### **The Curious Incident of the Dog in the Night-Time**

Getting someone to tell the truth is an essential skill that very few people possess. In the boardroom, classroom, or our own homes, every day we interact with others and try to get the truth from them. People are often untruthful out of fear of negative consequences associated with divulging information. But if a person is made to forget the long-term outcomes of lying, he or she can be influenced to disclose sensitive information that's being withheld. The aim is to encourage the person to remain in short-term thinking mode, shifting focus away from the long-term ramifications of telling the truth. As former CIA agents and bestselling authors of *Spy the Lie*, Philip Houston, Mike Floyd, and Susan Carnicero are among the world's best at detecting deceptive behavior and eliciting the truth from even the most accomplished liars. *Get the Truth* is a step-by-step guide that empowers readers to elicit the truth from others. Foreword by Steven Pinker Blending the informed analysis of *The Signal and the Noise* with the instructive iconoclasm of *Think Like a Freak*, a fascinating, illuminating, and witty look at what the vast amounts of information now instantly available to us reveals about ourselves and our world—provided we ask the right questions. By the end of an average day in the early twenty-first century, human beings searching the internet will amass eight trillion gigabytes of data. This staggering amount of information—unprecedented in history—can tell us a great deal about who we are—the fears, desires, and behaviors that drive us, and the conscious and unconscious decisions we make. From the profound to the mundane, we can gain astonishing knowledge about the human psyche that less than twenty years ago, seemed unfathomable. *Everybody Lies* offers fascinating, surprising, and sometimes laugh-out-loud insights into everything from economics to ethics to sports to race to sex, gender and more, all drawn from the world of big data. What percentage of white voters didn't vote for Barack Obama because he's black? Does where you go to school effect how successful you are in life? Do parents secretly favor boy children over girls? rate? Can you beat the stock market? How regularly do we lie about our sex lives and who's more self-conscious about sex, men or women? Investigating these questions and a host of others, Seth Stephens-Davidowitz offers revelations that can help us understand ourselves and our lives better. Drawing on studies and experiments on how we really live and think, he demonstrates in fascinating and often funny ways the extent to which all the world is indeed a lab. With conclusions ranging from strange-but-true to thought-provoking to disturbing, he explores the power of this digital truth serum and its deeper potential—revealing biases deeply embedded within us, information we can use to change our culture, and the questions we're afraid to ask that might be essential to our health—both emotional and physical. All of us are touched by big data everyday, and its influence is multiplying. *Everybody Lies* challenges us to think differently about how we see it and the world.

Confessions of a Sociopath is both the memoir of a high-functioning, law-abiding (well, mostly) sociopath and a roadmap -- right from the source -- for dealing with the sociopath in your life. As M.E. Thomas says of her fellow sociopaths, “We are your neighbors, your coworkers, and quite possibly the people closest to you: lovers, family, friends. Our risk-seeking behavior and general fearlessness are thrilling, our glibness and charm alluring. Our often quick wit and outside-the-box thinking make us appear intelligent—even brilliant. We climb the corporate ladder faster than the rest, and appear to have limitless self-confidence. Who are we? We are highly successful, noncriminal sociopaths and we comprise 4 percent of the American population.” Confessions of a Sociopath—part confessional memoir, part primer for the curious—takes readers on a journey into the mind of a sociopath, revealing what makes them tick while debunking myths about sociopathy and offering a road map for dealing with the sociopaths in your life. M. E. Thomas draws from her own experiences as a diagnosed sociopath, her popular Sociopathworld blog, and scientific literature to unveil for the very first time these men and women who are “hiding in plain sight.”

## **The Yellow Wall Paper**

An NPR Book Concierge Best Book of 2018! A Sunday Times of London Pick of the Paperbacks A stunning story about how power works in the modern age--the book the New York Times called "one helluva page-turner" and The Sunday Times of London celebrated as "rivetingan astonishing modern media conspiracy that is a fantastic read." Pick up the book everyone is talking about. In 2007, a short blogpost on Valleywag, the Silicon Valley-vertical of Gawker Media, outed PayPal founder and billionaire investor Peter Thiel as gay. Thiel's sexuality had been known to close friends and family, but he didn't consider himself a public figure, and believed the information was private. This post would be the casus belli for a meticulously plotted conspiracy that would end nearly a decade later with a \$140 million dollar judgment against Gawker, its bankruptcy and with Nick Denton, Gawker's CEO and founder, out of a job. Only later would the world learn that Gawker's demise was not incidental--it had been masterminded by Thiel. For years, Thiel had searched endlessly for a solution to what he'd come to call the "Gawker Problem." When an unmarked envelope delivered an illegally recorded sex tape of Hogan with his best friend's wife, Gawker had seen the chance for millions of pageviews and to say the things that others were afraid to say. Thiel saw their publication of the tape as the opportunity he was looking for. He would come to pit Hogan against Gawker in a multi-year proxy war through the Florida legal system, while Gawker remained confidently convinced they would prevail as they had over

so many other lawsuit--until it was too late. The verdict would stun the world and so would Peter's ultimate unmasking as the man who had set it all in motion. Why had he done this? How had no one discovered it? What would this mean--for the First Amendment? For privacy? For culture? In Holiday's masterful telling of this nearly unbelievable conspiracy, informed by interviews with all the key players, this case transcends the narrative of how one billionaire took down a media empire or the current state of the free press. It's a study in power, strategy, and one of the most wildly ambitious--and successful--secret plots in recent memory. Some will cheer Gawker's destruction and others will lament it, but after reading these pages--and seeing the access the author was given--no one will deny that there is something ruthless and brilliant about Peter Thiel's shocking attempt to shake up the world.
