instances, Palmiter & Partnoy omitted facts or aspects I needed to raise different issues. In other instances, I felt they included too much. (Generally speaking, I don't think edited cases should exceed about four pages.)

One L, Scott Turow's journal of his first year at law school and a best-seller when it was first published in 1977, has gone on to become a virtual bible for prospective law students. Not only does it introduce with remarkable clarity the ideas and issues that are the stuff of legal education; it brings alive the anxiety and competitiveness--with others and, even more, with oneself--that set the tone in this crucible of character building. Each September, a new crop of students enter Harvard Law School to begin an intense, often grueling, sometimes harrowing year of introduction to the law. Turow's group of One Ls are fresh, bright, ambitious, and more than a little daunting. Even more impressive are the faculty. Will the One Ls survive? Will they excel? Will they make the Law Review, the outward and visible sign of success in this ultra-conservative microcosm? With remarkable insight into both his fellows and himself, Turow leads us through the ups and downs, the small triumphs and tragedies of the year, in an absorbing and thought-provoking narrative that teaches the reader not only about law school and the law but about the human beings who make them what they are. In the new afterword for this edition of One L, the author looks back on law school from the perspective of ten years' work as a lawyer and offers some suggestions for reforming legal education.

## **The Ambassador of God**

A powerful book by one of the top authors in the law

school genre, offering a method to study law, well, in less time, with a focused, realistic approach. To get straight to the point, Law School: Getting In, Getting Good, Getting the Gold ("GGG") is, without a doubt, one of the most important law school and legal career books currently available. There are, of course, other guides that have made a huge impact in the market for such materials; "Planet Law School" (which is now PLS II) and "Law School Confidential" are two that immediately spring to mind, and which the prospective law student has most likely heard of. But whereas PLS and LSC are rather practical in nature, which is not in itself a bad thing because being led through the practicalities of applying to law school, preparing, studying, finding jobs and so forth are obviously important, GGG offers all this and so much more. Not more of the same, however, although GGG does cover standard material such as rankings and taking exams, and thankfully chooses to omit the tedious and common-sense generic topics such as how to apply for financial aid and how to pick upper level courses during 2L/3L, while emphasizing the important subjects such as the LSAT. Since its original publication in 1999, this foundational book has become a classic in its field. This second edition, Code Version 2.0, updates the work and was prepared in part through a wiki, a web site allowing readers to edit the text, making this the first reader-edited revision of a popular book. Code counters the common belief that cyberspace cannot be controlled

or censored. To the contrary, under the influence of commerce, cyberspace is becoming a highly regulable world where behavior will be much more tightly controlled than in real space. We can - we must - choose what kind of cyberspace we want and what freedoms it will guarantee. These choices are all about architecture: what kind of code will govern cyberspace, and who will control it. In this realm, code is the most significant form of law and it is up to lawyers, policymakers, and especially average citizens to decide what values that code embodies.

The perfect gift for the lawyers in your life -- for law school graduation, birthdays, firm holiday gifts, retirement, or just because. More than 70 vignettes from life in the practice of law are rendered here as wryly humorous poems. Each one stands alone as the sort of snapshot one lawyer might forward along to another for a laugh or a knowing nod. Together, they comprise a collection to be treasured by anyone who has lived through law school, first jobs, thrilling victories, eye-opening disappointments, and the lifestyle particular to this career choice. This book is not about laughing at lawyers. It's about laughing with them. It's for everyone who's in on the joke: Everyone who has witnessed the madness and met the quirky characters in this field. Everyone who, even just for a second, has wondered if they should have gone to medical school, culinary school anything other than law school. Everyone who has ever sat down at the end of an evening and thought, "No one

More than most other books about the criminal law, this presentation focuses on "Learning Criminal Law as Advocacy Argument." In each criminal-law topic, it presents in building-block form the limited repertoire of core issues and related arguments so that you can concentrate on learning and practicing those that your professor has stressed in class, in her materials, and on her old exams. You can know the issues on the exam before you go into the exam room. In each criminal-law topic there is a limited repertoire of core issues that must be identified and then resolved with advocacy argument. This pattern of issues and arguments arises from embedded and recurring factual patterns and the resulting criminal law performance of prosecutors, defense lawyers, and trial and appellate judges over decades and even centuries. Your professor presents only some of the core issues and related arguments from these repertoires in her course and on her criminal-law exam. Thus, you can systematically learn the set of core issues and arguments in each topic presented by your and know the issues before you go into the exam room. The exam then presents no surprises. What do you mean by resolving the core issues "with advocacy argument?" Identifying the core issues from your professor's course is the first critical task. The second critical task is resolving these issues with advocacy

