What is "New Hollywood"? The "art" cinema of the Hollywood "Renaissance" or the corporate controlled blockbuster? The introverted world of Travis Bickle or the action heroics of Indiana Jones, Buzz Lightyear, and Maximus the Gladiator? Innovative departures from the "classical" Hollywood style or superficial glitz, special effects, and borrowings from MTV? Wholesale change or important continuities with Hollywood's past? The answer suggested by Geoff King in *New Hollywood Cinema* is all of these and more. He examines New Hollywood from three main perspectives: film style, industry, and the social-historical context. Each is considered in its own right, sometimes resulting in different ways of defining New Hollywood. But one of the book's central arguments is that a combination of these approaches is needed if we are to understand the latest incarnations of the cinema that continues to dominate the global market. King looks at the Hollywood "Renaissance" from the late 1960s to the late 1970s, industrial factors shaping the construction of the corporate blockbuster, the role of auteur directors, genre and stardom in New Hollywood, narrative and spectacle in the contemporary blockbuster, and the relationship between production for the big and small screens. Case studies considered include *Taxi Driver*, *Godzilla*, and *Gladiator*, tracing the roots of New Hollywood from the 1950s to the start of the twenty-first century.

This book presents the first single source of detailed guidance for designers, specifiers and constructors of in-situ concrete industrial hardstandings. Despite the fact that in-situ concrete is used commonly as the construction material of industrial hardstandings, little guidance is available to the designer. In the past, industrial hardstandings have been engineered by adapting the methods and materials used in highways and industrial ground supported floors, often leading to the inappropriate use of materials and construction methods.

In the wake of 9/11 the threat of biological terrorism and sabotage has been thrust to the forefront of public consciousness. However, this is far from being a new phenomenon. From World War II onwards, the Cold War powers devoted considerable resources to developing what became known in the military as 'bugs and gas'. This groundbreaking study lifts the lid on the top-secret Department 12 of Directorate S (Special Operations) v the elite inner core of the KGB First Chief Directorate and its successor, the Russian Foreign Intelligence Service. During the 1980s and early 1990s the department encouraged biological espionage, the planning and preparation of biological terrorism and acts of sabotage. Their work was carried out primarily through 'illegals' v intelligence operatives who were secretly deployed to the West and covertly operated there, masquerading as citizens of Western countries under assumed names and cover stories. One of its top operatives, Alexander Kouzminov, has decided to break his silence and reveal in depth for the first time the department's tasks, plans and tactics. More disturbingly, he explores what others in the West and the developing world are and could be capable of. In this remarkable book we learn the secrets of the USSR's elite intelligence operatives v secrets which could prove vital in maintaining international security in today's uncertain political climate.

Why Write A New Think and Grow Rich? At first exposure the very idea of rewriting the greatest success classic of all time sounds like some fruit from California announcing he's re-written the Bible. However, looking at it correctly, wouldn't it be amazing if a "how-to" manual didn't need updating after 70 years of service? What other body of knowledge and practice has not progressed dramatically in the intervening years?! Can the science of personal achievement be any different? So what kinds of changes can you expect? Certainly modern advances in neuro-science, motivation, NLP, and quantum reality make it easier to grasp the secret, and have been included. Also, those uncomfortable "isms of an antique age" have been eliminated. You no longer have to be a white American male to achieve success..thus the language, quotes, examples and stories include, while retaining much of the familiar work, women, other races and nationalities. More accessible for young people, who need it most!

How Can I Ask God for Physical Healing?

Financial Management

Contemporary Japanese women are often presented as devoted full-time wives and mothers. At the extreme, they are stereotyped as "education mothers" (kyoiku mama), completely dedicated to the academic success of their children. Children of working mothers are pitied; day-care users, both children and mothers, are faintly disparaged for their inadequate home lives; hired babysitters are virtually unknown. Yet historical evidence reveals a strikingly different picture of Japanese motherhood and childcare at the beginning of the twentieth century. In contrast to today, child tending by non-maternal caregivers was widely accepted at all levels of Japanese society. Day-care centers flourished, and there was virtually no expectation of exclusive maternal care of children, even infants. The patterns of the formation of modern Japanese attitudes toward motherhood, childhood, child-rearing, and home life become visible as this study traces the early twentieth-century rise of Japanese day-care centers, institutions established by middle-class philanthropists and reformers to provide for the physical well-being and mental and moral development of urban lower-class preschool children. Day-care

gained broad support in turn-of-the-century Japan for several reasons. For one, day-care did not clash with widely accepted norms of child care. A second factor was the perception of public and private policymakers that day-care held the promise of social and national progress through economic and moral betterment of the urban lower classes. Finally, day-care offered working mothers the opportunity to earn a better livelihood with fewer worries about their children. In spite of emerging notions that total devotion to child-rearing was a woman's highest calling, Japanese nationalism, a signal force in the genesis of the modern Japanese state, economy, and middle-class culture, fed a deep wellspring of support for day-care and fostered significant reshaping of motherhood, childhood, home life, and view of the urban lower classes. Passages to Modernity is an important and original contribution to our understanding of the institutional and ideological reach of the early twentieth-century state and the contested emergence of a striking new discourse about woman as domestic caregiver and homemaker.

As part of the restructuring of the educational system in 1989, the Vietnamese government implemented policy changes such as promoting the establishment of "people's" and community educational institutions, permitting the establishment of private institutions and transforming public institutions into private ones. Since Vietnam has only recently moved from a centrally planned to a market economy, private schools are still relatively rare in Vietnam. This paper examines the nature of private schooling in Vietnam using data from the 1992-93 Vietnam Living Standards Survey.
