#### Simulation Using ProModel

Kantowitz, Roediger, and Elmes, all prominent researchers, take an example-based approach to the fundamentals of research methodology. The text is organized by topic--such as research in human factors, learning, thinking, and problem solving--and the authors discuss and clarify research methods in the context of actual research conducted in these specific areas. This unique feature helps students connect the concepts of sound methodology with their practical applications. Carefully selected real-world examples allow students to see for themselves the issues and problems that can occur in conducting research. More importantly, students develop a sense of how to anticipate and adjust for problems in their own research. #### Three Nights of Sin

Despite the West's growing involvement in Muslim societies, conflicts, and cultures, its inability to understand or analyze the Islamic world threatens any prospect for East-West rapprochement. Impelled by one thousand years of anti-Muslim ideas and images, the West has failed to engage in any meaningful or productive way with the world of Islam. Formulated in the medieval halls of the Roman Curia and courts of the European Crusaders and perfected in the newsrooms of Fox News and CNN, this anti-Islamic discourse determines what can and cannot be said about Muslims and their religion, trapping the West in a dangerous, dead-end politics that it cannot afford. In *Islam Through Western Eyes*, Jonathan Lyons unpacks Western habits of thinking and writing about Islam, conducting a careful analysis of the West's grand totalizing narrative across one thousand years of history. He observes the discourse's corrosive effects on the social sciences, including sociology, politics, philosophy, theology, international

relations, security studies, and human rights scholarship. He follows its influence on research, speeches, political strategy, and government policy, preventing the West from responding effectively to its most significant twenty-first-century challenges: the rise of Islamic power, the emergence of religious violence, and the growing tension between established social values and multicultural rights among Muslim immigrant populations. Through the intellectual "archaeology" of Michel Foucault, Lyons reveals the workings of this discourse and its underlying impact on our social, intellectual, and political lives. He then addresses issues of deep concern to Western readers—Islam and modernity, Islam and violence, and Islam and women—and proposes new ways of thinking about the Western relationship to the Islamic world.

## **Five Plays**

This book teaches you how to master the subtle art of multilingual text processing and prevent text data corruption. It provides an introduction to natural language processing using Lucene and Solr. It gives you tools and techniques to manage large collections of text data, whether they come from news feeds, databases, or legacy documents. Each chapter contains executable programs that can also be used for text data forensics. Topics covered: Unicode code points Character encodings from ASCII and Big5 to UTF-8 and UTF-32LE Character normalization using International Components for Unicode (ICU) Java I/O, including working directly with zip, gzip, and tar files Regular expressions in Java Transporting text data via HTTP Parsing and generating XML, HTML, and JSON Using Lucene 4 for natural language search and text classification Search, spelling correction, and clustering with Solr 4 Other books on text processing presuppose much of the material covered in this book. They gloss over the details of transforming text from one format to another and assume perfect input data. The messy reality of raw text will have you reaching for this book again and again.

## **Metal Lead Guitar**

In a stand-alone series set in the world of Muirwood, eighteen-year-old Maia is the exiled princess of Comoros and heir to the throne. As a result of her father's ceaseless need for authority, she was left disinherited and forced to live as a servant in her enemy's home. When the king invites chaos into the land by expelling the magical order known as the Dochte Mandar, Maia finds herself on a perilous quest to save her people. To survive, she must use magic she has learned in secret--despite the fact that women are forbidden to control it. Hunted by enemies at every turn, Maia realizes that danger lurks within her, too. Her powers threaten to steal not only her consciousness but also her sense of right and wrong. Can she set herself free and save the realm she loves--even if that realm has forgotten her?

Who Killed Change? Solving the Mystery of Leading People Through Change Every

day organizations around the world launch change initiatives—often big, expensive ones—designed to improve the status quo. Yet 50 to 70 percent of these change efforts fail. A few perish suddenly, but many die painful, protracted deaths that drain the organization's resources, energy and morale. Who or What Is Killing Change? That's what you'll find out in this witty whodunit. The story features a Columbo-style detective, Agent Mike McNally, who's investigating the murder of yet another change. One by one, Agent McNally interviews thirteen prime suspects, including a myopic leader named Victoria Vision; a chronically tardy manager named Ernest Urgency; an executive named Clair Communication, whose laryngitis makes communication all but impossible; and several other dubious characters. The suspects are sure to sound familiar and you're bound to relate them to your own workplace. In the end, Agent McNally solves the case in a way that will inspire you to become an effective Change Agent in your own organization. A step-by-step guide at the back of the book shows you how to apply the story's lessons to the real world. Key questions help you evaluate the health of your organization's change initiatives, and you'll learn best practices for enabling and sustaining the desired change.

