Homeownership Built to Last

Marketing Theory introduces and explains the role of theory in marketing by uncovering its histories, disciplinary underpinnings, subfields, discourses and debates. From strategy and ethics to digital marketing and consumer behaviour, leading marketing experts shine a light on what can be a challenging perspective of marketing. In this new Third Edition there are up-to-date examples from global companies such as Pepsi, Amazon and H&M; entirely new chapters on Digital and Social Media Marketing, and Service-Dominant Logic (SD-L) and contributions from Global Specialists including Bob Lusch, Patrick Murphy and Susan Hart. Ideal for Upper level undergraduate and postgraduate marketing students studying marketing theory, critical marketing, and the history of marketing modules.

Egypt in the Future Tense

Received document entitled: APPENDIX FOR RESPONDENT'S BRIEF

Pulp & Paper International

Against the backdrop of the revolutionary uprisings of 2011–2013, Samuli Schielke asks how ordinary Egyptians confront the great promises and grand schemes of religious commitment, middle class respectability, romantic love, and political ideologies in their daily lives, and how they make sense of the existential anxieties and stalled expectations that inevitably accompany such hopes. Drawing on many years of study in Egypt and the life stories of rural, lower-middle-class men before and after the revolution, Schielke views recent events in ways that are both historically deep and personal. Schielke challenges prevailing views of Muslim piety, showing that religious lives are part of a much more complex lived experience.

American Bee Journal

The new growth patterns and shifting wealth in the world economy fundamentally alter the basis for Western aid. This book demonstrates how Western development aid has been transformed over time, in particular in the 1990s, when the West enjoyed world hegemony. Western aid, once a helping hand to other countries'

development strategies, has increasingly been seen as a tool for large-scale attempts to transform states, societies and minds according to Western models. The authors claim that this has made aid more complex and less useful to poor countries in their fight against poverty. Emerging economies, such as China, have demonstrated that other paths to growth and poverty alleviation are available. They are attractive partners in development, offering collaboration without paternalism. Most poor countries experience growth, and are able to finance development with homegrown resources or in collaboration with non-Western partners. Having other options, they may increasingly challenge and reject Western aid if it is accompanied with goals of transforming the recipients based on Western blueprints. The authors claim that aid has a role in the fight against poverty in the future, but only if Western donors are willing to adapt to the new world order, leave paternalism behind and rethink their role in development. Donors must change the way they relate to poor sovereign states, redefine the meaning of 'development', and reinvent aid to make it simpler and more manageable.

Plant Science Catalog

The two volume-set, LNCS 7930 and LNCS 7931, constitutes the refereed proceedings of the 5th International Work-Conference on the Interplay between Natural and Artificial Computation, IWINAC 2013, held in Mallorca, Spain, in June

2013. The 92 revised full papers presented in LNCS 7930 and LNCS 7931 were carefully reviewed and selected from numerous submissions. The first part, LNCS 7930, entitled "Natural and Artificial Models in Computation and Biology", includes all the contributions mainly related to the methodological, conceptual, formal, and experimental developments in the fields of neurophysiology and cognitive science. The second part, LNCS 7931, entitled "Natural and Artificial Computation in Engineering and Medical Applications", contains the papers related to bioinspired programming strategies and all the contributions related to the computational solutions to engineering problems in different application domains, specially Health applications, including the CYTED "Artificial and Natural Computation for Health" (CANS) research network papers. In addition, this two volume-set reflects six interesting areas: cognitive robotics; natural computing; wetware computation; quality of life technologies; biomedical and industrial perception applications; and Web intelligence and neuroscience.

Parliamentary Papers

This book constitutes the refereed proceedings of the 10th International Conference on Integrated Formal Methods, IFM 2013, held in Turku, Finland, in June 2013. The 25 revised full papers presented together with 4 invited papers were carefully reviewed and selected from 84 full paper submissions. The papers cover the spectrum of integrated formal methods, focusing on refinement, integration,

translation, verification, reachability and model checking, usability and testing, distributed systems, semantics, and system-level analysis.