# Online Library Planet Law School li What You Need To Know Before You Go But Didnt Know To Ask And No One Else Will Tell You Second Edition

argument. Advocacy argument is the lawyer's single-minded marshalling of the relevant facts and doctrine that are necessary to resolve the identified issues in favor of either the prosecution or defense. This book helps you with both tasks: identifying the exam issues and resolving them.

to do with the Sun, Moon, Stars, Water, Mars, Jupiter, Aliens and most importantly - God About the book and author \_\_\_\_\_ God is real. And for the first time, experimental and observable science reveals his existence. Throughout history, many have argued the existence of God, yet discussions of the Divine have been limited to the realm of philosophy and religion. But what if nature could reveal its creator? And what if science could provide compelling evidences that we have never seen before? What if the identity of the creator behind the origin of our universe can be known for certain? What if This is what The Ambassador of God, a ground breaking look at our cosmic origin, has provided. In this probing book, difficult questions are answered. As renowned scientists and thinkers challenge the biblical narratives for our cosmic origin, The Ambassador of God uncovers the mysteries that have been hidden from human eyes. Using compelling evidences from astronomy to investigate the underpinnings of the Bible, The Ambassador of God provides a 'cosmic objective certainty' for the existence of a universal Creator. Additionally, it unveils a well of exhaustive insights that eliminates ambiguities in our understanding. How is it possible that God is one and three distinct persons, but not three Gods? Why is the earth and the human body mostly water? Who created the sun, moon and stars? What about aliens and the other solar planets? What is the mystery and purpose behind human existence and other life forms on our planet earth? Why are we here and how did we first arrive on this planet? How do we come to understand divinity in the current scheme of scientific reasoning? How do we make peace with the grand

designer behind it all? Readers seeking answers to these questions (and other similar questions) will find them here. They will not find dogma. Instead, they will embark on a journey-an experimental voyage through the lens of science that reveals the mind of God. In a "show" rather than "tell" fashion and a template that's more coherent than any prevailing secular science view, we shall find who God is! Who is the Author? Olumide Sanya is a contemporary poet and writer. Beside poetry and writing, Lumi, as he is affectionately known, helps others to achieve their dreams as a life coach. Unusually drawn to books between the ages of 4 - 9, Lumi neither enjoyed reading nor read books but spent his childhood years looking for abandoned tomes that he turned into a formidable collection. Despite being a non-reader, he realised the dream of becoming a writer in his tender years and for more than 12 years, he abandoned this dream. Until one day, God paid him a visit. But it didn't start there, it began with falling in love and writing poems about love and heartbreaks but that's another story for another year. "God has a sense of humor," says Lumi. "It's not hard to see that if you know my story-where I've been, where I'm at, and what God has planned for my tomorrow. What is most important to recognize is what God can do with a 'nobody' like me." The Ambassador of God, he notes, is not just about answers to large existential questions "It is also a road map that offers optimism and guidance in today's confused and increasingly complex modern world." You don't have to be a physics professor or a philosopher to understand Sanya's work. The Ambassador of God aims to open discussion and understanding at the broadest

## **The African American Law School Survival Guide**

Now that Trump has turned the United States into a global climate outcast, will China take the lead in saving our planet from environmental catastrophe? Many signs point to yes. China, the world's largest carbon emitter, is leading a global clean energy revolution, phasing out coal consumption and leading the development of a global system of green finance. But as leading China environmental expert Barbara Finamore explains, it is anything but easy. The fundamental economic and political challenges that China faces in addressing its domestic environmental crisis threaten to derail its low-carbon energy transition. Yet there is reason for hope. China's leaders understand that transforming the world's second largest economy from one dependent on highly polluting heavy industry to one focused on clean energy, services and innovation is essential, not only to the future of the planet, but to China's own prosperity.

Heathen Earth: Trumpism and Political Ecology looks beyond the rising fortunes of authoritarian nationalism in a fossil-fueled late capitalist world to encounter its conditions. Trumpism represents an alternative to the forces undermining the very cosmology of the modern West from two opposing directions. The global economy, the pinnacle of modernization, has brought along a dark side of massive inequality, corrupt institutions, colonial violence, and environmental destruction, while global warming, the nadir of modernity, threatens to undo the foundations of all states and all markets. To the vertigo of placelessness, symptomatic of globalization, is added the ecological vertigo of landlessness. With reality slowly fragmenting, it is

# Online Library Planet Law School li What You Need To Know Before You Go But Didnt Know To Ask And No One Else Will Tell You Second Edition

only too obvious in this light that Trumpism and other nationalist movements would attract massive hordes of supporters. Promising to expel foreigners and to restore unity and equality by taking power back from the global elites, while utterly denying the climate science that calls ordinary means of subsistence and consumption radically into question, Trumpism can be seen as an antidote to the toxic combination of global markets and global warming. The irony, of course, is that Trumpism only responds to these dangers by doubling down on the reckless expansionist logic that gave rise to them in the first place. This book, composed entirely between November 8, 2016 and January 20, 2017, examines Trumpism according to its regime of political representation (despotism), its political ontology (nativism), and its political ecology (geocide), while laying the groundwork for an alternative politics and a resistant, responsive ecology of the impossible. ## **Trisphere**

"The Thomas Jefferson School of Law originated in the 1960s as the San Diego branch campus of a for-profit, non-ABA accredited Orange County law school that served principally part-time evening students.