## **The Banished of Muirwood**

At what price does independence come? Lady Jane Prentice, orphaned daughter of an English earl, arrives in Charlestown, South Carolina, in 1776, and finds herself plunged into the middle of a heated war--a war not only between her former country and her new home, but also between the members of her own family, whose loyalties are strongly divided in America's fight for freedom. Torn by family responsibilities, the brutality of war, a secret romance, and her own growing need for independence, Jane is forced to adopt many roles, until she finds the courage to become the person she wants to be: just Jane.

Electrical Installation Technology, Third Edition covers a wide range of subjects about electrical science, installations, and regulations. The book presents chapters tackling general principles and information about electromagnetism, inductance, static electricity, D.C. and A.C. circuits, and voltage drop and recurrent rating. The book describes distribution, wiring techniques, D.C. generators and motors, A.C. motors, and transformers. The importance of power-factor improvement, earthing and earth-leakage protection, and testing are also considered. The latter part of the book describes communication systems and equipment, such as batteries, cells, call systems, alarms, and electronics. The book concludes with a chapter dealing with important topics under site and office management. This book will serve as a textbook for students taking the Electrical Installation Technicians and Electrical Technicians Courses, and will also benefit electrical engineers.

## **Federalism and Rights**

When photographer Karan Seth comes to Bombay intent on immortalizing a city charged by celebrity and sensation, he is instantly drawn in by its allure and cruelty. Along the way, he discovers unlikely allies: Samar , an eccentric pianist;

Zaira, the reclusive queen of Bollywood; and Rhea, a married woman who seduces Karan into a tender but twisted affair. But when an unexpected tragedy strikes, the four lives are irreparably torn apart. Flung into a Fitzgeraldian world of sex, crime and collusion, Karan learns that what the heart sees the mind's eye may never behold. Siddharth Dhanvant Shanghvi's *The Lost Flamingoes of Bombay* is a razor sharp chronicle of four friends caught in modern India 's tidal wave of uneven prosperity and political failure. It's also a profoundly moving meditation on love's betrayal and the redemptive powers of friendship.

Revolutionary hydroponic/soilless advances are being achieved by efficiently improving results with the application of new concepts, methods, and equipment. The new edition of a bestseller, *Hydroponics: A Practical Guide for the Soilless Grower* has been revised to reflect these advances with new chapters that provide essential information on greenhouse design, function, and methods for crop production and management. With approximately 40% additional material in the second edition, the book is a state-of-the-art, comprehensive guide. The second edition begins with the concepts of how plants grow and then describes the requirements necessary to be successful when using various hydroponic and soilless growing methods. The major focus is on the nutritional requirements of plants and how best to prepare and use nutrient solutions for different plants using various growing systems under a wide range of environmental conditions. Supported by a wealth of tables, figures, and nutrient formulas the book provides clear explanations of the advantages and disadvantages of each hydroponic growth system. Appropriate for a wide audience, this edition is a practical guide, overview, and handy reference for advanced hobbyists, commercial growers, and researchers.

## **A Patchwork Family**

"Citizen Coke demonstrate[s] a complete lack of understanding about . . . the Coca-Cola system—past and present." —Ted Ryan, the Coca-Cola Company How did Coca-Cola build a global empire by selling a low-price concoction of mostly sugar, water, and caffeine? The easy answer is advertising, but the real formula to Coke's success was its strategy, from the start, to offload costs and risks onto suppliers, franchisees, and the government. For most of its history the company owned no bottling plants, water sources, cane- or cornfields. A lean operation, it benefited from public goods like cheap municipal water and curbside recycling programs. Its huge appetite for ingredients gave it outsized influence on suppliers and congressional committees. This was Coca-Cola capitalism. In this new history Bartow J. Elmore explores Coke through its ingredients, showing how the company secured massive quantities of coca leaf, caffeine, sugar, and other inputs. Its growth was driven by shrewd leaders such as Asa Candler, who scaled an Atlanta

