Constitutional Change in the Contemporary Socialist World

After the collapse of the Soviet bloc, there are only five socialist or communist countries left in the world - China, Cuba, Laos, North Korea, and Vietnam - which

constitute about one-quarter of the world's population. Yet, there is little scholarship on their constitutions. These countries have seen varying socioeconomic changes in the decades since 1991, which have led in turn to constitutional changes. This book will investigate, from a comparative and interdisciplinary perspective, how and why the constitutional systems in these five countries have changed in the last three decades. The book then breaks the constitutional changes down into four questions: what are the substantive contents of constitutional change, what are the functions, what are the mechanisms, and what are the driving forces? These questions form a framework to process the changes the five countries have gone through, such as making new constitutions, amending current ones, introducing more rights, allowing citizens to engage in changes, enacting legislation, and defining the constitutional authority of the three state branches and their relationship with the Communist Party. While all five countries have adapted their constitutional systems, the degree, mechanisms, and influential factors are not identical and present considerable variations. This book examines and explores these differences and how they developed. *Constitutional Change in the Contemporary Socialist World* offers a comprehensive and holistic view of an understudied and overlooked area of constitutional law, essential for anyone studying or working in law, politics, or policy.

This publication provides brief information on major instruments, procedures and mechanisms to protect human rights, principal events (international conferences, decades, years, days, etc.), and institutions dealing with human rights. It is dedicated to the tenth anniversary of the World Conference on Human Rights, held in Vienna, Austria, in 1993. It is also a contribution to the United Nations Decade for Human Rights Education (1995-2004), which is aimed at the building of a universal culture of human rights. The publication contains about 600 entries and is designed for all those who are concerned about and interested in human rights, primarily educators, students, human rights activists and mass media professionals. Its purpose is to better orient them in the international system of promotion and protection of human rights, based on international human rights law.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Corporate Governance and Capital Flows in a Global Economy

Prevention is recognized as a cornerstone of international environmental law, but this principle remains abstract and elusive in terms of exactly what is required of states to prevent environmental harm. In this illuminating work, Leslie-Anne Duvic-Paoli addresses this issue by offering a systematic, comprehensive assessment in which she clarifies the rationale, content, and scope of the prevention principle while also placing it in a wider legal context. The book offers a detailed analysis of treaty law, custom codification works, and case law before culminating in a conceptualization of prevention based on three definitional traits: 1. Its anticipatory rationale; 2. Its due diligence content; and 3. Its wide spatial scope to protect the environment as a whole. This book should be read by anyone seeking to understand the evolving principle of prevention in international environmental law, and how it increasingly shares common ground with reparation in the arena of

compliance control.

Manual for Courts-Martial United States

James Hickey proceeds from the premise that throughout history, humans have demonstrated a proclivity for using violence against one another as a means to achieve an end, means enabled, in many respects, by the technologies available at the time. Advancing technology has often been a prime enabler of ever-increasing levels of violence and attendant human suffering. At a few junctures in history, however, certain technologies have seemingly provided the armed forces that possess them the ability to fight wars with decreasing levels of violence and suffering. Today, precision-guided munitions (PGMs) with their high degree of discrimination and accuracy again hold such promise. This book seeks to answer the question: Do PGMs mitigate suffering in war, and have these weapons changed the way decisions regarding war and peace have been made? Answering this

question helps us understand possible shifts in emphasis in modern warfare, both in terms of methods employed and of the greater concern placed on limiting human suffering during conflict. This book will help students of ethics, just war and military history and senior military and civilian leaders to understand the possible outcomes and wider implications of their strategic choices to use such technology.

Mr. Asamoah's book is concerned with an area of growing importance in the evolution of contemporary international law. The traditional division of the sources of International law into custom and treaties has already been supplemented in Article 38 of the Statute of the International Court of Justice by the "general principles of law recognized by civilized nations" and-as subsidiary sources, the judicial decisions and the teachings of highly qualified publicists. But in order to cope with the diversity of international law in our time, we have to look to a far greater variety of sources of international law, and we shall have to recognize that, in accordance with the many-sided character of international law, these sources may vary greatly in intensity. In recent years, Declaratory Resolutions of the General Assembly have been much concerned with the general principles of international law. Sometimes these Declarations are interpretations of the Charter and other instruments; sometimes they are evidence of state practice and a developing customary international law ; sometimes they formulate new principles which, in some cases will eventually lead to international treaties or new custom, or in other cases will be accepted as authoritative statements of international legal

principles, in circumstances where a formal treaty cannot be attained. There are many reasons--often of an internal character--which prevent the conclusion of a treaty but not the acceptance of the principles contained in it.