Although it was proud of educating working adults and produced some outstanding alumni, its attrition rates ranged between 50 and 75 percent and its pass rate on the California bar exam sometimes fell below 25 percent. In a half dozen years during the 1990s, the law school radically transformed itself. It separated from its parent, adopted a new name, became the first for-profit law school to gain ABA accreditation, and converted to a nonprofit.

Admissions applications soared tenfold resulting in a nationally based student body second in California only to Stanford's for geographic diversity, the academic dismissal rate dropped below 10 percent and its California bar pass rate climbed above 75 percent. Graduates received offers from prestigious law firms in New York, Los Angeles and other cities. The law school was ranked 5th in the nation for the quality of academic life and 55th worldwide for the number of its faculty publications downloaded by scholars and practitioners. This story demonstrates what can be achieved through a commitment to excellence and a belief that people matter."--Page [4] of cover.

In orbit on board the Colony Vessel Nelson Mandela, Matt Logan and his hard bitten squad of Deep Space Marine Corps veterans view the destruction of their home planet. The colony ship is manned only by a crew of inexperienced youngsters, the senior personnel spending a last night on Earth before embarking on the longest journey so far undertaken by Man. The vessel also contains a 'cargo' of 5,000 colonists, bound for the distant planet Eden, where they were due to set up a third colony. Hell Beyond Eden tells the story of Matt Logan and his struggle to preserve this precious remnant of human life that he is sworn to protect. As the home planet of humanity is destroyed beneath him, he launches the Nelson on its voyage to Eden, only to find that there are forms of hell other than that typified by the inferno below.

"When either animalists or environmentalists get together and talk about "issues" that are important to them, there is almost no overlap in the topics. There is always the common point, that some humans or corporations are causing the harms they are concerned about, but that is not particularly helpful to solving problems. So the groups go about their good

work without reaching out to others, as they seldom share priorities in a world of limited resources."--From the foreword by David S. Favre, Professor of Law & The Nancy Heathcote Professor of Property and Animal Law, Michigan State University College of Law This edited volume by Professor Randall S. Abate of Florida A&M University College of Law presents a collection of 17 chapters in an attempt to fill the gap--as illustrated above--between the complex legal issues that matter most to environmental law and animal law movements. Environmental law has a longer history and is more established than its animal law counterpart with intricate layers of international, federal, state, and local laws. Animal law currently faces many of the legal and strategic challenges that environmental law faced in seeking to establish a more secure foothold in U.S. and international law and, as such, stands to gain valuable insights from the lessons of the environmental law movement's experience in confronting those challenges. These chapters compare the very different trajectories of the regulatory history of both movements, examining the legal intersections that may exist across them. Prof. Abate draws on the talents of 22 experts in their fields from academia, non-profits, and the legal profession to examine the ways in which animal rights and welfare law can benefit from environmental law. The chapters address various contexts and perspectives from U.S. law, foreign domestic law, and international law on substantive issues including climate change, international trade and the environment, concentrated animal feeding operations, invasive species, lead pollution, and fisheries management, and procedural issues

including standing and damages. The book concludes with two chapters that offer a vision for the future regarding how animal law can learn from environmental law and how the two movements can better coordinate their common objectives. Reviews: "This is a path-breaking collection of thoughtful essays on the relationship between traditional environmental law and the emerging law of animal rights and welfare. Indeed these closely reasoned accounts show how intertwined are the strands of law that comprise these seemingly disparate fields. In a human dominated world the book is a useful reminder that hubris can lead to catastrophe for all forms of life on earth."--Patrick Parenteau, Professor of Law, Senior Counsel Environmental and Natural Resources Law Clinic, Vermont Law School "Professor Abate's book is an extremely valuable contribution. It's an excellent compendium of environmental laws and treaties pertinent to animal welfare, as well as lessons that the more developed field of environmental law may present for the emerging field of animal law."--Dr. Wil Burns Co-Executive Director, Forum for Climate Engineering Assessment and Chair, Environmental Law Section of the International Law Association "This book contains a valuable, well-written, and incisive collection of essays by outstanding experts in the fields of environmental and animal law. It deserves a place on the bookshelves of all animal rights and environmental law attorneys and anyone else who believes that our natural surroundings, and the living creatures which inhabit it, deserve to be valued and protected."--Joel Mintz, Professor of Law, Nova Southeastern University Shepard Broad Law Center "Always up for a challenge, Professor Abate has