Integrated Formal Methods

The 2008 financial crisis was the worst since the Great Depression and many voices argued that it would transform global financial governance. Analysts anticipated a "Bretton Woods moment", referring to the 1944 conference that established the postwar international financial order. Widespread expectations of change were then reinforced by the creation of the G20 leaders' forum, extensive debates about the dollar's global role, the launching of international financial regulatory reforms, and the establishment of the Financial Stability Board. But half a decade later, how much has really changed? In *The Status Quo Crisis*, Helleiner surveys the landscape and argues that continuity has marked global financial governance more than dramatic transformation. The G20 leaders forum contributed much less to the management of the crisis than advertised. The US dollar remains unchallenged as the world's dominant international currency. The market-friendly nature of pre-crisis international financial regulation has been not overturned in a significant manner. And the Financial Stability Board has strengthened the governance of international financial standards in only very modest ways. What we are left with are some small-bore incremental changes that, collectively, have not fundamentally restructured the governance of the

global financial system. Helleiner argues that this strangely conservative result was generated partly by the structural power and active policy choices of the country at the center of the crisis: the United States. Status quo outcomes also reflected the unexpected weakness of Europe and conservatism of policymakers in large emerging market countries. Only if this distinct configuration of power and politics among and within influential states shifted in the coming years might the 2008 crisis leave a more transformative legacy over the longer term. Cutting against much of the received wisdom on offer today, *The Status Quo Crisis* will be essential reading for those interested in the politics of global finance and for anyone curious how expectations of change can be thwarted after even in the most dire of crises.

Annual Report

Annual Report

Western Aid at a Crossroads

Nursing Practice is the essential, textbook to support you throughout your entire

nursing degree, from your first year onwards. It explores all the clinical and professional issues that you need to know in one complete volume. Written in the context of the latest Nursing and Midwifery Council Standards for Pre-Registration Nursing Education and the Essential Skills Clusters, this book covers all fields of nursing: Adult, Child, Mental Health, Learning Disabilities and also Maternity care, in both acute and community settings. With full colour illustrations, and plenty of activities and user-friendly features throughout, this evidence-based text encompasses essential nursing theory and practice, providing students with information to support their success. Learning features in the book include: Hear it from the experts- tips and advice from real life nurses, patients and their carers, and student nurses Red Flags- alerting the student to potential dangers Primary Care Considerations- informs students about care issues in the community setting Fields boxes- giving further insight into other fields of nursing, making the book relevant to all fields of nursing practice Medicines Management boxes provide key information about medicines Self-assessment and activities throughout A companion website to this title is available at www.wileynursingpractice.com Here you'll find a range of resources for both the student and the lecturer, including: Over 350 interactive multiple choice questions Flashcards Glossary Links to references and further reading Illustrations from the book Worksheets

Dungeons of Dread is a hardcover collection of four classic, stand-alone Advanced Dungeons & Dragons(tm) adventure modules -- S1 Tomb of Horrors, S2 White Plume Mountain, S3 Expedition to the Barrier Peaks, and S4 The Lost Caverns of Tsojcanth -- complete with original black-and-white interior art.

Sessional Papers of the Dominion of Canada

The ups and downs in housing markets over the past two decades are without precedent, and the costs—financial, psychological, and social—have been enormous. Yet Americans overwhelmingly still aspire to homeownership, and many still view access to homeownership as an important ingredient for building wealth among historically disadvantaged groups. This timely volume reexamines the goals, risks, and rewards of homeownership in the wake of the housing bubble and subprime lending crisis. Housing, real estate, and finance experts explore the role of government in supporting homeownership, deliberate how homeownership can be made more sustainable, and discuss how best to balance affordability, access, and risk, particularly for minorities and low income families. The Selected Papers of Elizabeth Cady Stanton and Susan B. Anthony

