out all about various types of birds, from birds of prey to tropical birds, and how a bird makes its nest. With exciting activities, including how to make a bird feeder, and plenty of fun facts, Nature Explorers Birds is a must for children curious about birds and keen to explore the world.

Spirals in Time

Provides over three hundred activities for young children both in and out of the classroom, organized thematically, and includes such themes as building and construction, health and nutrition, and science and nature.

Learning about Seashells

“For those of you—and your numbers are growing—gardening in drought-stricken parts of the country, *The Bold Dry Garden* will quench your thirst for inspiration.” —New York Times Book Review Ruth Bancroft is a dry gardening pioneer. Her lifelong love of plants led to the creation of one of the most acclaimed public gardens, The Ruth Bancroft Garden in Walnut Creek, California. *The Bold Dry Garden* offers unparalleled access to the garden and the extraordinary woman responsible for it. In its stunningly photographed pages, you’ll discover the history of the garden and the design principles and plant palette that make it unique. Packed with growing and maintenance tips, profiles of signature plants for a dry garden, and innovative design techniques, *The Bold Dry Garden* has everything you need to create a garden that is lush, waterwise, and welcoming.

Kermit the Hermit

Have fun learning about the mussel, scallop, razor clam, quahog, and 8 other shells while you illustrate fact-filled pages with their pictures.

Birds

In simple words and text, describes the sea urchin.

Another Encyclopedia of Theme Activities for Young Children

Provides detailed descriptions and illustrations for a variety of nature-related topics, including plants, animals, rocks, fossils, and seashells.

The Horn Book Guide to Children's and Young Adult Books

Describes and illustrates shells found in North America, including gastropods, chitons, and bivalves

More Fun with Nature

MATH AND SCIENCE FOR YOUNG CHILDREN, Eighth Edition, introduces readers to engaging math and science experiences for early childhood and early elementary education programs, and provides an organized, sequential approach to creating a

developmentally appropriate math and science curriculum. The content aligns with key guidelines and standards: The National Association for the Education of Young Children's (NAEYC) Professional Preparation Standards (2010); Developmentally Appropriate Practice (DAP) guidelines; Common Core Mathematics Standards; and Next Generation Science Standards (NGSS). The book also addresses STEM/STEAM and the essential domains of child growth and development during the crucial birth-through-eight age range. A valuable resource for the student/future teacher, working professional, or involved parent, **MATH AND SCIENCE FOR YOUNG CHILDREN** emphasizes the interrelatedness of math and science and how they can be integrated into all other curriculum areas. Peterson First Guide to Shells of North America

In *Origami Sea Life*, John Montroll and Robert J. Lang have collaborated to produce a truly elegant work. The pages of this book contain some of the most creative origami published to date. Each project is accompanied by a biological sketch of the animal to enhance the visual description. There are 38 models in all ranging from the lowly barnacle to the mighty whale. In between are to be found a cuttlefish, angelfish, lionfish, and fiddler crab, to name but a few of the unusual origami projects presented. Each project is illustrated with step-by-step instructions, utilizing the unique folds which make each of these animals so lifelike. Beginner and expert alike will find hours of creative fun in these pages. *Origami Sea Life* also includes a summary of the history of origami sea life. Information on types of paper and the technique of wet folding make this book indispensable for all those with an interest in papercraft.

Sea Urchins

Book Review Index provides quick access to reviews of books, periodicals, books on tape and electronic media representing a wide range of popular, academic and professional interests. Book Review Index is available in a three-issue subscription covering the current year or as an annual cumulation covering the past year.

Star of the Sea

Dive into this latest adventure featuring Tracker John and D.J., as they explore God's wonderful creation under the sea

Beachcombing

Young beachcombers will discover old and new ideas about collecting or just identifying their finds, and the book will appeal to those children who are looking for relaxing fun.

Starfish

Learning about Shells

Introduces different kinds of starfish, shells, and crabs, and tells how they live

Animals Grow New Parts

Children's Book Review Index

This book tells the amazing story behind seashells: how they are made by mollusks, used for protection and camouflage, and full of clues about all they've been through. Inspired by *Next Time You See a Seashell*, young readers will find these intricate objects even more fascinating when they discover their origins in slimy, snailly creatures. Awaken a sense of wonder in a child with these books and inspire elementary-age children to experience the enchantment of everyday phenomena such as seashells and sunsets."

Seashells

An introduction to sea shells, discussing the different types of shells, where they are found, and how they are made.

Math and Science for Young Children

After a mean, selfish crab is rescued by a boy, the crab searches for a way to repay the kindness. Suggested level: junior, primary.

