## What Is a Family?

When a teacher asks the children in her class to think about what makes their families special, the answers are all different in many ways — but the same in the one way that matters most of all. One child is worried that her family is just too different to explain, but listens as her classmates talk about what makes their

families special. One is raised by a grandmother, and another has two dads. One has many stepsiblings, and another has a new baby in the family. As her classmates describe who they live with and who loves them — family of every shape, size and every kind of relation — the child realizes that as long as her family is full of caring people, it is special. A warm and whimsical look at many types of families, written by award-winning author Sara O’Leary, with quirky and sweet illustrations by Qin Leng.

Since Maria Gomori first met and studied with Virginia Satir in 1968, she has worked tirelessly around the world to fulfill Satir's dream of changing the world "one family at a time." In Satir Family Therapy in Action, Maria presents five varied and impactful cases from a family therapy teaching project conducted in China in 2011 and 2012. Testament to the universality of underlying issues in cultures across the globe, the sessions will be inspirational both to parents and families and to practitioners and students. They are masterclasses in the art of family therapy, demonstrating Maria's firm belief that change in families is always possible. Satir Family Therapy in Action also contains two personal essays, one on the life and pioneering work of Virginia Satir, another on Maria's own involvement in the development of Satir's work in North America, Asia, and around the world.

What Is a Family? explores the histories of diverse households during the Tokugawa period in Japan (1603–1868). The households studied here differ in locale and in status—from samurai to outcaste, peasant to merchant—but what unites them is life within the social order of the Tokugawa shogunate. The circumstances and choices that made one household unlike another were framed, then as now, by prevailing laws, norms, and controls on resources. These factors led the majority to form stem families, which are a focus of this volume. The essays in this book draw on rich sources—population registers, legal documents, personal archives, and popular literature—to combine accounts of collective practices (such as the adoption of heirs) with intimate portraits of individual actors (such as a murderous wife). They highlight the variety and adaptability of households that, while shaped by a shared social order, do not conform to any stereotypical version of a Japanese family. "Rags to riches to rags" - that saying has endured for centuries through many cultures because family success, whether fame, fortune, or otherwise, rarely survives through the third generation. In the United States, only 30 percent of family businesses make it through the second generation, while only 12 percent make it through the third. "You Can't Spend Pride" tells the story of one family business, Mister Kleen, that has defied the odds. Not only are three generations of the family working in the company, but Mister Kleen has grown to be a multi-million-dollar operation that ranks among the top 10 percent of businesses in its industry. Narrated as a first-person account by the co-founder, Mary Ann Clark, and her son and current company president, Ernie Clark Jr., "You Can't Spend Pride" tells the improbable story of how the family built their business from cleaning one client's office in the evenings to maintaining millions of square feet of high-security and commercial space throughout the Washington, D.C. area. In *Teaching with Poverty in Mind: What Being Poor Does to Kids' Brains and What Schools Can Do About It*, veteran educator and brain expert Eric Jensen takes an unflinching look at how poverty hurts children, families, and communities across the United States and demonstrates how schools can improve the academic achievement and life readiness of economically disadvantaged students. Jensen argues that although chronic exposure to poverty can result in detrimental changes to the brain, the brain's very ability to adapt from experience means that poor children can also experience emotional, social, and academic success. A brain that is susceptible to adverse environmental effects is equally susceptible to the positive effects of rich, balanced learning environments and caring relationships that build students' resilience, self-esteem, and character. Drawing from research, experience, and real school success stories, *Teaching with Poverty in Mind* reveals

- \* What poverty is and how it affects students in school;
- \* What drives change both at the macro level (within schools and districts) and at the micro level (inside a student's brain);
- \* Effective strategies from those who have succeeded and ways to replicate those best practices at your own school; and
- \* How to engage the resources necessary to make change happen.