Food security and climate change mitigation are crucial missions for the agricultural sector and for global work on sustainable development. Concurrently, agricultural production is directly dependent on climatic conditions, making climate change adaptation strategies essential for the agricultural sector. There is consequently a need for researchers, planners, and practitioners to better

understand how, why, and to what extent agriculture is vulnerable to climate change. Such analyses involve challenges in relation to the complex social-ecological character of the agricultural system and to the multiple conceptualizations and approaches used in analysing vulnerability. The aim of this thesis is to identify how vulnerability assessments can be used to represent climate-related vulnerability in Nordic agriculture, in order to advance the methodological development of indicator-based and geographic visualization methods. The following research questions are addressed: (i) How can agricultural vulnerability to climate change and variability in the Nordic countries be characterized? (ii) How do selections, definitions, and emphases of indicators influence how vulnerability is assessed? (iii) How do estimates of vulnerability vary depending on the methods used in assessments? (iv) How can geographic visualization be applied in integrated vulnerability assessments? This thesis analyses and applies various vulnerability assessment approaches in the context of Nordic agriculture. This thesis demonstrates that various methods for composing vulnerability indices result in significantly different outcomes, despite using the same set of indicators. A conceptual framework for geographic visualization approaches to vulnerability assessments was developed for the purpose of creating transparent and interactive assessments regarding the indicating variables, methods and assumptions applied, i.e., opening up the 'black box' of composite indices. This framework served as the foundation for developing the AgroExplore geographic visualization tool. The tool enables the user to

interactively select, categorize, and weight indicators as well as to explore the data and the spatial patterns of the indicators and indices. AgroExplore was used in focus group settings with experts in the Swedish agricultural sector. The visualization-supported dialogue results confirm the difficulty of selecting and constructing indicators, including different perceptions of what indicators actually indicate, the assumption of linear relationships between the indicators and vulnerability, and, consequently, that the direction of the relationship is predefined for each indicator. This thesis further points at the inherent complexity of agricultural challenges and opportunities in the context of climate change as such. It is specifically emphasized that agricultural adaptation policies and measures involve trade-offs between various environmental and socio-economic objectives, and that their implementation could furthermore entail unintended consequences, i.e., potential maladaptive outcomes. Nevertheless, it proved difficult to validate indicators due to, e.g. matters of scale and data availability. While heavy precipitation and other extreme weather events are perceived as the most relevant drivers of climate vulnerability by the agricultural experts participating in this study, statistical analyses of historical data identified few significant relationships between crop yield losses and heavy precipitation. In conclusion, this thesis contributes to the method development of composite indices and indicator-based vulnerability assessment. A key conclusion is that assessments are method dependent and that indicator selection is related to aspects such as the system's spatial scale and location as well as to indicator thresholds and defined

relationships with vulnerability, recognizing the contextual dependency of agricultural vulnerability. Consequently, given the practicality of indicator-based methods, I stress with this thesis that future vulnerability studies must take into account and be transparent about the principles and limitations of indicator-based assessment methods in order to ensure their usefulness, validity, and relevance for guiding adaptation strategies. För jordbrukssektorn och global hållbar utveckling i stort är matsäkerhet och mitigering av klimatförändringar viktiga angelägenheter. Samtidigt är jordbruksproduktionen ofta direkt beroende av klimatförhållanden, vilket gör klimatanpassningsstrategier mycket centrala för sektorn. Forskare, planerare och aktörer behöver förstå hur, varför och i vilken omfattning jordbruket är sårbart inför klimatförändringar. Sådana analyser inbegriper även de utmaningar som skapas genom jordbrukets komplexa socio-ekologiska karaktär, och de många utgångspunkter och tillvägagångssätt som används för att bedöma sårbarhet. Syftet med denna avhandling är att identifiera hur sårbarhetsbedömningar kan representera klimatrelaterad sårbarhet i nordiskt jordbruk, och i och med detta har avhandlingen som avsikt att utveckla metodologin för indikatorbaserade- och geografiska visualiseringsmetoder. Följande forskningsfrågor avhandlas: (i) Hur kan det nordiska jordbrukets sårbarhet inför klimatvariation och förändringar karaktäriseras? (ii) Hur påverkar urval, definitioner och betoningar av indikatorer bedömningar av sårbarhet? (iii) Hur varierar uppskattningar med bedömningsmetod? (iv) Hur kan geografisk visualisering användas i integrerade sårbarhetsbedömningar? För att svara på

