Retailers Choice Award winner, 2012 Abby Johnson quit her job in October 2009. That simple act became a national news story because Abby was the director of a Planned Parenthood clinic in Texas who, after participating in an actual abortion procedure for the first time, walked down the street to join the Coalition for Life. Unplanned is a heart-stopping personal drama of life-and-death encounters, a courtroom battle, and spiritual transformation that speaks hope and compassion into the political controversy that surrounds this issue. Telling Abby's story from both sides of the abortion clinic property line, this book is a must-read for anyone who cares about the life versus rights debate and helping women who face crisis pregnancies. Now updated with a new chapter covering the latest events in Abby's journey, in the news, and in changing legislation . . . and revealing the impact Abby's story has had in the most surprising places.

For anyone involved in, or thinking about, adopting a child from abroad, The International Adoption Handbook is an essential guide. The process of international adoption can sometimes seem complex, frustrating, and endless. This step-by-step guide, which provides the necessary hard facts and information — as well as support through the experiences of the author and others — will help smooth the way. After a general discussion of who may adopt and what restrictions may apply, the book goes into the nitty-gritty of what the process entails: choosing where to adopt and how to go about it; using an agency or facilitator; initiating the home study; assembling a dossier; working with the U.S. Immigration and Naturalization

Service; knowing the types of expenses that can be anticipated; and many other issues. In addition, the book provides up-to-date information on resources, including what is available today on the Internet, information that was previously difficult for adoptive parents to find out on their own. Equally informative are the author's interviews of a number of adoptive families whose stories are interspersed throughout the book. By sharing their experiences, they help to make the process work for others.

Where Does it Hurt?

With contributions from a range of leading international authors, this 'stop and make you think' book explores the many contemporary issues surrounding emotion work in reproductive healthcare. The editors, forerunners in their field, have brought together both theoretical and clinical aspects to challenge readers to consider the significance of this important topic in their day-to-day work. Using examples of maternity care and infertility settings from the UK and beyond, and with an emphasis on personal reflection throughout, the book explores the subjects of: • Emotional well-being • Client-practitioner relationships • Infertility • Loss • Breast feeding • Motherhood Emotions in Midwifery and Reproduction underlines the importance of emotions and how they are managed, experienced and negotiated in clinical settings, addressing issues that are frequently overlooked in the drive for efficiency and effectiveness in the health service. It is stimulating reading for all midwifery and nursing students and practitioners looking to understand their patients' and their own emotional needs.

This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

For ages 15 and up, a new psychological suspense "Unforgettable." --Sharon Sala, New York Times Bestselling Author She hid the secret from everyone, including herself. Sarah Hausman must hide a secret--even from herself. If she acknowledges the truth, it will destroy everyone she loves. Timid fourteen-year-old Sarah wants her controlling mother to stop prying into what happened the night of the freshman dance. Confess to the police? No way. Confide in her mother? Get real. The woman is too busy, too proud, and too jealous of Sarah to really care if her life disintegrates. Besides, her mother will say Sarah is totally to blame for what the boys did--which Sarah believes is true. So she doubly needs to shield the truth. Not just from Momma. But from everyone. Including herself. Beautiful, confident, eighteen-year-old Judith Murielle lives the ideal life. She has college plans, respect from family and friends, and a fiancé she adores. But as a mysterious connection pulls her toward Sarah, Judith's perfect world unravels. Acting as Sarah's sole confidante, Judith gains the power to expose her secret. Will the truth be worth the sacrifice? Or will Sarah stop at nothing to keep Judith quiet?

At age eight, Ramona Treviño climbed to the top of a roof and begged God to let her know he was real. After receiving a sign, she made a pact with herself to follow him always. But family difficulties and growing pains made it hard for her to continue on that path. Pregnant at 16, she dropped out of high school and entered an abusive marriage, which ended in divorce. Wanting to make a difference and to help girls in similar tough situations, she accepted a job as the manager of a Planned Parenthood facility in Sherman, Texas. Over time, however, Ramona began to grapple with whether she was doing women more harm than good, setting her on a path to seek the truth, no matter where it might lead. Realizing she could no longer refer women for abortions or provide them with false assurances of risk-free sex, Ramona took a leap of faith and left the financial security of her job. Her ultimate conversion involved a full return to the Catholic faith of her childhood and a new role as a pro-life advocate and speaker. This compelling story tells of Ramona's struggle to reconcile her identity as a daughter of God with a world that sends conflicting messages concerning the source of our dignity and happiness. It is the honest and heartfelt account of a woman who, with the help of grace, strove to overcome the wounds of her own past while becoming an agent of healing for others.

Shackles from the Grave

Unplanned

Twisted

Since the publication of the Institute of Medicine (IOM) report *Clinical Practice Guidelines We Can Trust* in 2011, there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy, developed in a transparent fashion, and based on a systematic review of the available research evidence. To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality (AHRQ), American Psychiatric Association (APA) has adopted a new process for practice guideline development. Under this new process APA's practice guidelines also seek to provide better clinical utility and usability. Rather than a broad overview of treatment for a disorder, new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area. A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process, recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice, with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and easily. This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics, in the context of an initial psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation. Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care.

Third Grave Dead Ahead

Focus on the Family with Dr. James C. Dobson

For more than 50 years, relational or incarnational ministry has been a major focus in youth ministry. But for too long, those relationships have been used as tools—as

a means to an end—where adults try to influence students to accept, know, trust, believe, or participate in something. While our motives may be good, it's possible that by focusing on these goals, we're not ministering the whole person. When we choose not to engage in the full life of a student, we run the risk of failing them and our ministry. In this thoughtful and insightful book, Andrew Root challenges us to reconsider our motives and begin to consider simply being with and doing life alongside teenagers with no agenda other than to love them right where they are, by place-sharing. As he shares stories of his (and others') successes and failures in relational youth ministry, you'll find practical ideas to help you recreate the role of relationships in your youth ministry. If you're involved in the lives of teenagers, whether as a youth pastor, volunteer youth worker, church leader, or parent, you'll want to read this book and work together to discover the value of place-sharing in the lives of teens. You'll see that it's time to tear down the old structure of relational youth ministry and start again.