soda-fountain operation into a national empire, and “boss” Robert Woodruff, who nurtured partnerships with companies like Hershey and Monsanto. These men, and the company they helped build, were seen as responsible citizens, bringing jobs and development to every corner of the globe. But as Elmore shows, Coke was usually getting the sweet end of the deal. It continues to do so. Alongside Coke’s recent public investments in water purification infrastructure, especially in Africa, it has also built—less publicly—a rash of bottling plants in dangerously arid regions. Looking past its message of corporate citizenship, Elmore finds a strategy of relentless growth. The costs shed by Coke have fallen on the public at large. Its annual use of many billions of gallons of water has strained an increasingly scarce global resource. Its copious servings of high-fructose corn syrup have threatened public health. Citizen Coke became a giant in a world of abundance. In a world of scarcity it is a strain on resources and all who depend on them.

## **Citizen Coke: The Making of Coca-Cola Capitalism**

Eloise Ristad deals here with complex problems which torment and cripple so many of our most creative and talented people, and she does so with compassion, wisdom, and wit. The problem of stage fright, for instance, is a suffering of epidemic proportions in our society, and involves modalities of thought and projections that rob spontaneity and enthusiasm in artistic performance. Those interested in creative education have long felt that an entirely new, holistic and

nurturing process of allowing individuals to discover and express themselves is needed if our educational system is to avoid the neuroses and creative blocks of the past generation. This book illuminates through its conversational style the destructive inhibitions, fears, and guilt experienced by all of us as we fail to break through to creativity. This story is told to me day after day in conservatories and college campuses around the world. Indeed I felt at times that she was telling of my own most petty and debilitating fears. But what is important, A Soprano on Her Head supplies answers and methods for overcoming these universal psychological blocks--methods that have not only been proven in her own studio, but which trace back through history to the oldest and wisest systems of understanding the integration of mind and body. The work bears scrutiny both scientifically and holistically. - Foreword.

The memoir of one of Pakistan's most prominent businessmen in exile 'I reached to see not the beautiful hotel that we had so lovingly built, but a war zone. . . . We found bodies of our dear guests, colleagues, friends: faces I recognized, faces I had worked with and smiled at. The sight that stunned me was the crater—60 feet wide

and 20 feet deep. It had been created by over 1000 kg of RDX. The hotel had not been attacked, it had been brutalized. Dead bodies and dismembered limbs, little pools of blood—it was a massacre. I had thought of myself as a hardened man who had seen violence and gristly sights—but what I saw that day left me shaken.’ Truth Always Prevails is the memoir of one of Pakistan’s most prominent businessmen, Sadruddin Hashwani, chairman of the internationally renowned Hashoo Group. From sleeping in the back of trucks in the cold deserts of Balochistan to now owning a brand of luxury hotels as well as numerous other businesses, Sadruddin Hashwani has led a remarkable life. He has struggled against corrupt politicians and uncooperative government officials to build and sustain an extensive business empire. He has faced near-death experiences, most remarkably the 2008 bombing of his own hotel, the Marriott Islamabad, and has overcome seemingly insurmountable odds. Filled with fascinating anecdotes and telling sketches of prominent Pakistani personalities, his is an extraordinary story that will inspire and entertain readers.

## **How Not to Be a Dick**

The authors of this engaging book discuss whether federalism promotes or undermines rights. With emerging democracies in Europe and elsewhere currently attempting to design constitutions that combine effective government, recognition of ethnic diversity within their populations, and protection of individual rights, the importance of these questions cannot be overstated. The authors examine both the theoretical perspectives on the relationship between federalism and rights, and the historical and contemporary relationship between federalism and rights in the United States. The contributors to this volume analyze the U.S. federal system as a potential model for contemporary constitution-makers as well as explore how its system can serve as a cautionary example. Sponsored by the Center for the Study of Federalism. Contributors include: Dorothy Toth Beasley; Irwin Cotler; Talbot Dälemberte; Daniel J. Elazar; A.E. Dick Howard; Gary J. Jacobsohn; Koen Lenaerts; Jean Yarborough; Michael P. Zuckert.

