The Maze Runner Files (Maze Runner)

The Deadly Dance continues the tradition in M. C. Beaton's beloved Agatha Raisin mystery series—now a hit show on Acorn TV and public television. Bossy, impulsive, and unlucky in love, the all-too-human Agatha Raisin has proved to be a surprisingly effective---and endearing---amateur sleuth. But can Agatha make it as a private investigator? After getting mugged on vacation, in what she will always think of as the Paris Incident, she decides to find out. Agatha soon learns that running her own detective agency in the Cotswolds is not quite like starring in a Raymond Chandler movie. Instead of dames in distress with big shoulder pads, her clients are ladies with missing cats and a man whose son has run off with his car. Agatha even worries that she might be outclassed by her sixty-seven-year-old secretary, Emma Comfrey. But then wealthy divorcée Catherine Laggat-Brown walks in with their first "real" case. Mrs. Laggat-Brown's daughter has received a death threat, and when Agatha thwarts an attack on the girl at a dinner dance, she recognizes an opportunity to show what Raisin Investigations can do. Even better, the case gives her a chance to reunite with her long-absent friend, Sir Charles Fraith. As they scour the Cotswolds in search of leads, Charles' insights prove invaluable

and his charms irresistible, leading poor Emma to fall madly in love with him. As ever, Agatha bumbles her way through the case, trying her friends' patience and flirting shamelessly with the chief suspect. Will she put her tiny agency on the map, or has even the outrageous Agatha finally bitten off more than she can chew?

The Girl Who Could Move Sh*t With Her Mind

“Don’t make a sound,” I whisper. Peering through the shelves, I can’t take my eyes off the giant on the other side. It’s a creature with an oval-shaped head, a slender body, elongated arms, hands with pointy fingers, and long legs with which it takes big, silent steps. Like a two-legged spider, hunting for its prey. For first-time *Insomnia Saga* readers *A Nightprowler* marked her and covered her in scars that will forever stigmatize her as an outcast: *A Sleepwalker*. A year after the attack, thirteen-year old Jodi Collins starts working for the Summoners to keep herself and her parents alive in this new, brutal life of discrimination and hate. The Summoners are a worldwide army that have been fighting the Nightprowlers for centuries—and by working for them, Jodi will be forced to fight these creatures responsible for ruining her future. On a dark, wintery night, Jodi is sent on a mission to find a young missing boy. The clock is ticking—if she’s too late, he will end up the same as her. A toy store. A maze of dolls and monsters. Social Deviance

Books that explore science through adventure The Acadia Files: Book Two, Autumn Science presents five stories of fall, each one followed by Acadia's science notebook pages with her simple explanations and lively, whimsical drawings of natural phenomena. The Acadia Files is a fun introduction to the wonders of science, using real-world scenarios to make scientific inquiry relatable and understandable. Parents and educators can use The Acadia Files to let kids discover for themselves what it's like to be curious about the world and to satisfy that curiosity with scientific thinking. Acadia Greene wants answers. What happened to the frogs she used to see at her favorite local pond? Why do leaves change color in the fall, and why don't evergreen needles do the same? What is the water cycle, and what is transpiration? How do time zones work, and why does the sun set at different times in different places within a single zone? How do germs infect us? Acadia doesn't mean to do science, but she has questions and her parents refuse to simply give her the answers. "Conduct an experiment," they tell her. "Use the scientific method." So Acadia makes hypotheses, designs experiments, analyzes data, and draws conclusions. Acadia does science. The author, Katie Coppens writes a recurring column for NSTA's middle

From the author of *Hour of the Bees* comes another captivating story that deftly blurs the line between reality and magic — and will leave you wondering What if? The Loch Ness Monster. The Frogman. Bigfoot. Twelve-year-old Miranda Cho used to believe in it all, used to love poring over every strange footprint, every stray hair, everything that proved that the world was full of wonders. But that was before her mother's obsession with monsters cost Miranda her friends and her perfect school record, before Miranda found the stack of unopened bills and notices of foreclosure in the silverware drawer. Now the fact that her mom's a cryptozoologist doesn't seem wonderful — it's embarrassing and irresponsible, and it could cost them everything. So Miranda agrees to go on one last creature hunt, determined to use all her scientific know-how to prove to her mother, once and for all, that Bigfoot isn't real. Then her mom will have no choice but to grow up and get a real job — one that will pay the mortgage and allow Miranda to attend the leadership camp of her dreams. But when the trip goes horribly awry, will it be Miranda who's forced to question everything she believes?

From John D. MacDonald, one of the enduring American novelists of the twentieth century, comes a science fiction classic with a timeless premise. An aimless young man discovers a way to stop the world in its tracks—and that's when his life truly begins. Introduction by Dean Koontz Once an ordinary math teacher, Omar Krepps developed a knack for gambling, amassed a fabulous fortune, and spent the rest of his life traveling the world and giving away his millions. Upon his death, however, Krepps bequeaths nothing to his nephew and only living blood relative, Kirby Winter—nothing, that is, except an antique watch and a sealed letter to be opened after one year. But Kirby has much more in his possession than he realizes. The watch has the power to manipulate time. Not only does this revelation shed light on the mystery of his uncle's life, it puts Kirby on the path to unimaginable wealth and a new lease on love . . . as

Book of 2016 A Washington Post Best Memoir of 2016 A TIME and Entertainment Weekly Best Book of 2016 An illuminating debut memoir of a woman in science; a moving portrait of a longtime friendship; and a stunningly fresh look at plants that will forever change how you see the natural world Acclaimed scientist Hope Jahren has built three laboratories in which she's studied trees, flowers, seeds, and soil. Her first book is a revelatory treatise on plant life—but it is also so much more. Lab Girl is a book about work, love, and the mountains that can be moved when those two things come together. It is told through Jahren's remarkable stories: about her childhood in rural Minnesota with an uncompromising mother and a father who encouraged hours of play in his classroom's labs; about how she found a sanctuary in science, and learned to perform lab work done "with both the heart and the hands"; and about the inevitable disappointments, but also the triumphs and exhilarating discoveries, of scientific work. Yet at the core of this book is the story of a relationship Jahren forged with a brilliant, wounded man named Bill, who becomes her lab partner and best friend. Their sometimes rogue adventures in science take them from the Midwest across the United States and back again, over the Atlantic to the ever-light skies of the North Pole and to tropical Hawaii, where she and her lab currently make their home. Jahren's probing look at plants, her astonishing tenacity of spirit, and her acute insights on nature enliven every page of this extraordinary book. Lab Girl opens your eyes to the beautiful, sophisticated mechanisms within every leaf, blade of grass, and flower petal. Here is an eloquent demonstration of what can happen when you find the

stamina, passion, and sense of sacrifice needed to make a life out of what you truly love, as you discover along the way the person you were meant to be.