dessa frågor analyseras och tillämpas olika tillvägagångssätt att bedöma sårbarhet inom nordiskt jordbruk. Avhandlingen visar att olika metoder för sårbarhetskompositindex resulterar i signifikanta skillnader mellan index, trots att samma indikatorer och data används. Ett konceptuellt ramverk för sårbarhetsbedömningar där geografisk visualisering används, har utvecklats för att möjliggöra transparens avseende till exempel. vilka variabler, metoder och antaganden som används i kompositindex. Detta ramverk har följaktligen legat till grund för att utveckla ett geografiskt visualiseringsverktyg – AgroExplore. Verktuget möjliggör interaktivitet där användaren kan välja, kategorisera och vikta indikatorer, och dessutom utforska data och spatiala mönster av indikatorer och kompositindex. AgroExplore användes i denna avhandling för att stödja fokusgruppdialoger med experter inom den svenska jordbrukssektorn. Resultaten från dessa workshops bekräftar svårigheten med att välja och skapa indikatorer. Dessa svårigheter innefattar olika uppfattningar om vad indikatorer representerar, antagandet om linjära samband mellan indikatorerna och sårbarhet, och följaktligen att sambandens riktning är fördefinierade för respektive indikator. Utöver de konceptuella och metodologiska utmaningarna med sårbarhetsbedömningar visar avhandlingen på komplexa svårigheter och möjligheter för jordbruket vid klimatförändringar. Särskilt framhålls att klimatanpassningspolitik och åtgärder inom jordbruket medför konflikter och avvägningar mellan olika miljö- och socio-ekonomiska mål. Implementering av sådana anpassningsåtgärder kan vidare innebära oönskade konsekvenser, så

kallad missanpassning. Trots ökad kunskap gällande nordiska jordbrukets sårbarhet inför klimatförändringar har det visats sig vara svårt att statistiskt validera indikatorer på grund av, exempelvis, skalproblematik och datatillgänglighet. Samtidigt som experterna ansåg att kraftig nederbörd och andra extrema väderhändelser är de mest relevanta drivkrafterna till klimatsårbarhet visar den statistiska analysen av historiska data på få signifikanta samband mellan förlorad skördeavkastning och kraftig nederbörd. Denna avhandling bidrar till metodutveckling av kompositindex och indikatorbaserade metoder för sårbarhetsbedömningar. En viktig slutsats är att bedömningar är metodberoende och att valet av indikatorer är relaterat till aspekter såsom systemets utbredning och den spatiala skalan av bedömningen. Även indikatorernas tröskelvärden och hur deras relation till sårbarhet är definierade anses vara viktiga faktorer som påverkar hur indikatorer representerar sårbarhet, vilket visar på sårbarhetsbedömningars kontextuella beroende. I och med de rådande bristerna hos indikatorbaserade metoder, som bland annat har identifierats i denna avhandling, vill jag framhålla vikten av att sårbarhetsbedömningar bör vara transparanta gällande den tillämpade metodens principer, antaganden och begränsningar. Detta för att säkerställa användbarhet, giltighet och relevans, om metoden och bedömningen ska ligga till grund för anpassningsstrategier hos såväl politiker, planerare och lantbrukare.

The Status Quo Crisis

The 2015 deadline to meet the targets of the Millennium Development Goals is fast approaching. There has been significant progress, but it is uneven. Meanwhile the context within which development goals are pursued has become much more challenging, visible in the recent food, fuel and financial crisis. Environmental degradation, demographic changes and persistent inequalities further threaten progress. This publication will discuss new directions and policies at the national and international level to achieve transformative change and sustainable development post-2015.

Current Update on Orthobiologics in Foot and Ankle Surgery, An Issue of Clinics in Podiatric Medicine and Surgery,

The 2015 International Conference on Water Resource and Environment (WRE2015) aims to provide a platform where scholars from different countries can exchange ideas, opinions and views. This book is divided into four main themes:1.