For undergraduate and graduate level Management Skills, and Organizational Behavior courses, as well as for Executive Education for beginning through mid-level managers and professionals. This text's engaging and practical, yet research-based style is designed to help students achieve the success they desire. Specifically, the ideas, tools, and techniques help students enhance their effectiveness (ability to achieve results), career potential (e.g., marketability, salaries, promotions, job satisfaction and job choice), and general well-being (e.g., happiness, health, work-life "balance"). As with the first edition, this second edition is based on the compelling assumptions that (1) IQ is not a big predictor of success and (2) the most successful people work smarter, not only harder, than less successful people. Students appreciate this book not only because it is written in an engaging and practical style, but because it provides them with many tools that will help them work smarter immediately, as well as in the long term. Instructors appreciate this book because it effectively translates solid research into concepts and tools that students find interesting and immediately useful.

It is the eve of destruction. Gaul seethes and bucks more than ever in revolt against the Roman invader, with even Caesar's allies beginning to question their loyalty. A conspiracy of Druids and Kings move the pieces into position in their great game of independence, all led by the powerful Arverni exile Vercingetorix. The lands of the Belgae burn in the vengeful aftermath of a winter that saw countless Romans butchered by the rebel Eburone King: Ambiorix. As Rome similarly begins to show its cracks and the triumvirate of powerful men that have held together the crumbling Republic move ever further apart, so Fronto returns to the army, once more seeking his command under the great general. But Caesar has made a vow to men and Gods alike to end the life of Ambiorix, and naught will stand in the way of that vow's completion - not Gaul, nor Roman, nor reason itself. As the world climbs towards the impending cataclysm, Fronto finds himself thrust with a small group of companions into the gloomy and dangerous sacred forest of his enemy in a hunt for the one man who can halt the general's wrath and fulfill Caesar's vow.

On the one hand, nobody wants to be a dick. On the other hand, dicks are everywhere! They cut in line, talk behind our backs, recline into our seats, and even have the power to morph into trolls online. Their powers are impressive, but with a little foresight and thoughtfulness, we can take a stand against dickishness today. *How Not to Be a Dick* is packed with honest and straightforward advice, but it also includes playful illustrations showing two well-meaning (but not always well behaved) young people as they confront moments of potential dickishness in their everyday lives. Sometimes they falter, sometimes they triumph, but they always seek to find a better way. And with their help, you can too.

## **Twist of the Fibers**

Mammals seek dominance because it stimulates their happy chemicals. An appetite for status develops as naturally as the appetite for food and sex. Status hierarchies emerge spontaneously as each individual strives to meet their needs and avoid harm. You would never think this way in words, but your mammal brain uses neurochemicals instead of words. When you understand the private lives of animals, your neurochemical ups and downs make sense. You have inherited the operating system that helped mammals thrive for millions of years. Nothing is wrong with us. We are mammals. You may say you're "against status." But if you filled a room with people who said they were anti-status, a hierarchy would soon form based on how anti-status they are. That's what mammals do. Our neurochemical ups and downs make sense when you look at the private lives of animals. The field notes of a primatologist are eerily similar to the lyrics of a country western song. A biology textbook resembles a soap opera script. The mammal brain cannot put its reactions into words, so the human cortex struggles to make sense of the limbic system it's attached to. We can finally make sense of our hybrid brain thanks to an accumulation of research in animal science and neuroscience. The frustrations of social hierarchies are not caused by "our society." We are simply heirs to the brain that helped mammals thrive for two hundred million years. It's not easy being human with a mammalian operating system. But when you understand the neurochemistry of mammals, you can stop focusing on our flaws and simply celebrate how well we do with the mental equipment we've got. Mammals live in groups for protection from predators, but group life can be frustrating. Some herd mates always seem to get the best mating opportunities and foraging spots. Fortunately, the mammal brain evolved to handle this. It releases stress chemicals when a mammal needs to hold back to avoid conflict. And it emits happy chemicals- serotonin, dopamine, oxytocin and endorphins, when a mammal sees a way to forge ahead and meet its needs.