Too often, we talk about change

TOP TEN BOOKS OF THE YEAR PEOPLE'S #1 BEST BOOK OF THE YEAR Named a BEST BOOK OF THE YEAR by The New York Times, The Washington Post, NPR, TIME, Slate, Smithsonian, and Amazon The heartrending story of a midcentury American family with twelve children, six of them diagnosed with schizophrenia, that became science's great hope in the quest to understand the disease. Don and Mimi Galvin seemed to be living the American dream. After World War II, Don's work with the Air Force brought them to Colorado, where their twelve children perfectly spanned the baby boom: the oldest born in 1945, the youngest in 1965. In those years, there was an established script for a family like the Galvins--aspiration, hard work, upward mobility, domestic harmony--and they worked hard to play their parts. But behind the scenes was a different story: psychological breakdown, sudden shocking violence, hidden abuse. By the mid-1970s, six of the ten Galvin boys, one after another, were diagnosed as schizophrenic. How could all this happen to one family? What took place inside the house on Hidden Valley Road was so extraordinary that the Galvins became one of the first families to be studied by the National Institute of Mental Health. Their story offers a shadow history of the science of schizophrenia, from the era of institutionalization, lobotomy, and the schizophrenogenic mother to the search for genetic markers for the disease, always amid profound disagreements about the nature of the illness itself. And unbeknownst to the Galvins, samples of their DNA informed decades of genetic research that continues today, offering paths to treatment, prediction, and even eradication of the disease for future generations. With clarity and compassion,

### **What is a Family?**

This book argues that the legal understanding of 'family' in the UK continues to be underpinned by the idealised image of the 'nuclear family', premised upon the traditional, gendered roles of 'father as breadwinner' and 'mother as homemaker'. This examination of the law's model of the 'family' has been prompted by the substantial reforms that have taken place in family law in recent decades, and the significant evolution in social attitudes and familial practices that has occurred in parallel. Throughout the book, the influence of the nuclear family is noted in several different contexts: various specific legal definitions of 'family', the legal regulation of adult, conjugal relationships, the attribution of legal parenthood and the construction of the role of the 'parent' within the law. Ultimately, this book argues that while these reforms have resulted in additional categories of relationship coming to be situated within the nuclear family model, there has not, as yet, been any fundamental alteration of the underpinning concept of the nuclear family itself. This book concludes by considering the possibilities offered beyond the 'nuclear family'; exploring the reconceptualising of the legal understanding of 'family' around alternative and potentially 'radical' models of 'family'.

DIRECTED BY RON HOWARD AND STARRING AMY ADAMS, GLENN CLOSE, AND GABRIEL BASSO "You will not read a more important book about America this year."—The Economist "A riveting book."—The Wall Street Journal "Essential reading."—David Brooks, New York Times Hillbilly Elegy is a passionate and personal analysis of a culture in crisis—that of white working-class Americans. The disintegration of this group, a process that has been slowly occurring now for more than forty years, has been reported with growing frequency and alarm, but has never before been written about as searingly from the inside. J. D. Vance tells the true story of what a social, regional, and class decline feels like when you were born with it hung around your neck. The Vance family story begins hopefully in postwar America. J. D.'s grandparents were "dirt poor and in love," and moved north from Kentucky's Appalachia region to Ohio in the hopes of escaping the dreadful poverty around them. They raised a middle-class family, and eventually one of their grandchildren would graduate from Yale Law School, a conventional marker of success in achieving generational upward mobility. But as the family saga of Hillbilly Elegy plays out, we learn that J.D.'s grandparents, aunt, uncle, sister, and, most of all, his mother struggled profoundly with the demands of their new middle-class life, never fully escaping the legacy of abuse, alcoholism, poverty, and trauma so characteristic of their part of America. With piercing honesty, Vance shows how he himself still carries around the demons of his chaotic family history. A deeply moving memoir, with its share of humor and vividly colorful figures, Hillbilly Elegy is the story of how upward mobility really feels. And

In this book, leading authorities on the family show how families, parents, and children have been affected by changing patterns of marriage and cohabitation. Taking a long historical perspective, some authors consider trends such as the decline of multigenerational families and group differences in the relationships between economic opportunity and the timing of marriage. But the focus is predominantly on questions of current interest: patterns of union formation, differences between marriage and cohabitation, contact between divorced fathers and their children, the division of household labor, and the transmission of attitudes and behavior across generations. Intended for scholars and advanced students, this book offers essential analysis of the changing dimensions of the American family.