Hydrology and water resources; 2. Water pollution; 3. Water treatment methods, and 4. Freshwater ecosystems. Exploring to

Managing Social Change and Social Policy in Greater China

East Asia is at the heart of the global economic transformation, and the countries of the region are witnessing rapidly changing labour markets, alongside the pressure to cut production costs and lower taxes in order to become successful 'competition states'. These changes have resulted in increased welfare demands which governments, organizations and agencies across the region have had to address. This book examines welfare regimes in the Greater China region, encompassing mainland China, Hong Kong, Macao and Taiwan. In so doing, it explores the ways in which the rapid growth and internationalisation of the economy across Greater China is presenting new social policy challenges that governments, social welfare organizations and agencies in the region are having to respond to. Rather than simply describing and categorising welfare systems, the contributors to this volume add to our understanding of how one of the major economic transformations of the contemporary era in East Asia is shaping welfare provision in the region. In turn, in this context of economic change, they examine the new strategies and measures that have been adopted in order to reduce the heavy burden on the state in terms of welfare provision, whilst also attempting to diversify funding and provision sources to meet the pressing welfare needs. Based

upon extensive fieldwork by leading scholars of social policy, this book will appeal to students and scholars of Asian social policy, comparative development and social policy, social welfare and Chinese studies.

Mathematical Combinatorics, Vol. 2/2013

The “hush” of the title comes suddenly, when first Elizabeth Cady Stanton dies on October 26, 1902, and three years later Susan B. Anthony dies on March 13, 1906. It is sudden because Stanton, despite near blindness and immobility, wrote so intently right to the end that editors had supplies of her articles on hand to publish several months after her death. It is sudden because Anthony, at the age of eighty-five, set off for one more transcontinental trip, telling a friend on the Pacific Coast, “it will be just as well if I come to the end on the cars, or anywhere, as to be at home.” Volume VI of this extraordinary series of selected papers is inescapably about endings, death, and silence. But death happens here to women still in the fight. An Awful Hush is about reformers trained “in the school of anti-slavery” trying to practice their craft in the age of Jim Crow and a new American Empire. It recounts new challenges to “an aristocracy of sex,” whether among the bishops of the Episcopal church, the voters of California, or the trustees of the University of Rochester. And it sends last messages about woman suffrage. As Stanton wrote to Theodore Roosevelt on the day before she died, “Surely there is no greater monopoly than that of all men, in denying to all women a voice in the laws they are

compelled to obey.” With the publication of Volume VI, this series is now complete.

Dungeons of Dread: S Series Classic Adventure Compilation

Premodern and early modern yoga comprise techniques with a wide range of aims, from turning inward in quest of the true self, to turning outward for divine union, to channeling bodily energy in pursuit of sexual pleasure. Early modern yoga also encompassed countercultural beliefs and practices. In contrast, today, modern yoga aims at the enhancement of the mind-body complex but does so according to contemporary dominant metaphysical, health, and fitness paradigms. Consequently, yoga is now a part of popular culture. In *Selling Yoga*, Andrea R. Jain explores the popularization of yoga in the context of late-twentieth-century consumer culture. She departs from conventional approaches by undermining essentialist definitions of yoga as well as assumptions that yoga underwent a linear trajectory of increasing popularization. While some studies trivialize popularized yoga systems by reducing them to the mere commodification or corruption of what is perceived as an otherwise fixed, authentic system, Jain suggests that this dichotomy oversimplifies the history of yoga as well as its meanings for contemporary practitioners. By discussing a wide array of modern yoga types, from Iyengar Yoga to Bikram Yoga, Jain argues that popularized yoga cannot be dismissed--that it has a variety of religious meanings and functions. Yoga brands destabilize the basic utility of yoga commodities and assign to them new meanings

that represent the fulfillment of self-developmental needs often deemed sacred in contemporary consumer culture.

Natural and Artificial Models in Computation and Biology

Журнал основан в 2008 году К. В. Бабаевым и издаётся в России совместно Институтом языкознания Российской Академии наук и Российским государственным гуманитарным университетом (РГГУ). В США также издаётся издательством Gorgias Press. Журнал входит в состав списка научных изданий, рекомендованных ВАК РФ, в качестве одного из приложений «Вестника РГГУ». Два раза в год в свет выходят выпуски, содержащие в себе статьи на русском, английском, французском и немецком языках, научные рецензии, отчёты международных конференций по языкознанию.
