Tregaron's Daughter

Set in England and Italy in 1910, this is the story of a young English girl who by accident starts to unravel the unknown elements of her grandmother's past and is brought by the mystery to the faraway city of Venice. There, among the gondolas and canals, she slowly comes to comprehend the meaning of two strange and puzzling dreams-- dreams that seem to hold an eerie and menacing prophecy of the future.

The Paintings of Claude Monet

Rory Hendrix is the least likely of Girl Scouts. She hasn't got a troop or even a badge to call her own. But she's checked the Handbook out from the elementary school library so many times that her name fills all the lines on the card, and she pores over its surreal advice (Uniforms, disposing of outgrown; The Right Use of Your Body; Finding Your Way When Lost) for tips to get off the Calle: that is, the Calle de las Flores, the Reno trailer park where she lives with her mother, Jo, the sweet-faced, hard-luck bartender at the Truck Stop. Rory's been told that she is one of the "third-generation bastards surely on the road to whoredom." But she's determined to prove the county and her own family wrong. Brash, sassy, vulnerable, wise, and terrified, she struggles with her mother's habit of trusting the wrong men, and the mixed blessing of being too smart for her own good. From diary entries, social workers' reports, half-recalled memories, arrest records, family lore, Supreme Court opinions, and her grandmother's letters, Rory crafts a devastating collage that shows us her world even as she searches for the way out of it. Tupelo Hassman's Girlchild is a heart-stopping and original debut.

Mystical Landscapes

In May 1883 the French Impressionist painter Claude Monet settled with his family in Giverny, a small village on the Seine northwest of Paris. There, amidst the romantic garden landscape that Monet himself helped to design - including his own house and studio, greenhouses, ponds, and a Japanese-style bridge - the most fascinating and mature works of his last forty years came into being. In this volume Sagner-Duchting examines three important series that Monet painted in the immediate vicinity of Giverny: the Grain Stacks, the Poplars, and the Early Morning on the Seine series. In addition to providing a fascinating look at the influence of Giverny and its surroundings on his work, the author discusses Monet's innovative "open form, " exemplified by the paintings in his famous Waterlilies series. With these late works, Monet diverged from traditional pictorial ideas and came to be recognized as a pioneer of modern art.

Oxford Desk Reference: Oncology

This book distils and compiles all the literature on cancer into one concise volume containing all the essential, evidence-based clinical guidelines that an oncologist needs. The format allows for quick consultation whilst in the clinic or on the ward.

Secure Broadcast Communication

Case-Based Brain Imaging, Second Edition, an update of the highly regarded Teaching Atlas of Brain Imaging,provides full coverage of the latest technological advancements in brain imaging. It contains more than 150 cases that provide detailed discussion of the pathology, treatment, and prognosis of common and rare brain diseases, congenital/developmental malformations, cranial nerves, and more. This comprehensive case-based review of brain imaging will help radiologists, neurologists, and neurosurgeons in their training and daily practice. Key Features: More than 1,000 updated high-resolution images created on state-of-the-art equipment Advanced CT and MR imaging keeps readers current on imaging modalities Pathological descriptions clarify the pathophysiology of the disease Pearls and pitfalls help readers avoid common traps and aid in rapid interpretation Authors are world-renowned experts on brain imaging Radiology residents and neuroradiology fellows preparing for board exams and beginning practitioners will find this book an invaluable tool in learning how to correctly diagnose pathologies of the brain.

A Field Guide to Advanced Birding

Monet at Giverny

Powerful, flexible, and easy to use, Python is an ideal language for building software tools and applications for life science research and development. This unique book shows you how to program with Python, using code examples taken directly from bioinformatics. In a short time, you'll be using sophisticated techniques and Python modules that are particularly effective for bioinformatics programming. Bioinformatics Programming Using Python is perfect for anyone involved with bioinformatics -- researchers, support staff, students, and software developers interested in writing bioinformatics applications. You'll find it useful whether you already use Python, write code in another language, or have no programming experience at all. It's an excellent self-instruction tool, as well as a handy reference when facing the challenges of real-life programming tasks. Become familiar with Python's fundamentals, including ways to develop simple applications Learn how to use Python modules for pattern matching, structured text processing, online data retrieval, and database access Discover generalized patterns that cover a large proportion of how Python code is used in bioinformatics Learn how to apply the principles and techniques of object-oriented programming Benefit from the "tips and traps" section in each chapter

Bioinformatics Programming Using Python

Explains how to identify the most difficult species of birds

Girlchild

A member of Monet's family describes life at Giverny in the painter's day and shares family recipes.