What Lives in a Shell?

A day of beachcombing is a day filled with salty sea air, enchanting seashells, and exciting discoveries. The ocean holds so much beauty and adventure, and it leaves so many treasures on its shores. Let's explore these seaside treasures. An essential sea glass-hunting handbook for kids. With helpful advice, like "make sure no one's home!" before taking a snail shell, and fascinating facts, like how sea glass is formed and where glass fishing floats come from, the gentle and flowing text invites young readers to explore and wonder about everything that washes up on the sand. Author and illustrator Sarah Grindler's images are vivid and realistic, showing readers what to look for by the ocean--from purple sea urchin shells (that otters love to munch on) to mussel shells, sand dollars, and every colour of sea glass--and encouraging all of us to imagine where those treasures may have come from. A beautiful keepsake as well as a practical guidebook for the young beachcomber.

Seashells

Seashells are the sculpted homes of a remarkable group of animals: the molluscs. These are some of the most ancient and successful animals on the planet. But watch out. Some molluscs can kill you if you eat them. Some will kill you if you stand too close. That hasn't stopped people using shells in many ways over

Read Free Seashells Crabs And Sea Stars Take Along Guide Take Along Guides

thousands of years. They became the first jewelry and oldest currencies; they've been used as potent symbols of sex and death, prestige and war, not to mention a nutritious (and tasty) source of food. *Spirals in Time* is an exuberant aquatic romp, revealing amazing tales of these undersea marvels. Helen Scales leads us on a journey into their realm, as she goes in search of everything from snails that 'fly' underwater on tiny wings to octopuses accused of stealing shells and giant mussels with golden beards that were supposedly the source of Jason's golden fleece, and learns how shells have been exchanged for human lives, tapped for mind-bending drugs and inspired advances in medical technology. Weaving through these stories are the remarkable animals that build them, creatures with fascinating tales to tell, a myriad of spiralling shells following just a few simple rules of mathematics and evolution. Shells are also bellwethers of our impact on the natural world. Some species have been overfished, others poisoned by polluted seas; perhaps most worryingly of all, molluscs are expected to fall victim to ocean acidification, a side-effect of climate change that may soon cause shells to simply melt away. But rather than dwelling on what we risk losing, *Spirals in Time* urges you to ponder how seashells can reconnect us with nature, and heal the rift between ourselves and the living world.

It's a Seashell Day

Examines the characteristics and habits of different kinds of snakes, fish, spiders, insects, and other animals that use poison to defend themselves.

The North Carolina Historical Review

What was your favourite book as a child? In more than 10 years of facilitating workshops, we have never heard anyone reply, My fourth-grade science textbook. Clearly, textbooks have an important place in the science classroom, but using trade books to supplement a textbook can greatly enrich students experience. from *Teaching Science Through Trade Books* If you like the popular Teaching Science Through Trade Books columns in NSTA's journal Science and Children, or if you've become enamoured of the award-winning Picture-Perfect Science Lessons series, you'll love this new collection. It's based on the same time-saving concept: By using children's books to pique students interest, you can combine science teaching with reading instruction in an engaging and effective way. In this volume, column authors Christine Royce, Karen Ansberry, and Emily Morgan selected 50 of their favorites, updated the lessons, and added student activity pages, making it easier than ever to teach fundamental science concepts through high-quality fiction and nonfiction children's books. Just as with the original columns, each lesson highlights two trade books and offers two targeted activities, one for K-3 and one for grades 4-6. All activities are Standards-based and inquiry-oriented. From *Measuring Penny* and *How Tall, How Short, How Far Away?* to *I Took a Walk and Secret Place*, the featured books will help your students put science in a whole new context. *Teaching Science Through Trade Books* offers an ideal way to combine well-structured, ready-to-teach lessons with strong curricular connections and books your students just may remember, always.

Next Time You See a Seashell

Twelve accurately rendered sticker illustrations depict the mussel, scallop, razor clam, quahog, queen conch, and seven other shells. Easy-to-read descriptions are accompanied by numbered spaces for applying the matching sticker.