Who Was Claude Monet?

Secure Broadcast Communication in Wired and Wireless Networks presents a set of fundamental protocols for building secure information distribution systems. Applications include wireless broadcast, IP multicast, sensor networks and webs, ad hoc networks, and satellite broadcast. This book presents and compares new techniques for basic operations including: *key distribution for access control, *source authentication of transmissions, and *non-repudiation of streams. This book discusses how to realize these operations both with high performance processors and resource constrained processors. It shows how to protect against adversaries who inject packets or eavesdrop. The focus is on functional descriptions rather than theoretical discussions. Protocols are presented as basic building blocks that can be combined with each other and traditional security protocols. The book illustrates these protocols in practice by presenting a real implementation that provides security for an ad hoc sensor network. This book can serve as a textbook or supplementary reading in graduate level courses on security or networking, or can be used for self study.

Monet's Table

The leading expert in the field brings the power of his experience and that of the world-renowned consulting firm Booz-Allen & Hamilton to reveal how buying smart can mean the difference between success and failure.

Case-Based Brain Imaging

Claude Monet (1840-1926) was a founder of French impressionist painting, and the most consistent and prolific practitioner of the movement's philosophy of expressing one's perceptions before nature, especially as applied to 'plein-air' landscape painting. The term Impressionism is derived from the title of his painting Impression, Sunrise (Impression, 'soleil levant').This book is the most comprehensive collection of Claude Monet's Paintings ever published, covering the artist's entire 64 years of creation; a keepsake for the connoisseur of fine art. On 484 pages, this book includes a detailed biography, a resume written by Monet himself (in English and French), and over 900 paintings on 460 colour plates (large format 8½ x 11 inches), as well as a special section of Monet's famous Water Lilies Series, and the Series of the London Parliament Buildings and Bridges. Monet's paintings obtain record prices at auctions. 'Le Pont du chemin de fer à Argenteuil,' an 1873 painting of a railway bridge spanning the Seine near Paris, was bought for a record $41.4 million at Christie's auction in New York on 6th May 2008. The previous record for Monet's painting stood at $36.5 million. 'Le basin aux nyphéas' (from the water lilies series) sold at Christie's 24 June 2008 for £40,921,250

($80,451,178) setting a new auction record for the artist.

Balanced Sourcing

This richly illustrated volume explores mystical themes in European, Scandinavian, and North American landscape paintings from the late 1800s to the early 1900s. This book features works by Emily Carr, Marc Chagall, Arthur Dove, Paul Gauguin, Lawren Harris, Wassily Kandinsky, Gustav Klimt, Piet Mondrian, Claude Monet, Edvard Munch, Georgia O'Keeffe, Vincent van Gogh and James McNeill Whistler, among others. Common to their work is the expression of the spiritual crisis that arose in society and the arts in reaction to the disillusionments of the modern age, and against the malaise that resulted in the Great War. Many artists turned their backs on institutional religion, searching for truth in universal spiritual philosophies. This book includes essays investigating mystical landscape genres and their migration from Scandinavia to North America, with a focus upon the Group of Seven and their Canadian and American counterparts. Accompanying an exhibition at the Art Gallery of Ontario and the Mus�e d'Orsay, this book offers a penetrating look at the Symbolist influence on the landscape genre.

Violin Mastery

Claude Monet is considered one of the most influential artists of all time. He is a founder of the French Impressionist art movement, and today his paintings sell for millions of dollars. While Monet was alive, however, his work was often criticized and he struggled financially. With over one hundred black-and-white illustrations, this book unveils a true portrait of the artist!