Seaside Treasures

INCLUSIVE EARLY CHILDHOOD EDUCATION: DEVELOPMENT, RESOURCES, AND PRACTICE, Sixth Edition, is a comprehensive special education resource book that provides essential information on a variety of early childhood learning disabilities, as well as strategies for including children with these special needs in regular educational settings. The author provides students with a solid grounding in theory and research, as well as practical guidelines, real-world vignettes, and hands-on program planning assistance to prepare them to integrate children with learning disabilities into their classrooms. Updated throughout, this edition also introduces videos that are available for viewing at the Early Childhood Education Media Library, allowing students to see text concepts brought to life in real classroom settings. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Middlesex County

Immerse yourself in the beachcombing experience; the wind in your face, the smell of salt spray, the roar of the ocean; it's an assault on the senses, the perfect tonic. From time immemorial people have been drawn to the beach to collect practical resources as well as mysterious objects that have fuelled myth and folklore - it is our inherent hunter-gatherer instinct. The beach strandline is also a wildlife habitat, home to a unique community of plants and animals, many found nowhere else. They create a rich and ever-changing oasis of life in the otherwise harsh environment of the beach. Whether you are a seasoned beachcomber, a casual visitor or an enthusiastic naturalist, this book is for you. It will satisfy your curiosity about each treasure found cast up on the beach, be it a pretty seashell or an exotic ocean voyager.

- Descriptions of common and rare beach finds, both natural and man-made
- Clear photographs showing objects and species as found on the strandline and in their natural habitat
- Suggestions for family activities related to beachcombing
- A comprehensive account of the living flora and fauna of the beach strandline
- Information on threats and conservation measures for the marine and coastal environment

Starfish, Seashells, and Crabs

Just 35 years after Jamestown was settled, Virginia colonists planted tobacco in nearby Middlesex County, an area strategically located between two major rivers and the Chesapeake Bay. Middlesex life has been closely tied to both land and water. From the commerce of the early steamboats to the modern oyster-farming industry, the waterways have provided an avenue for business and a bountiful harvest of crabs, fish, and oysters. The county's modern boating industry grew from a 19th-century wooden boatbuilding tradition. The center of that industry,

Read Free Seashells Crabs And Sea Stars Take Along Guide Take Along Guides

Deltaville, is known today as the "Boating Capital of the Chesapeake Bay." From the county's oyster heritage came Virginia's most famous celebration, the Urbanna Oyster Festival, which annually draws 60,000 people to the small waterfront town. Stately homes and churches that predate the Revolutionary War include Colonial Christ Church, which annually attracts hundreds of marines to the gravesite of Lt. Gen. Lewis Burwell "Chesty" Puller, the most decorated marine in the history of the United States Marine Corps, who retired to the county in 1955.

Sponges Are Skeletons

Follows a starfish as she hunts for her morning meal and escape from danger with one less ray than before.

Seashells by the Seashore

Home and School Reading and Study Guides

What makes a shell like a house? A house is a home for you, a nest is a home for a bird, and a cave is a home for a bear. But for some animals a shell is a home. Snails and turtles and crabs and clams all have shells that act as their homes and protect them from harm. In this book you'll learn all about these and other crustaceous creatures, for whom a shell is just the right sort of home.

The Bold Dry Garden

Prolific, award-winning nonfiction author Melissa Stewart reveals the surprising ways seashells provide more than shelter to the mollusks that inhabit them. Young naturalists discover thirteen seashells in this elegant introduction to the remarkable versatility of shells. Dual-layered text highlights how shells provide more than a protective home in this expository nonfiction exploration. The informative secondary text underscores characteristics specific to each shell. Elegant watercolor illustrations create a scrapbook feel, depicting children from around the world observing and sketching seashells across shores.

Seashells, Crabs and Sea Stars

Time to squeeze a skeleton! It's bath time, and your sponge is actually the skeleton of an animal that lived under the sea. Read on to find out how sponges use their special holes and tunnels to eat and breathe, and how you use these same holes and tunnels to soak up the water and rinse off the soap. Sploosh! Splash! Dribble! Did you know your bath sponge once lived in the sea? Sponges come in all shapes, colors, and sizes. Barbara Juster Esbensen and Holly Keller have paired an engaging text with funny, kid-friendly illustrations to reveal that a sponge is not just a bath toy. Sploosh! Splash! Dribble! Did you know your bath sponge once lived in the sea? Sponges come in all shapes, colors, and sizes. Barbara Juster Esbensen and Holly Keller have paired an engaging text with funny, kid-friendly illustrations to reveal that a sponge is not just a bath toy.

Book Review Index

The Essential Guide to Beachcombing and the Strandline

Origami Sea Life

Explores the world of seashells, crabs, sea stars, sand dollars, and other things to be discovered at the seashore.

Teaching Science Through Trade Books

Introduces beginning readers to different types of starfish while explaining how these unique-looking creatures eat, live, and survive in their underwater world.
